This book examines the intersection of gender and violence in popular culture. Drawing on the latest thinking in critical international relations, media and cultural studies and gender studies, it focuses in particular on a number of popular TV shows including Angel, Buffy the Vampire Slayer, Firefly, Generation Kill, The Corner and The West Wing. The book makes a unique theoretical contribution to the 'narrative turn' in International Relations by illustrating the ways in which popular culture and global politics are intertwined and how we make sense of our worlds through these two frames. Methodologically, the book enhances discourse-theoretical analysis in IR through its incorporation of methods from narratology and film studies. The book proposes an aesthetic ethicopolitical approach to global politics which challenges us to interrogate how it becomes possible that we think what we think, it challenges the truths that we hold to be self-evident and that which we take to be common sense. It demands that we think carefully, critically, uncomfortably, about our world(s) – even when we're 'only' watching television.

This paper analyzes the capital structure of private asset managers in which the acquisition of nonperforming loans (NPLs) is funded with Contingent Convertibles (CoCos) placed with investors. The paper develops a model based on NPL transfer prices and residual recovery rates to assess capital structures consisting of CoCos and equity. The CoCos would contain put and

call options to write down losses and write up profits, respectively, arising from liquidation and restructuring procedures. The paper concludes that the protection mechanism provided by debt write-downs embedded in CoCos and the incentives to investors provided by debt write-ups could help bridge the gap between Portuguese banks' NPL bid prices and private equity firms' ask prices.

Feminist research on gender, violence and abuse has been an area of academic study since the late 1970s, and has increased exponentially over this time on a global scale. Although situated in a predominantly qualitative tradition, research in the field has developed to include quantitative and mixed methodologies. This book offers a compendium of research methods on gender and violence, from the traditional to the innovative, and showcases best practice in feminist research and international case studies. *Researching Gender, Violence and Abuse* covers: The origins of feminist research, Ethical considerations relating to research on gender, violence and abuse, Working in partnership with organisations such as the police or the voluntary sector, A comprehensive range of research methods including interviews and focus groups, surveys, arts-based research and ethnography, The challenges and opportunities of working with existing data, The influence of activism on research and the translation of research into policy and practice. This book is perfect reading for

students taking courses on violence against women, domestic violence, gender and crime, as well as advanced students embarking on new research.

Researching Gender Violence NYU Press

This pioneering work explores the theme of women and violence in the late medieval Mediterranean, bringing together medievalists of different specialties and methodologies to offer readers an updated outline of how different disciplines can contribute to the study of gender-based violence in medieval times. Building on the contributions of the social sciences, and in particular feminist criminology, the book analyses the rich theme of women and violence in its full spectrum, including both violence committed against women and violence perpetrated by women themselves, in order to show how medieval assumptions postulated a tight connection between the two. Violent crime, verbal offences, war and peace-making are among the themes approached by the book, which assesses to what extent coexisting elaborations on the relationship between femininity and violence in the Mediterranean were conflicting or collaborating. Geographical regions explored include Western Europe, Byzantium, and the Islamic world. This multidisciplinary book will appeal to scholars and students of history, literature, gender studies, and legal studies.

Across Time and Space Routledge

Written for students who are just beginning to study human services, this practical, easy-to-read guide provides a nuts-and-bolts overview of the field as well as a glimpse of what students can expect as they continue their education and begin working in their profession. Because the field encompasses many career opportunities, skills, and client populations, this text also helps students decide which specialty is right for them. AN OVERVIEW OF THE HUMAN SERVICES, 2nd Edition, provides a look at human services agencies, jobs, workers, and populations served; a clear analysis of the major theories of causality; and helpful special chapters on such important topics as ethics and stress management. It prepares students by challenging them to become active learners via self-reflection, case studies, real-world scenarios, applied and experiential activities, and inventories. This edition has been significantly revised and reorganized to improve coverage and flow of the material; for instance, with earlier and more detailed coverage of ethics, more information on

two-year human service degrees, an entire chapter on case management, and a new chapter devoted to the issues and interventions related to interpersonal partner abuse, sexual assault (including military sexual assault), HIV/AIDS, and LGBT populations. "This book focuses on the multiple and interconnected manifestations of violence that women/girls encounter in tourism consumption and production while seeking to open the debate on violence against sexual minorities (LGBT) and discussing men/boys as victims and perpetrators of GBV"--

Gendered Violence at International Festivals Grove/Atlantic, Inc.

