American Commercial Law Series: The law of partnerships Routledge

Excerpt from *Commercial Law Simplified*: Being a Simple and Concise Presentation of the Subject of Commercial Law, in Question and Answer Form IT IS the purpose of this book to present to business men and accountants the fundamental principles of commercial law in the simplest and most concise form. It is a book for business men and not for lawyers, and does not presuppose on the part of the reader any knowledge of the law or of legal terminology. The necessity for some knowledge of the law applicable to commercial transactions is now fully recognized by all who are engaged in business, whether as merchants, manufacturers, credit men, managers, account ants, salesmen or in any other capacity. Just as no physician is properly prepared for practice without a knowledge of medical jurisprudence, and just as no officer in the army or navy is adequately trained for his post without a knowl edge of international law, so is no one quite fully prepared for a successful business career without a knowledge of the fundamental principles of business law. The law schools of the country are filled with students who are preparing themselves for business careers rather than for the practice of the profession itself. It is for those who have not had this law school training. But who have felt the need of it, that this book is intended. Its publication is in no sense a criticism of a number of excellent and scholarly works already prepared upon the subject, but is in response to a demand for a treatment much simpler in form and style than has yet appeared. The question and answer form has been adopted as an aid to clearness and conciseness and as best indicating the form in which a legal problem comes to the mind of the average business man in his everydaytransactions, and many illustrative problems have been used to make clear the application of principles to certain kinds of transactions. Commercial Law, Selected Statutes, 2022-2023 Cambridge University Press

Arbitration and jurisdiction agreements are frequently used in transnational commercial contracts to reduce risk, gain efficacy and acquire certainty and predictability. Because of the similarities between these two types of procedural autonomy agreements, they are often treated in a similar way by courts and practitioners. This book offers a comprehensive study of the prerequisites, effectiveness, and enforcement of exclusive jurisdiction and arbitration agreements in international dispute resolution. It examines whether jurisdiction and arbitration clauses have identical effects in private international law and whether they have been or should be given the same treatment by most countries in the world. By comparing the treatment of these clauses in the US, China, UK and EU, Zheng Sophia Tang demonstrates how, in practice, exclusive jurisdiction and arbitration agreements are enforced. The book considers whether the Hague Convention on Choice of Court Agreements could be treated as a litigating counterpart to the New York Convention, and whether it could work successfully to facilitate judicial cooperation and party autonomy in international commerce. This book breaks new ground in combining updated materials in EU, US and UK law with unique resources on Chinese law and practice. It will be valuable for academics and practitioners working in the field of private international law and international arbitration.

India, a Union of 28 States and 7 territories, with a population of over a billion people and multiple cultures and languages, is a democratic republic often called, quite rightly, 'the largest democracy in the world'. Because the well-established English legal system endured after independence in 1947, India categorically remains a common law jurisdiction, and its legal practice and procedure is conducted almost exclusively in English. Nonetheless, Indian law is sufficiently complex in ways that are distinct from other European-based systems that a book such as this – in which the business legal system of India is thoroughly reviewed – will be really welcomed by both practitioners and academics. This book examines the full spectrum of India's legal system as it applies to commercial, customs, and tax matters, and covers among much else such elements as the following: division of executive and legislative powers between the Union and the individual States; role of the Supreme Court and State high courts; role of State legislative assemblies; levels of appeals in judiciary system; power of specialised State tribunals in, for example, tax, company law, bankruptcy; power of the State to appropriate property; constitutional protection of culture and environment; use and citation of foreign judgments and jurisprudence; contract law; trusts; industrial relations; minimum wage law; income tax rules and procedure; bilateral double taxation agreements; copyright and trademark protection; semiconductor integrated circuits layout design; protection of plant varieties and farmers' rights; competition law; multi-State cooperation agreements; and regulation of financial services. An extensive appendix supplies texts of the Constitution of India, the Indian Penal Code and 23 Legislative Acts pertaining to commercial, customs and tax matters. There is a sample franchise agreement, and an informative summary of current and projected foreign trade policy through 2014. Both as a guide to business lawyers working with Indian partners and as a comparative law treatment of the world's second most populous country (and a rapidly growing economic powerhouse), this book has no peers.

[The Bulletin of the Commercial Law League of America](#) Bloomsbury Publishing

This edited collection brings together leading scholars and practitioners from various jurisdictions with essays and commentaries co-ordinated around the theme of alignments and misalignments between commercial law and commercial practice. The purpose of the book is to prompt a more critical and constructive reassessment of current commercial law and its practices, and to instigate a more fruitful dialogue between academics, judges, law reformers and practitioners. The result is a series of provocative and challenging essays addressing an enormous range of problems that are of intimate concern to commercial practice. Some essays focus on broad themes, such as globalization and trust. Others address more specific issues, such as contract interpretation or constraining modern management. Yet another group targets special problems, such as dematerialisation or super-priority, in order to assess the success of commercial law in meeting commercial demands. The depth and breadth of issues addressed is a credit to the authors. Taken as a whole, the volume makes some pointed suggestions for improving the practices and processes, and indeed the future progress, of commercial law.
