This book combines classic and recent studies investigating challenges to Emiratization - full employment of Emirati nationals who make up only about 10% of the total workforce - in the

United Arab Emirates (UAE). The book offers a comprehensive overview of the events leading to the country's rapid growth and development, as well as important social and cultural issues arising as the country transitioned from an isolated traditional economy to an open globalized one, and explores the specific challenges of incorporating Emiratis in their own vibrant economy. This topic is of interest to scholars, policymakers, and those considering investing or seeking employment in the UAE since it emerged as a Western-friendly, politically stable, and prospering oil-producing country in a region plagued by political, social, and economic turmoil.

The King James translators drew upon all of their English predecessors and much more besides. The authors offer both a political and literary history of the Bible. Their purpose is to explain how styles of presenting Scriptures in English developed out of political and ecclesiastical circumstances. The result is a refreshing reassessment of the literary and scholarly accomplishment of all the Renaissance Bibles and a clear account of what is different and distinctive in the King James Version. They also linger over the texts of the Bible, comparing significant passages in the various versions. Such close study of the texts is warranted because the English Bible has had a profound effect on English language, literature, politics and ideas; it has left a lasting impression on the language that we speak today. No other language, except perhaps German, can boast that its vernacular translation of the Bible is a literary masterpiece in its own right.

An authentic, unique and memorable destination image is of crucial importance to be competitive in the long-term. Verena Schwaighofer analyses the currently transferred image of the United Arab Emirates as a tourist destination and to what extent the traditional Arabian culture is integrated into the image strategies of image developers in this country. First of all, a detailed theoretical overview referring to various image types, the current image transfer including critical topics related to the religion of Islam, women's role in

society, behaviour, body language and dress code and the open-mindedness of the United Arab Emirates regarding local traditions related to the religion of Islam, is given. In the empirical part, a mixed method, including a qualitative media analysis (focusing on print and new media of image developers as well as newspaper articles published by journalists in the United Arab Emirates and the surrounding countries) and qualitative expert interviews are selected as appropriate research methodology.
