Catalog of Technical Reports

The first plain-paper office copier -- which was introduced in 1960 and has been called the most successful product ever marketed in America -- is unusual among major high-technology inventions in that its central process was conceived by a single person. David Owen's fascinating narrative

tells the story of the machine nobody thought we needed but now we can't live without. Chester Carlson grew up in unspeakable poverty, worked his way through junior college and the California Institute of Technology, and made his discovery in solitude in the depths of the Great Depression. He offered his big idea to two dozen major corporations -- among them IBM, RCA, and General Electric -- all of which turned him down. So persistent was this failure of capitalist vision that by the time the Xerox 914 was manufactured by an obscure photographic-supply company in Rochester, New York, Carlson's original patent had expired. Xerography

was so unusual and nonintuitive that it conceivably could have been overlooked entirely. Scientists who visited the drafty warehouses where the first machines were built sometimes doubted that Carlson's invention was even theoretically feasible. Drawing on interviews, Xerox company archives, and the private papers of the Carlson family, David Owen has woven together a fascinating and instructive story about persistence, courage, and technological innovation -- a story that has never before been fully told. Copies in Seconds

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Pocket PC Development in the Enterprise

The books in this bite-sized new series contain no complicated techniques or tricky materials, making

them ideal for the busy, the time-pressured or the merely curious. In just 96 pages, *Improve your Verbal Reasoning* helps you to practice all sorts of advanced verbal reasoning tests and build your confidence in advance of attending that job interview, assessment centre or bid for promotion.

The Asian Ways

Due to the dramatic shifts in the knowledge economy, this book provides a significant departure from traditional strategic management concepts and practice. Designed for both advanced students and business managers, it presents a unique combination of new strategic management theory, carefully selected strategic management

articles by prominent scholars such as Gary Hamel, Michael Porter, Peter Senge, and real-world case studies. On top of this, the authors link powerful new benchmarks in strategic management thinking, including the concepts of Socio-Cultural Network Dynamics, Systemic Scorecards, and Customer Knowledge Management with practical business challenges and solutions of blue-chip companies with a superior performance (Lafite-Rothschild, Who's Who, Holcim, BRL Hardy, Kuoni BTI, Deutsche Bank, Unisys, Novartis).
