THOROUGH REVIEW OF  
A REPORT ON MAJOR  
HAZARDS Thorough  
Reviews The Offshore  
Installations The  
purpose of a thorough  
review is to provide  
duty holders, the  
workforce and the  
competent authority  
with a level of  
confidence that the  
current safety case,  
which exists for the  
lifetime of the  
installation, continues  
to be fundamentally  
sound. The Offshore  
Thorough Review  
Process And  
Summaries ...thorough  
reviews. It discusses  
the thorough review  
process and how this is  
related to the effective  
control of hazards on  
ageing installations,

covering fire and  
explosion, structural  
integrity,  
organisational and  
other ageing issues.  
The safety  
management system  
(SMS) of the  
installation needs to  
address Offshore Info  
sheet 4/2009 Guidance  
on management of  
...managed for offshore  
installations, and  
provides information  
on the conducting of  
Thorough Reviews of  
the top-sides integrity,  
including: . fire and gas  
detection systems; .  
corrosion of process  
vessels and pipework; .  
active protection system  
including Halon replace  
ments; .  
passive fire protection (P  
FP) and its monitoring sys  
tems; . riser ESDVs;  
and Managing fire and  
explosion hazards on  
offshore ageing ...The  
objectives for the

Thorough Reviews of an offshore installation Safety Case are: confirm that the current Safety Case is still adequate and likely to remain so until the next Thorough Review compare the case against current standards, HSE guidance and industry practice for new installations evaluate any deficiencies,...Thorough Reviews - RMRI Consulting and owners of offshore oil and gas installations to submit safety cases to HSE for acceptance as a condition of operating in UK waters. 2. After 10 years in operation it is legitimate to review the purpose and effectiveness of the OSCR. They have already been subject to independent evaluation. An interim

evaluation of EXPLANATORY MEMORANDUM TO THE THE OFFSHORE INSTALLATIONS ...There are many more offshore installations in the UK sector than in the Norwegian sector that will need to be decommissioned in the near future. Table 4.3 shows UK projections up to 2020. Table 4.3 Planned numbers of installations to be closed down on the UK continental shelf, 2010-20, according to Kristing, 2008 (2). Decommissioning of offshore installations 2010 The UK Offshore Safety Directive Regulator (OSDR) has developed a Competent Authority (CA) Portal, which will be available from 1 October 2017. Any OSDR submission relating to Oil Pollution

Emergency Plans (OPEP), Safety Cases (including Material Changes) or Thorough Reviews made after 1 October 2017 will have to be submitted through the CA Portal. New Portal for the UK Offshore Safety Directive Regulator ...for their offshore installation complies with the additional requirements of the 2015 regulations. Compliance with the regulations requires a 5 yearly thorough review of safety cases, including the safety assessments which form part of the justification for continued operation, and updating the safety case in accordance with the changes. Offshore safety cases and safety assessments "well operation" has the

meaning given in the Offshore Installations (Offshore Safety Directive) (Safety Case etc.) Regulations 2015; and. "well operator" in relation to a well or proposed well means a person appointed in accordance with regulation 5 or 6 to conduct the planning or execution of well operations. The Offshore Petroleum Licensing (Offshore Safety ...Existing installations can rely on the transitional provisions. For existing non-production installations the updated Safety Case must be approved by 19 July 2016 or the date of the next thorough review whichever is earlier. Existing production installations undertaking well operations are also

required to meet this deadline. EU Offshore Directive Update - Key Points For The New ...Offshore installations operating in Greek Waters can only operate under an accepted RoMH under N. 4409/2016 (hereafter termed The Law). A RoMH must be subject to a thorough review at least every 5 years. Additionally, under Articles 12 and 13 of The Law, HHRM can direct an Operator/Owner to THOROUGH REVIEW OF A REPORT ON MAJOR HAZARD Vessel Selection and Suitable Studies - We are able to perform a thorough assessment of vessels capabilities to execute offshore construction works or operations considering the requirements outlined by the client (e.g. deck

layout assessments, lifting capabilities, environmental conditions). Development... Theta Services have vast experience within the renewable ... Operators and owners of offshore oil and gas installations shall notify HHRM about the event, without delay, by telephone or by e-mail. The information provided should be unambiguous and consist of all factual information and data available at the time of notification. HHRM SA | Offshore Safety Offshore Oil and Gas is a unique industry where Operators and a wide range of supporting personnel, from catering staff to technical specialists, work and live for extensive periods of
