This volume offers research-based studies on English for Specific Purposes in higher education from across the world. By drawing on international studies, the book brings together diverse ESP practices and

aspects of relevant issues in the development of ESP programs, teachers and learners in a coherent fashion. There is a growing need for undergraduate students to develop their proficiency of ESP skills and knowledge in the increasingly globalized world. Knowledge of ESP is an important factor in subject matter learning by students, and also closely related to the performance of university graduates in the relevant sectors. Careful planning and efficient implementation are essential to ensure the quality of the language learning process. For a variety of reasons, it proves difficult to maintain ESP instruction in higher

education. These reasons include the incompetence of teachers, lack of materials for that specific context, as well as lack of opportunities for ESP teachers to develop their skills. The chapters in this book, taken from a wide variety of countries, shed light on the diversity of current practices and issues surrounding ESP.

contextualizes the field of English for Academic Purposes (EAP), with a particular focus on the professional and academic identity and role of the EAP practitioner. The authors examine previously neglected areas such as the socio-economic, academic and employment contexts within which EAP practitioners function. In doing so, they

develop a better understanding of the roles, expectations and constraints that arise from these contexts, which in turn shape professional practice and the identity of the practitioner. As EAP is emerging as an academic discipline with a growing body of published research, this book will appeal to trainee and established practitioners, along with researchers and students of linguistics and education.

Why has English language proficiency in Japan remained so low in comparison to other Asian countries? Has Vietnam attempted to improve English language teaching because ASEAN has adopted English as its working language? Why do English language teachers struggle with curriculum changes imposed by governments in order to make them competitive in the international community? Do professional development (PD) programs actually meet the needs of teachers? This book addresses issues surrounding these questions by examining how the Japanese and Vietnamese

governments have approached and defined the PD of English language teachers and how such PD programs have been delivered. It further analyses the impact of policy changes on individual teachers and explores how PD can help teachers to implement such changes effectively at the micro-level. PD of language teachers or language teacher education is relatively new as a field of inquiry in Applied Linguistics. By including case studies of Japan and Vietnam in the one volume, this book embarks on the challenging task of demonstrating that PD is an essential element of the successful implementation of language policies in

Asia, where World Englishes have been shaped by distinct local contexts.
