"Learn how to make
over seventy
macramê knots and
small repeat patterns,
then use them to
create a wide range of
projects. Each knot is
shown in a close-up
photograph with clear
step-by-step diagrams
showing how they are
tied. Starting with the
basics, the knots
progress on to more
complicated and
complex designs, but
as all are clearly
diagramed it is very
easy to follow along.
This invaluable
guidebook opens with
a discussion of the
different types of
threads or cords
available, shows a
range of clasps and
other findings, plus

covers the types of
beads to use. It also
includes lots of tips
and useful information
like how to set up your
work board, and other
helpful lessons like
how to keep track of
the cord ends for less
confusion. The thirty-
three projects range
from simple jewelry
pieces like the classic
friendship bracelet and
watch straps to more
complex ones like a
variety of bags and
baskets. Translated
from the Japanese,
Macramê pattern
book is an outstanding
resource for both new
and more experienced
"knotters."--

Komputer adalah alat
yang dipakai untuk
mengolah data
menurut prosedur yang
telah dirumuskan. Kata
computer semula

dipergunakan untuk menggambarkan orang yang perkerjaannya melakukan perhitungan aritmatika, dengan atau tanpa alat bantu, tetapi arti kata ini kemudian dipindahkan kepada mesin itu sendiri. Charles Babbage mendesain salah satu mesin hitung pertama yang disebut mesin analitikal. Selain itu, berbagai alat mesin sederhana seperti slide rule juga sudah dapat dikatakan sebagai komputer. Fungsi dari komputer secara prinsip sebenarnya cukup sederhana. Komputer mencapai perintah dan data dari memorinya. Perintah dilakukan, hasil disimpan, dan perintah berikutnya dicapai. "Programmer Baik memperkembangkan

set-set perintah untuk melakukan tugas biasa (misalnya, menggambar titik di layar) dan lalu membuat set-set perintah itu tersedia kepada programmer lain." Dewasa ini, kebanyakan komputer kelihatannya melakukan beberapa program sekaligus. Dalam bidang pendidikan, ilmuwan di berbagai bidang mulai memakai komputer untuk analisis mereka sendiri. Di awal 1970 mainframe mulai memiliki interface yang interaktif dan memudahkan pengguna. Di masa ini pula pengguna mainframe tetap dapat melakukan akses pada saat proses akhir hari berjalan. Ketika komputer mikro pertama kali muncul ke pasaran, komputer

jenis ini dianggap sebagai perangkat yang hanya digunakan oleh satu orang saja, yang mampu menangani informasi yang berukuran 4-bit, 8-bit, atau 16-bit (dibandingkan dengan minicomputer atau mainframe yang mampu menangani informasi lebih dari 32-bit) pada satu waktunya. komputer mikro yang baru mampu menangani informasi 32-bit, atau 64-bit dalam satu waktunya, sama seperti halnya mainframe atau minicomputer. Selain itu, komputer mikro juga sekarang telah mendukung banyak pengguna dalam satu waktunya. komputer mikro didesain untuk digunakan di dalam rumah, sekolah, atau perkantoran.

Permintaan terhadap kit komputer mikro pun secara cepat dan tidak disangkalnya, sangat banyak. Banyak perusahaan-perusahaan pemula akhirnya turut terjun ke dalam pengembangan komputer mikro, hingga ada sebuah firma yang cukup besar. IBM menggunakan sebuah keyboard buatan IBM sendiri dengan jumlah tombol 83- buah. Dan dengan dirilisnya IBM PC, IBM PC pun menjadi standar de facto dalam industri komputer mikro dan selanjutnya menguasai pasar sistem operasi komputer mikro. Komputer untuk mempermudah pekerjaan atau hanya untuk bermain game, musik dan hiburan lainnya. Banyak

sejarah dan pengetahuan tentang komputer khususnya, yang ditulis dalam buku ini. Mulai dari sejarah pembuatan komputer sampai jaman sekarang yang merupakan jaman informasi. Buku ini disajikan kepada umum yang ingin mengenal jauh tentang Komputer. Sekilas banyak isi buku tentang para tokoh pembuat hingga perusahaan yang bergerak dalam bidang komputer khususnya. Disesuaikan dengan keadaan jaman dulu sampai jaman sekarang yang disajikan dengan mudah dalam membaca, karena disesuaikan dengan gambar yang mempermudah dalam pembacaan yang sederhana. Semoga

bermanfaat bagi yang membaca.
