**Risk Analysis for Islamic Banks** GRIN Verlag

This is an extremely valuable book written by three highly qualified scholars whose credentials for writing such a book are difficult to match. The timing of the book is also perfect, having come at a time when the worst financial crisis in living memory has intensified the quest for reform of the international architecture. The proposals made by the authors should go a long way in not only reforming the system but also in accelerating the move towards financial globalization and convergence of the

conventional and Islamic financial systems. Dr. Umer Chapra Prominent Scholar of Islamic Economics and currently Research Advisor Islamic Research and Training Institute (IRTI), Islamic Development Bank (IDB) Globalization and Islamic Finance, by three well-respected authors in Islamic finance, provides a thought-provoking analysis of an important and topical issue, particularly, given the global impact of the current financial and economic crises. The book is the first attempt to make a compelling case of convergence between globalization and Islamic finance. Askari, Iqbal and Mirakhor should be praised for this serious effort, which is a must-read for academics and practitioners interested in

Islamic finance. Professor Rifaat Ahmed Abdel Karim Secretary General Islamic Financial Services Board (IFSB) This book has a robust discussion of the growth and spread of Islamic finance within the umbrella of globalization. The book provides a unique view of Islamic finance, not only from the perspective of how Islamic finance fits within globalization in general, but globalization of finance in particular. This is a must read for anyone interested in the complex and complicated world of Islamic finance. Scheherazade S. Rehman, Ph.D. Director, European Union Research Center Professor of International Finance, School of Business The George Washington University I have not come across any literature that has delved

so intensely in financial globalization, in particular Islamic finance. Due to this reason, I would encourage all interested in this area to read this book. Hajah Salma Latiff Managing Director, Crescent Sdn. Bhd. Former Director, Centre for Islamic Banking, Finance and Management (CIBFM), Universiti Brunei Darussalam The recent crisis has evoked wide interest in Islamic finance publications. Globalization and Islamic Finance is both timely and needed. Sani Hamid Director, Wealth Management Financial Alliance (Singapore)

Emerald Group Publishing  
This study addresses derivatives instruments in Islamic finance. It highlights the benefits of these instruments, their legal aspects and the appropriate alternatives. The forward, futures and options contracts in commodity markets are discussed and the arguments in favour of

and against these instruments examined. The forward contracts issue includes the possibility of trading gold in forward basis, the forward market for currencies and the possible alternative to manage related risks. With the examination of futures contracts, the main arguments against such a contract are addressed, for example the sale prior to taking possession and the sale of debt hedging and speculation. The study proposes "khiyar al-shart" and "bay al-arbun" as tools of risk management and alternatives to options. The sale of pure rights is at the center of the admissibility of options in Islamic law and is investigated comprehensively.

#### *Ethical Dimensions of Islamic Finance*

Cambridge Scholars Publishing  
Theory and Practice of Modern Islamic Finance seeks to contribute to the existing body of work in the area of Islamic finance through examining the extent of divergence in practice of Islamic financing from the traditional Shari'ah in the Australian context. The author makes a discursive analysis of the regulation

of Islamic finance in Australia in terms of (a) the financing instruments used, (b) certainty of transactions between participants in the system, and (c) institutional risk management of Islamic financial institutions. The work's objectives are two-fold: (a) to analytically study the extent to which Islamic Financial Services Providers (IFSPs) of Australia differ from the traditional Shari'ah in their current practices of Islamic legal financial system by their use of different financial products and techniques, and (b) to create awareness and transparency about the various products and instruments used by IFSPs of Australia. REVIEWS "It is indeed a most comprehensive, methodologically sound, well organised, lucid, comprehensively documented and analysed, and convincingly argued and concluded research. It systemically addressed all the research questions raised and very convincingly and successfully resolved them to logical conclusions. The study can convincingly claim to have made a