Though entrepreneurship has been studied for decades, in recent years, the study of "rural entrepreneurship" has emerged as an upcoming subtopic of the area. With the growth and continual ease of utilizing digital technologies to support entrepreneurial activities, these technologies now provide unique opportunities for advancing rural entrepreneurship. Though prior research focused on challenges for IT use in rural areas that specifically investigated investment and management issues, it is important to study all challenges and opportunities involved in this developing area of research. Rural Entrepreneurship and Innovation in the Digital Era is a pivotal reference source that provides vital research on the utilization of digital technologies in rural business ventures. Unlike other references-- this book studies the conceptualization process of rural entrepreneurship and innovation with the intention of providing guidelines and support for entrepreneurs. While highlighting topics such as microfinancing, risk management, and rural development, this publication explores innovative practices as well as the methods of IT investment and management. This book is ideally designed for business professionals, entrepreneurs, business researchers, academics, and business students.

Gender, Violence and Popular Culture Routledge

"An elegant, impassioned demand that America see gender-based violence as a cultural and structural problem that hurts everyone, not just victims and survivors... It's at times downright virtuosic in the threads it weaves together."—NPR From the woman who gave the landmark testimony against Clarence Thomas as a sexual

menace, a new manifesto about the origins and course of gender violence in our society; a combination of memoir, personal accounts, law, and social analysis, and a powerful call to arms from one of our most prominent and poised survivors. In 1991, Anita Hill began something that's still unfinished work. The issues of gender violence, touching on sex, race, age, and power, are as urgent today as they were when she first testified. Believing is a story of America's three decades long reckoning with gender violence, one that offers insights into its roots, and paths to creating dialogue and substantive change. It is a call to action that offers guidance based on what this brave, committed fighter has learned from a lifetime of advocacy and her search for solutions to a problem that is still tearing America apart. We once thought gender-based violence--from casual harassment to rape and murder--was an individual problem that affected a few; we now know it's cultural and endemic, and happens to our acquaintances, colleagues, friends and family members, and it can be physical, emotional and verbal. Women of color experience sexual harassment at higher rates than White women. Street harassment is ubiquitous and can escalate to violence. Transgender and nonbinary people are particularly vulnerable. Anita Hill draws on her years as a teacher, legal scholar, and advocate, and on the experiences of the thousands of individuals who have told her their stories, to trace the pipeline of behavior that follows individuals from place to place: from home to school to work and back home. In measured, clear, blunt terms, she demonstrates the impact it has on every aspect of our lives, including our physical and mental wellbeing, housing stability, political participation, economy and community safety, and how our descriptive language undermines progress toward solutions. And she is uncompromising in her demands that our laws and our leaders must address the issue concretely and immediately.

Intersections of Animal Oppression, Patriarchy and Domination of the Earth Routledge

This book examines the issue of gender and violence in the Middle East and North Africa. Drawing on case studies across the region, the authors examine the historical, cultural, religious, social, legal and political factors affecting the issue.

Eliminating Gender-Based Violence Routledge

In recent years, mob attacks on women by men have drawn public attention to an emerging social phenomenon. This book

draws upon concepts from critical race theory and sociocultural evolutionary theory to examine this specific form of gender violence, which takes place outside the law and is a vigilante form of enforcing traditional gender norms. The author positions vigilante gender violence as a global issue produced during specific periods of sociocultural change in conditions marked by intensified social stratification. The catalyst for vigilante gender violence is the formal state's breaching of the "gender bargain," the tacit psychological wage even non-elite men earn by at least not being female. When the state threatens to end the gender bargain by promoting women's rights, the die is cast for low-status men to enforce this bargain themselves in mob attacks against women who are perceived to be violating the patriarchal order. Seen through independent case studies in different national settings, this book provides empirical evidence that demonstrates the existence of vigilante gender violence in times when societies are shifting from one phase to another and the social hierarchies present within are disrupted. With greater understanding of when and how to predict the occurrence of this phenomenon, the author posits notable ways to prevent it from happening altogether.

Gender, Violence and Governmentality Routledge

Gendered Violence at International Festivals is a groundbreaking collection that focusses on this highly important social issue for the first time. Including a diverse range of interdisciplinary studies on the issue, the book contests the widely held notion that festivals are temporal spaces free from structural sexism, inequalities or gender power dynamics. Rather, they are spaces where these concerns are enhanced and enacted more freely and where the experiential environment is used as an excuse or as an opportunity to victim blame and shame. In this emerging and under-researched area, the chapters not only present original work in terms of topics but also in theoretical and methodological approaches. All of the chapters are cross- or interdisciplinary, drawing on gender, sexualities, cultural and ethnicity studies. Studies from a range of highly regarded academics based around the world examine the subject by looking at examples from a wide range of destinations, including Spain, Argentina, Nigeria, Zimbabwe, Australia, Canada and the UK. This significant book progresses understanding and debates about gendered festival experiences and emphasises the symbolic and physical violence

often associated with them. This will be of great interest to, undergraduate and postgraduate students and academics in the field of Events Studies. It will also be of use to practitioners or non-profit workers in the festival industries, including festival management organisations and planning committees.

