Corpus Linguistics for Pragmatics provides a practical and comprehensive introduction to the growing field of corpus pragmatics. Taking a hands-on approach to showcase the applications of corpora in the exploration of core topics within pragmatics, this book: • covers six key areas of corpus-pragmatic research including speech acts, deixis, pragmatic markers, evaluation, conversational structure, and multimodality; • demonstrates the use of freely-available corpora, corpus interfaces and corpus analysis tools to conduct original pragmatic analyses; • is accompanied by an e-resource which hosts multimodal data sets for additional exercises. *Theoretical Inquiry* Routledge

div In the aftermath of debate about the death of literary theory, Austin E. Quigley asks whether theory has failed us or we have failed literary theory. Theory can thrive, he argues, only if we understand how it can be strategically deployed to reveal what it does not presuppose. This involves the repositioning of theoretical inquiry relative to historical and critical inquiry and the repositioning of theories relative to each other. What follows is a thought-provoking reexamination of the controversial claims of pluralism in literary studies. The book explores the related roles of literary history, criticism, and theory by tracing the fascinating history of linguistics as an intellectual problem in the twentieth century. Quigley’s approach clarifies the pluralistic nature of literary inquiry, the viability and life cycles of theories, the controversial status of canonicity, and the polemical nature of the culture wars by positioning them all in the context of recurring debates about language that have their earliest exemplifications in classical times. /DIV [Linguistics and Literary History](#) Taylor & Francis

Bringing together theory, research, and practice to dismantle Anti-Black Linguistic Racism and white linguistic supremacy, this book provides ethnographic snapshots of how Black students navigate and negotiate their linguistic and racial identities across multiple contexts. By highlighting the counterstories of Black students, Baker-Bell demonstrates how traditional approaches to language education do not account for the emotional harm, internalized linguistic racism, or consequences these approaches have on Black students' sense of self and identity. This book presents Anti-Black Linguistic Racism as a framework that explicitly names and richly captures the linguistic violence, persecution, dehumanization, and marginalization Black Language-speakers endure when using their language in schools and in everyday life. To move toward Black linguistic liberation, Baker-Bell introduces a new way forward through Antiracist Black Language Pedagogy, a pedagogical approach that intentionally and unapologetically centers the linguistic, cultural, racial, intellectual, and self-confidence needs of Black students. This volume captures what Antiracist Black Language Pedagogy looks like in classrooms while simultaneously illustrating how theory, research, and practice can operate in tandem in pursuit of linguistic and

racial justice. A crucial resource for educators, researchers, professors, and graduate students in language and literacy education, writing studies, sociology of education, sociolinguistics, and critical pedagogy, this book features a range of multimodal examples and practices through instructional maps, charts, artwork, and stories that reflect the urgent need for antiracist language pedagogies in our current social and political climate.

This book investigates the origins of figurative language in literary discourse within a cognitive framework. It represents an interface between linguistics and literature and develops a 6-tier theoretical model which analyses the different factors contributing to the creation of figurative words and expressions. By examining features ranging from language structure to figurative thought, cultural history, reference, narrative and the personal experience of authors, it develops a global overview of the processes involved. Due to its particularly innovative characteristics in literature, the theme of death is explored in relation to universal concepts such as love and time. These aspects are discussed in the light of well-known authors in comparative literature such as D.H. Lawrence, Simone De Beauvoir, Hermann Hesse and Jorge Luis Borges. The origins can involve complex conceptual mappings in figures of speech such as metaphor and symbolism. They

are often at the roots of an author's personal desires or represent the search for answers to human existence. This approach offers a wide variety of new ideas and research possibilities for postgraduate and research students in modern languages, linguistics and literature. It would also be of interest to academic researchers in these disciplines as well as the general public who would like to delve deeper into the relevant fields.

*In honour of Sylvia Adamson* Linguistics for Students of Literature

This book documents the changing realities in the fields of linguistics, literature and culture in Asia, resulting from globalization, modernisation and rapid technological development. It consists of sixteen essays by academics and researchers around the world, reflecting on the interface between the global and the local, and its impact on the local and regional languages, literatures and cultures of Asia. This scenario, which exemplifies language contact in action, is captured by the book mainly to demonstrate that linguistic negotiations, appropriations and indeed changes are not one-way. As such, their implications on language use, language choice, language policy

and planning, literacy and pedagogy, identity, subjectivity and culture need to be closely examined. The uniqueness of this book lies in its attempt to showcase original research in a variety of multicultural settings. Its multi- and cross-disciplinary approach will appeal to a wide spectrum of readers from diverse backgrounds. This book will serve as a useful reference that is both scholarly and informative for researchers as well as academics in the fields of linguistics, literature and culture.

Language, Literature and the Learner is an edited volume evolving from three international seminars devoted to the teaching of literature in a second or foreign language. The seminars explicitly addressed the interface between language and literature teaching to investigate the ways in which literature can be used as a resource for language growth at secondary, intermediate and upper-intermediate level. This book presents the reader with a practical classroom-based guide to how the teaching of language and literature, until recently seen as two distinct subjects

within the English curriculum, can be used as mutually supportive resources within the classroom. Through essays and case studies it reports on the most recent developments in classroom practice and methodology and suggests ways in which the curriculum could be reshaped to take advantage of this integrated approach. The text will be essential reading for students undertaking PGCE, TESOL/MA, UCLES, CTEFLA, RSA and Teachers' Diploma courses worldwide. Students of applied linguistics, those on stylistics courses and undergraduates studying English language will welcome it as accessible supplementary reading.

This book aims at a systematic analysis of linguistic phenomena in the poetry of Emily Dickinson by combining the methods of linguistics and literary studies. The authors concentrate on the poetry of Emily Dickinson, since it displays a highly uncommon use of language. They argue that this is part of her poetical strategy and gives evidence of a large degree of linguistic competence and awareness.