breakthrough in the frontier of knowledge in the field of Islamic finance" Professor R. I. Molla, Multimedia University, Malaysia "Discussions of the topics throughout the book are logically coherent and presented in plain language. It is an insightful, well researched, logically organised and lucidly presented research work having overwhelming strengths and very limited weaknesses. I have no hesitation to say that this book may provide useful guidelines for dealing with the emerging issue of Islamic finance around the world.." Dr. S. M. Solaiman, The University of Wollongong, Australia "I have gone through for the most part of author s present work and found that it was excellent. I must congratulate him for preparing a research work of such standard. It was due to his extreme commitment, sense of professionalism, and perseverance." Professor A. B. Rafique Ahmad, Pro-VC, International Islamic University Chittagong, Bangladesh "I read this book on Islamic finance with lots of interest. It is one of the finest pieces of writing, in terms of content, eyes to detail,

referencing and scholarly analysis. It is often a challenge to simplify such a complex subject without losing the necessary details. There are very few Islamic books that introduce all jurisdictions. This book filled in this gap through making an unbiased objective reading. The book have covered very valid governance issues such as the conflict of interest of the regulators (Shari'ah Board), the products resembling conventional loans and the reluctance of sharing the full risk. While Islamic Institutions may shy away from the author, his talent will be highly sought in academia and research circles." Dr. Shahadat Chowdhury, School of Civil and Environmental Engineering, University of New South Wales, Sydney, Australia This book appears to be the only major research monograph on Islamic finance in Australia. The historical, rational and critical methodology of this book follows the scientific research methodology of the great twentieth century philosopher of science Karl Popper. The clarity and logical rigour resulting from this approach is one of the

major strengths of this work. Chapters 1-3 and 5 are of excellent quality and reflect Dr Ahmad's authoritative knowledge in the field of Islamic law. Chapters 6-11 reflect not only Dr Ahmad's expertise in Islamic financial law, evident in previous chapters but also his extensive practical experience in his advisory and consultancy work. The book raises many questions for future research, including, how to resolve the perceived divergence of financial practice from Islamic law and the development of a fully satisfi

 A detailed look at the fast-growing field of Islamic banking and finance The Art of Islamic Banking and Finance is a modern American take on what it means to incorporate Islamic finance principles into everyday banking and investment techniques by introducing a new brand of banking for all people of all faiths: The Riba-Free (RF) banking. The author is considered the father of RF (Islamic) banking in America. He has been a banker and an

Imam/scholar for over 40 years in America since 1968. He started the tedious process with a finance company, LARIBA, in Pasadena, California in 1987. This is the first book ever in the field to trace the origins of prohibiting the renting of money at a price called interest rate and over-indulging in debt. The book reviews in great details the theological foundations of prohibiting interest in the Jewish Bible, the Christian Bible, and the Qur'aan. The author then discusses money and how fiat money is created, the role of the Federal Reserve, and the banking system in America. The book also discusses for the first time ever how to include an important aspect of RF (Islamic) finance using commodity indexation and marking the items to be financed to market in order to avoid participating in economic "bubbles." The author discusses how these rules work, how they affect consumer behavior, and how they change the role of the banker/financier. Covers a new pioneering model that is based on the Law (Shari'aa) and how it is applied in every transaction from joint ventures and portfolio management to home

mortgages and personal financing Shows how to incorporate the Law (Shari'aa) into American financing and banking systems Points to RF (Islamic) finance and banking as a way to emphasize socially responsible investing The Art of Islamic Banking and Finance also includes a discussion on the emergence of a culture of RF (Islamic) banking and finance today, which is based on the real Judeo-Christian-Islamic spirit and very effective when compared to twentieth-century models that use financial engineering and structuring techniques to circumvent the Law (Shari'aa). The book also includes case studies based on the actual experience of the author and detailed analysis of the superior results realized by applying this new brand of banking to financing. Corporate Governance in Islamic Finance GRIN Verlag Indonesia is the most populous Muslim country in the world. Taking into account also its endowment and potential economic resources, the Islamic banking industry in Indonesia was expected to take on an important role in facilitating more

