Comer and Gould's Psychology Around Us demonstrates the many-often surprising, always fascinating-intersections of psychology with students' day-to-day lives. Every chapter includes sections on human development, brain function, individual differences and abnormal psychology that occur in that area. These "cut-across" sections highlight how the different fields of psychology are connected to each other and how they connect to everyday life. Every chapter begins with a vignette that shows the power of psychology in understanding a whole range of human behavior. This theme is reinforced throughout the chapter in boxed readings and margin notes that celebrate the extraordinary processes that make the everyday possible and make psychology both meaningful and relevant. The text presents psychology as a unified field the understanding of which flows from connecting its multiple subfields and reinforces the fact that psychology is a science with all that this implies (research methodology, cutting edge studies, the application of critical thinking).

In this new addition to the Pattern Magic series from Japan,

Tomoko Nakamichi teaches you how to sculpt with fabric, creating beautiful shapes, waves and accents. Next, she looks at creating dynamic movement in garments, using ruffles, shirring and precise, sharply pleated lines. All the measurements and scaling information you need to start pattern making is included. As throughout the series, all the patterns are based on a basic block, supplied in the book. Thorough step-by-step instructions and diagrams will ensure that your own patterns translate beautifully to your choice of garment, while photographs of the finished garments will inspire you to create your own designs.
