Design ManualThe
purpose of this manual is
to provide clear and
helpful information for
maintaining gravel roads.
Very little technical help is
available to small
agencies that are
responsible for managing

these roads. Gravel road
maintenance has
traditionally been "more
of an art than a science"
and very few formal
standards exist. This
manual contains
guidelines to help answer
the questions that arise
concerning gravel road
maintenance such as:
What is enough surface
crown? What is too much?
What causes corrugation?
The information is as
nontechnical as possible
without sacrificing clear
guidelines and
instructions on how to do
the job right.Indicators of

Quality in Maintenance
 This synthesis will be of interest to maintenance managers, maintenance engineers, and others concerned with the development of quality indicators for maintenance management. Detailed information is presented on the formulation and use of these quality indicators. Indicators of quality are an integral part of any maintenance management system. This report of the Transportation Research Board describes and

discusses the use of quality standards to assess the effectiveness of highway maintenance activities. It examines the use of these standards in the context of traditional management techniques and maintenance management systems. The trade-offs between quality and quantity standards are also considered.