financial resources and to contribute to the internationalization of the Islamic mode of financing particularly in the Asia-Pacific region. However, the reality is far from the expectation. This book aims to clarify the causes and fundamental constraints leading to the extraordinarily low level of Indonesia's Islamic financial deepening. The authors draw on the traditions of Institutional Economics which are concerned with the rules or mechanisms of creating the 'incentive' and 'threat' for economic players because the rules (institutions) would matter as the determinant for economic development and economic efficiency. This book offers a fairly new analytical lens by hypothesizing that Islamic banks must earn additional profit- the authors coined as 'Islamic bank rent' - to maintain their franchise value as prudent Shari'ah-compliant lenders when compared to conventional banks. The authors argued that insufficient provision of the Islamic bank rent opportunity may have caused the Indonesia's Islamic banks the opportunity to learn and improve their skill and capacity for the credit

risk management. The book also offers evidence in support of implementing economic and affirmative policy necessary for incubating and developing the Islamic banking industry in Indonesia and making Indonesia an international Islamic financial hub in the Asia-Pacific region. This book will be a useful resource for policy makers and researchers interested in Islamic banking in Indonesia. The Art of RF (Riba-Free) Islamic Banking and Finance Routledge Islamic Banking and Finance (IBF) has become a growing force over the past three decades, with Pakistan being one of the IBF pioneers by converting to an 'interest-free' banking system in 1985. However, since independence in 1947, there has been continual tension over Pakistan's essential character, between Islamic Minimalists, who favour a Modernist interpretation of Islam, and those who favour an Islamic Maximalist interpretation that sees Pakistan as a model Islamic state. This book analyses the push to Islamize Pakistan and its financial system by Islamic revivalists, following the early 1947

debates in the original Constituent Assembly to the final 2002 ruling on IBF of the Shariat Appellate Bench of the Pakistan Supreme Court. It examines the practice and theory behind contemporary Islamic, "Shariah-compliant", banking. It offers extensive interviews with Pakistani Islamic bankers on the state of their industry and how they see it developing, and provides analysis on how the Islamic banks' customers differ from those of conventional ones. Presenting a critical analysis of Pakistan's IBF experience and offering a new insight into Pakistan's banking industry that illustrates broader political and social trends in the country, this book will be of interest to specialists on Islam, South Asia and International Economics. *Islamic Finance and the New Financial System* Universal-Publishers This book provides an introductory theoretical foundation of the ethics embedded in Islamic economics and finance, and it shows how this ethical framework could pave the way to economic and social justice. It demonstrates how Islamic finance—a risk-sharing

and asset-backed finance—has embedded universal values, ethical rules, and virtues, and how these qualities may be applied to a supposedly value-neutral social science to influence policy-making. This book argues that ethical and responsible finance, such as Islamic finance, could lead the efforts to achieve sustainable economic development. Iqbal and Mirakhor then conduct a comparative analysis of Islamic and conventional financial systems and present Islamic finance as an alternative that can address today's growing problems of inequality, social injustice, financial repression, unethical leadership, and lack of opportunity to share prosperity.

**Pakistan** John Wiley & Sons

Master's Thesis from the year 2010 in the subject Business economics - Investment and Finance, grade: Merit, University of Essex (Essex Business School), course: Finance and Investment, language: English, abstract: The dissertation explores the variables in relationship with returns in Islamic Banking. It also introduces the history and governance structure of

Islamic Banks in the countries within the study. The analysis is based on 49 banks across countries of varying economic stance from the years 2004 to 2008. Important evidence was found showing significant relationship between market concentration and returns in Islamic banks in most of the countries being studied. These findings are consistent with our expectations. Overall, our results suggest that there are highly significant relationships between returns, capital ratios, market concentration and money supply, which can all be used in assessing performance.

Islamic Banking Structure and Performance Springer  
This volume highlights a vital developmental stage of Islamic Banking and Finance, focusing on regulatory aspects, regional case studies and International Financial Crisis impacts. It aims to help decision makers identify key factors for the real, sustained development of the Islamic Banking System, nationally, regionally and internationally.