Gender, Violence and the State in Asia Springer Nature

This comprehensive and authoritative sourcebook offers academics, researchers and students an introduction to and overview of current scholarship at the intersection of marketing and feminism. In the last five years there has been a resurrection of feminist voices in marketing and consumer research. This mirrors a wider public interest in feminism - particularly in the media as well as the academy - with younger women discovering that patriarchal structures and strictures still limit women's development and life opportunities. The "F" word is back on the agenda - made high profile by campaigns such as #MeToo and #TimesUp. There is a noticeably renewed interest in feminist scholarship, especially amongst younger scholars, and significantly insightful interdisciplinary critiques of this new brand of feminism, including the identification of a neoliberal feminism that urges professional women to achieve a work/family balance on the back of other women's exploitation. Consolidating existing scholarship while exploring emerging theories and ideas which will generate further feminist research, this volume will be of interest to researchers, academics and students in marketing and consumption studies, especially those studying or researching the complex inter-relationship of feminism and marketing.

Gender, Violence and Power in Indonesia Routledge

The Democratic Republic of Congo (DRC) has been called the 'worst place in the world' for women, with reports of widespread and horrific incidents of rape and sexual violence and almost complete impunity for the perpetrators of such violence. However, despite the high profile media reporting on sexual violence in the DRC, and the widely publicized responses of the international community, there is still very little real analysis of the real situation of women in the country. This book provides such detailed analysis of gender relations in the DRC, and goes beyond the usual explanations of sexual violence as a product of conflict, to examine the complex and socially constructed gender norms and roles which underlie incidences of violence. The book benefits from a comprehensive account of men's and women's

roles in conflict, violence, peace building and reconstruction, and evaluates the impacts of national and international political responses. In doing so, this book provides valuable new evidence and analysis of the complex and multilayered conflicts in the DRC.

Politics after Violence Routledge

Between 1980 and 1994, Peru endured a bloody internal armed conflict, with some 69,000 people killed in clashes involving two insurgent movements, state forces, and local armed groups. In 2003, a government-sponsored "Truth and Reconciliation Committee" reported that the conflict lasted longer, affected broader swaths of the national territory, and inflicted higher costs, in both human and economic terms, than did any other conflict in Peru's history. Of those killed, 75 percent were speakers of an indigenous language, and almost 40 percent were among the poorest and most rural members of Peruvian society. These unequal impacts of the violence on the Peruvian people revealed deep and historical disparities within the country. This collection of original essays by leading international experts on Peruvian politics, society, and institutions explores the political and institutional consequences of Peru's internal armed conflict in the long 1980s. The essays are grouped into sections that cover the conflict itself in historical, comparative, and theoretical perspectives; its consequences for Peru's political institutions; its effects on political parties across the ideological spectrum; and its impact on public opinion and civil society. This research provides the first systematic and nuanced investigation of the extent to which recent and contemporary Peruvian politics, civil society, and institutions have been shaped by the country's 1980s violence.

Vigilante Gender Violence Routledge

This book builds on work that examines the interactions between immigration and gender-based violence, to explore how both the justification and condemnation of violence in the name of religion further complicates our societal relationships. Violence has been described as a universal challenge that is rooted in the social formation process. As humans seek to exert power on the other, conflict occurs. Gender based violence, immigration, and religious values have often intersected where patriarchy-based power is exerted on the other. An international panel of contributors take a multidisciplinary approach to investigating three central themes. Firstly, the intersection between religion, immigration, domestic

violence, and human rights. Secondly, the possibility of collaboration between various social units for the protection of immigrants' human rights. Finally, the need to integrate faith-based initiatives and religious leaders into efforts to transform attitude formation and general social behavior. This is a wide-ranging and multi-layered examination of the role of religion in gender-based violence and immigration. As such, it will be of keen interest to academics working in religious studies, gender studies, politics, and ethics.

Annual Economic Report Routledge

While promoting access to resources and systems of support for those affected by gender-based violence is absolutely crucial, this

new book focuses attention on the important question of how communities can take action to prevent violence and abuse. Using examples of current research and practice, the book explores the actions that can be taken in individual sectors of society, our schools, faith communities, campuses, on our streets and using new popular technologies. The contributors draw on global examples to highlight the importance of learning from the study of the interaction between socio-political contexts and effective policies and strategies to address gender-based violence. Chapters take up the challenge of exploring the construction of effective programmes that address cognitive, affective and behavioural domains. They discuss what people

know, how they feel and how they behave, and include the important challenge of how to engage men in working towards the elimination of gender-based violence, offering positive messages which build on men's values and predisposition to act in a positive manner. Importantly, such strategies place the responsibility for preventing gender-based violence on the society as a whole rather than on vulnerable individuals. This book is essential reading for anyone interested in gender studies, women's studies, social work, sociology, law and health studies. Its unique approach focuses on the achievement of prevention at the earliest possible stage and examines the issue through a society-wide, but community-focused lens.
