*Beethoven - Piano Sonata No. 3 in C Major* Alfred Music

This definitive study of the life and works of Joseph Haydn represents half a century of research. As curator of the Gesellschaft der Musikfreunde in Vienna, Dr. Geiringer was in charge of one of the world's leading Haydn collections. His scholarly investigations took him to various monasteries, to libraries in Eisenstadt, Prague, Berlin, Paris, London, and Washington, D.C., and, as guest of the Hungarian government, to the previously almost inaccessible archives of the Princes of Esterhazy in Budapest.

*Haydn -- The Complete Piano Sonatas, Vol 2* Oxford University Press

By the 1840s Joseph Haydn, who died in 1809 as the most celebrated composer of his generation, had degenerated into the bewigged Papa Haydn, a shallow placeholder in music history who merely invented the forms used by Beethoven. In a remarkable reversal, Haydn swiftly regained his former stature within the opening decades of the twentieth century. *Reviving Haydn: New Appreciations in the Twentieth Century* examines both the decline and the subsequent resurgence of Haydn's reputation in an effort to better understand the forces that shape critical reception on a broad scale. No single person or event marked the turning point for Haydn's reputation. Instead a broad resurgence reshaped opinion in Europe and the United States in short order. The Haydn revival engaged many of the music world's leading figures -- composers (Vincent d'Indy and Arnold Schoenberg), conductors (Arturo Toscanini), performers (Wanda Landowska), critics (Lawrence Gilman), and scholars (Heinrich Schenker and Donald Tovey) -- each of whom valued Haydn's music for specific reasons and used it to advance particular goals. Yet each advocated for a rehearing and rereading of the composer's works, calling for a new appreciation of Haydn's music. Bryan Proksch is Assistant Professor of Music History at Lamar University.

Integrating Schenkerian tools and an innovative approach to harmony, David Damschroder provides numerous penetrating analyses of works by Haydn and Mozart. A series of introductory chapters assist readers in developing their analytical capacity. Beginning with short excerpts from string quartets, the study proceeds by assessing the inner workings of twelve expositions from Haydn piano sonatas, six arias in G minor from Mozart operas, and three rondos in D major from piano concertos by Haydn and Mozart. In the Masterworks section that follows, Damschroder presents detailed analyses of six movements from symphonies, string quartets and opera by Haydn and Mozart, and compares his outcomes with those of other analysts, including Kofi Agawu, Robert O. Gjerdingen, James Hepokoski and Warren Darcy, Carl Schachter and James Webster. The book represents an important contribution to modern analytical discourse on a treasured body of music and an assessment of recent accomplishments within that realm.

**Style development in the piano sonatas of Franz Joseph Haydn** Alfred Music

Although eighteenth-century Viennese keyboard music, especially by such composers as Haydn, Mozart, and Beethoven, is among the most popular ever written, there has been surprisingly little serious research into the instruments for which it was composed. This book fills that gap. Based on evidence from primary source material, much of it previously undiscovered or neglected, Maunder traces the history and development of the various keyboard instruments available in Vienna throughout the eighteenth century--harpsichords, clavichords, and pianos--and their use by composers and performers.