An Analysis of Islamic Banking Performance John Wiley & Sons

"The principal objective of

this intermediate book on Islamic finance is to address selected issues in the theory and practice of Islamic finance that typical fall beyond the contents of classic introductory text books on the subject matter. These topics are often discussed at very basic level. The list of special topics includes the stability of Islamic finance, the role of ethics, the scope of financial engineering and derivatives, the function of Islamic capital markets, as well as perspectives on Islamic structured finance, corporate finance, and financial inclusion. The book can serve as a guide to hitherto unexplored avenues of research in Islamic finance for graduate and post-graduate students. This book includes: - some reference to case studies and specific problems in the practice of Islamic finance as well as conventional finance - a list of suggested further readings per chapter - appendices that include details of advanced analysis for the purpose of simplifying the level of discussion for advanced undergraduate students - graphs, figures, tables on financial and economic data"--

*and Islamic Banking* Wiley

This paper analyzes the performance of Islamic banks compared to that of conventional banks in Pakistan. This comparison is based on the financial performance, product services and customer perception. We have selected two Islamic banks, namely Meezan Bank limited & Albaraka Bank, and two conventional Banks, Soneri and My Bank. This selection was made because of the similar size of these banks in terms of their deposits. The paper shows that Islamic Banking is falling behind the conventional one both in terms of its business as well as customer perspective. The research is divided into three parts. First part covers the comparison of financial analysis between Islamic and conventional banks in Pakistan over last five years. For financial analysis, sixteen ratios are selected and are grouped in five major groups namely: profitability; liquidity; business development; efficiency and solvency ratios. The hypothesis is generated to rank the financial health of each bank. The second part compares the products services of Islamic and

Conventional banks. This product service comparison is done on the basis of deposits, financing and services. For this deposits and certificates accounts are compared in terms of return or profit they are offering to their customers. Financing part measures the differences of car and home financing between Islamic and conventional banks. Last section of this part measures the difference of services that are provided by the respective banks to their customers. The final part of this research identifies the customer perception about Islamic and conventional banks. For this, a survey analysis is conducted from different customers of both Islamic and conventional banks. In this survey analysis, the rationale is to identify which banking system is preferred by customers. It is concluded that customers prefer Islamic banks rather than conventional banks.

Risk Analysis for Islamic Banks International Monetary Fund

Objective - This research aims to analyse the efficiency of Islamic banking in Indonesia and Malaysia based on the maqashid syariah

approach. Methodology/Technique - This research uses individual education, creation of justice, and achievement of welfare to measure the efficiency variable. The research period covers the period from 2011 to 2015, using data envelope analysis (DEA). Findings - The result show that there are three (3) Islamic banks that achieve maximum efficiency in Malaysia. These are: Affin Islamic Bank Berhad, which achieved maximum efficiency in terms of distribution and profitability output, CIMB Islamic Bank, which achieved maximum efficiency in terms of distribution output, and RHB Islamic Bank Berhad, which achieved maximum efficiency in terms of distribution output. Meanwhile, two (2) Islamic banks which were considered to be efficient, although not at the maximum level. Novelty - This study shows that Bank Panin Syariah achieves maximum efficiency with respect to distribution output, and that Bank Mega Syariah is considered efficient with respect to profitability output and personal revenue output.

*Islamic Banking and Financial Crisis* World

Scientific

This handbook offers a unique and original collection of analytical studies in Islamic economics and finance, and constitutes a humble addition to the literature on new economic thinking and global finance. The growing risks stemming from higher debt, slower growth, and limited room for policy maneuver raise concerns about the ability and propensity of modern economies to find effective solutions to chronic problems. It is important to understand the structural roots of inherent imbalance, persistence-in-error patterns, policy and governance failures, as well as moral and ethical failures. Admittedly, finance and economics have their own failures, with abstract theory bearing little relation with the real economy, uncertainties and vicissitudes of economic life. Economic research has certainly become more empirical despite, or perhaps because of, the lack of guidance from theory. The analytics of Islamic economics and finance may not differ from standard frameworks, methods, and techniques used in conventional economics,

but may offer new perspectives on the making of financial crises, nature of credit cycles, roots of financial system instability, and determinants of income disparities. The focus is placed on the logical coherence of Islamic economics and finance, properties of Islamic capital markets, workings of Islamic banking, pricing of Islamic financial instruments, and limits of debt financing, fiscal stimulus and conventional monetary policies, inter alia. Readers with investment, regulatory, and academic interests will find the body of analytical evidence to span many areas of economic inquiry, refuting thereby the false argument that given its religious tenets, Islamic economics is intrinsically narrative, descriptive and not amenable to testable implications. Thus, the handbook may contribute toward a redefinition of a dismal science in search for an elusive balance between rationality, ethics and morality, and toward a remodeling of economies based on risk sharing and prosperity for all humanity

