Dynamic economics, technological changes, increasing pressure from competition and customers to improve manufacturing and services are some of the major challenges to enterprises these days. New ways of improving organizational activities and management processes have to be created, in order to allow enterprises to manage the seemingly intensifying competitive markets successfully. Enterprises apply business optimizing solutions to meet new challenges and conditions. But also ensuring effective development for long-term competitiveness in a global environment. This is necessary for the application of qualitative changes in the industrial policy. "New Trends in Process Control and Production Management" (MTS 2017) is the collection of research papers from authors from seven countries around the world. They present case studies and empirical research which illustrates the progressive trends in business process management and the drive to achieve enterprise development and sustainability.

Theory and Managerial Applications Prentice Hall Direct

Since its birth as a motorcycle company in 1949, Honda has steadily grown into one of the world's largest automakers and engine manufacturers, as well as one of the most beloved, most profitable, and most consistently innovative multinational corporations. What drives the company that keeps creating and improving award-winning and bestselling models like the Civic, Accord, Odyssey, CR-V, and Pilot? According to Jeffrey Rothfeder, what

truly distinguishes Honda from its competitors, especially archrival Toyota, is a deep commitment to a set of unorthodox management tenets. The Honda Way, as insiders call it, is notable for decentralization over corporate control, simplicity over complexity, experimentation over Six Sigma-driven efficiency, and unyielding cynicism toward the status quo and whatever is assumed to be the truth. Those are just a few of the ideas that the company's colorful founder Soichiro Honda embedded in the DNA of his start-up sixty-five years ago. As the first journalist allowed behind Honda's infamously private doors, Rothfeder interviewed dozens of executives, engineers, and frontline employees about Honda's management practices and global strategy. He shows how the company developed and maintained its unmatched culture of innovation, resilience, and flexibility--and how it exported that culture to other countries that are strikingly different from Japan, establishing locally controlled operations in each region where it lays down roots.

Spells out the Honda success story, covering the post-war founding of the company, through its subsequent and steady growth to a manufacturing leader

F & S Index International: Industries, Countries, Companies Soyinfo Center

In 1960, the GDP per capita of Southeast Asian countries was nearly half of that of Africa. By 1986 the gap had closed and today the trend is reversed, with more than half of the world's poorest now living in sub Saharan Africa. Why has Asia developed while Africa lagged? The Asian Aspiration chronicles the stories of explosive growth and changing fortunes: the leaders, events and policy choices that lifted a billion people out of abject poverty within a single generation, the largest such shift in human history. The relevance of Asia's example comes as Africa is facing a population boom, which can either lead to crisis or prosperity, and as Asia is again transforming, this time out of low-cost manufacturing into hi-tech, leaving a void that is Africa's for the taking. Far from the optimistic determinism of "Africa Rising," this book calls for unprecedented pragmatism in the pursuit of African success.