**Handbook of Analytical Studies in Islamic Finance and Economics**

Risk Analysis for Islamic Banks  
 Doctoral Thesis / Dissertation from the year 2014 in the subject Economics - Finance, grade: Successful Defense, Mendel University (Economics), course: International Management, language: English, abstract: This work analyzes whether in recent years Islamic financial developments apply globally, for example to Germany. The author is interested in the reality of Islamic finance and its potential existence in non-Muslim environments. In much of the extant literature, studies consider a theoretical model such as: "The stability of Islamic finance". The authors in these studies tend to focus on global Islamic banks. In the present study, the Author wants to examine the situation for a specific non-Muslim country like Germany. The second focus is to find out whether there is a relationship between the number of Muslims in Germany and the need for Islamic financial products. A detailed view of market entry and critical key indicators are analysed. The current laws and their handling by Islamic banks will additionally be

examined. To complete this research, a comparison with a country with more real market experiences in the field of Islamic finance, such as Turkey, will be undertaken. Are there certain Islamic, Jewish, Christian Practices and Aims for Business? With this background, starting from the year 2000, the author observed and investigated economics sources. Here, the concrete issue of Islamic finance became more and more compelling. The development of Islamic finance in recent decades is characterized by increasing, worldwide market share. With the most recent crisis of 2008, Islamic finance strengthened its global attention. This was due to profit increases throughout the period of crisis.

Islamic Banking John Wiley & Sons

Deep, insightful analysis of controversial risk management issues in Islamic banking Mapping the Risks And Risk Management Practices In Islamic Banking is a comprehensive analysis of the current state of risk management practices within the Islamic banking industry, with recommendations for

policy makers, bankers, and industry stakeholders. Going beyond the academic, this book presents the opinions and perceptions of industry financiers and bankers, alongside primary information and data collected by Islamic finance professionals to deconstruct and analyze the sector's current risk management practices. You'll get up to date on the latest attitudes and trends, and delve into the current issues surrounding risk management in Islamic banks. With a focus on practical applications, this authoritative guide discusses the unique risks facing Islamic banks, from the perspective of a wide range of practitioners. Risk management is one of the biggest, most controversial issues in Islamic finance, yet it remains under-researched. Many uncertainties exist for which the answers are still unclear, yet will play a large role in shaping the industry's future. This book digs deep into current ideas and practices to discover what's being done, what needs to be done, and what needs to stop happening to keep the future of Islamic finance

strong. Explore both Islamic and traditional attitudes toward risk. Examine current Islamic risk management practices. Understand the latest industry issues and trends. Consider the diverse range of risks unique to the Islamic banking sector. Effective risk management in Islamic banking deserves priority attention. Unless the industry develops its own genuine risk management architecture, it cannot achieve its full potential and the viability needed for a more resilient financial system than the debunked Wall Street model. Mapping the Risks and Risk Management Practices in Islamic Banking provides a deep, authoritative analysis of where the industry is today and where it needs to develop.

**The Developing Role of Islamic Banking and Finance** John Wiley & Sons

Islamic finance is emerging as a rapidly growing part of the financial sector in the Islamic world and is not restricted to Islamic countries, but is spreading wherever there is a sizable Muslim community. According to some estimates, more

than 250 financial institutions in over 45 countries practice some form of Islamic finance, and the industry has been growing at a rate of more than 15 percent annually for the past several years. The market's current annual turnover is estimated to be \$70 billion, compared with a mere \$5 billion in 1985, and is projected to hit the \$100 billion mark by the turn of the century. Since the emergence of Islamic banks in the early 1970s, considerable research has been conducted, mainly focusing on the viability, design and operations of a deposit-accepting financial institution, which operates primarily on the basis of profit and loss partnerships rather than interest. This publication provides a comprehensive overview of topics related to the assessment, analysis, and management of various types of risks in the field of Islamic banking. It is an attempt to provide a high-level framework (aimed at non-specialist executives) attuned to the current realities of changing economies and Islamic financial markets. This approach emphasizes the accountability of key players in the corporate governance process in

relation to the management of different dimensions of Islamic financial risk.

*The Islamic Finance* John Wiley & Sons

A comprehensive overview of key developments in Islamic banking In Islamic Banking in Indonesia, renowned economist Dr. Rifki Ismal explores current issues in Islamic banking and financial products with a particular focus on the danger of liquidity risk in Indonesia. It approaches liquidity risk from the conventional perspective of international banking standards, as well as from the Islamic banking perspective. Dr. Ismal also covers the issues of asset-liability balancing, liquidity risk index, organizational structures for managing liquidity, industrial analysis, withdrawal risk, bankruptcy risk, moral hazard risk, and market risk. Compiling all the latest academic research on liquidity risk and other risks in Islamic banking, the book provides a theoretical foundation for managing risk that will be highly useful for researchers on Islamic banking and practitioners and academics. Written by a renowned expert on

Islamic banking who works on monetary policy at the central bank of Indonesia Covers the latest developments in Islamic banking, particularly liquidity risk, for a rapidly expanding market Ideal for European and American readers, in addition to Asian readers, who need a fuller understanding of Islamic banking institutions, markets, and products With the latest academic research and the expertise of a leading practitioner in Islamic banking, this book offers in-depth coverage of the most pressing issues in the field.

**An Empirical Analysis of Islamic Banking Division Profitability Performance** BRILL

Purpose - The purpose of this paper is to provide an exploratory analysis Islamic finance products for housing finance in the UK market and make a comparative study of all available products in the market in order for drawing out the best product presented. To this end, the study examines the key Shari'ah compliant products offered by different Islamic financial service providers for home financing in the UK and finds as to which product

offers the best value for money among its competitors.

Design/methodology/approach - The study reviews the various methods available and attempts to justify their use for both parts of the study, part 1 of which deals with the methods used for the review of the key principles of Islamic banking and the surrounding subject area, while the other part discusses the variables and approaches used for the cross-product analysis. The research method adopted is qualitative in nature using first and secondary data. The research of first part of the study is qualitative and is conducted through a literature review. The second part of the study involved collecting primary data with regards to the Islamic housing finance market in the UK. Findings - The research finds that if a prospective applicant for an Islamic housing finance does not have sufficient savings for a high deposit and accepts the Shari'ah compliance products of Islamic home financing providers in the UK, then the Ahli United Manzil Home purchase programme is the most suitable and competitive;

although highest application fees incur. Otherwise the applicant will have to wait until the Shari'ah compliance products have been thoroughly established. Practical implications - The study recommends that an independent Shari'ah advisory Board be set up in order to confirm and analyse the Shari'ah issues pertaining to Islamic home financing, in an objective manner. Originality/value - The paper provides (so far as the authors are aware) the first cross-product analysis of the products offered by Islamic housing finance providers in the UK with the aim of showing the best home financing mode in terms of cost and also the product that complies most with the Shari'ah.

Globalization and Islamic Finance Routledge Case Studies in Islamic Banking and Finance is a pioneering resource that provides practical insights into the real world of Islamic financial transactions, and illustrates the complexities of this rapidly growing mode of modern finance. Based around 12 individual cases, the book stimulates discussion and develops the reader's understanding of Islamic finance by contrasting the theoretical concepts discussed in the author's companion text Introduction to Islamic Banking and Finance with practical real world situations. The cases cover core Islamic banking and finance topics including the Ijara, Mudaraba and Musharaka

contracts; Islamic mortgages for home finance; leverage; and issues involved in opening an Islamic bank. Financial statement analysis for Islamic banks, the implications for fund management for equity investing and the impact of loan defaults on Islamic and conventional banks are also included. Each chapter concludes with a set of questions designed to test the reader's understanding of each case, with suggested solutions at the end of the book. This book is a must have resource for those wishing to apply their understanding of this complex subject and is an essential read for anyone seeking practical examples of how to apply the concepts in a real world environment.
