In recent decades, there has been an increase in family fragmentation between the young and old. Social scientists believe that, for members of both age groups, ideal and appropriate psychosocial development requires intergenerational connections - thus, the concept of an "intergenerational program" has appeared. This new book on intergenerational programs describes the relationship between intergenerational practice and theory by combining details about current programs with developmental and societal information that ground the field. Presenting the components of intergenerational programs that impact the field's history, current status, and future, the book introduces the basic theoretical information that undergirds the need for an appropriateness of this human service initiative. This book will be of interest to students, academics, and professionals in a variety of social and human service areas: gerontology, psychology, early childhood, mental health and family counseling, education, social work, and intergenerational studies.

*Long-Term Care: Managing Across the Continuum, Fourth Edition* is an ideal introduction to management in this industry. Adopted as a reference for the national licensing examination prepared by the National Association of Long-Term Care Administrator Boards (NAB), this book covers the full continuum of long-term care. The Fourth Edition is a

thorough update that offers a new chapter on the Affordable Care Act (Obamacare), with a particular focus on its impact on long-term care. All other chapters have been updated with the latest changes in regulations, financing methods, forms of service delivery and management methods in this dynamic field. The chapter on Leadership and Culture Change has been separated into two distinct chapters: Leadership in Long-Term Care and Culture Change in Long-Term - each with expanded information.

**Resources in Education** CRC Press  
Intended for long-term care providers, consumers, and gerontology students, this valuable new guidebook and manual encourages the promotion and enhancement of adult day care as an essential link in long-term care. Since the early 1970s, the number of adult day care centers in the United States has grown from 20 to more than 620. This rapid increase in adult day care programs indicates that it is an important health care and social resource that has begun to fill a necessary gap in the long-term care system. To further meet the increasing needs, this new book provides information regarding the history, definition, and concept of adult day care; models of care; scope of activities; state and national policy; and samples of forms and reports needed for daily operations.

SAGE Publications

A one-of-a-kind guide to active, engaging learning strategies for aging studies. Harnessing the proven benefits of active learning strategies, this is the first activity book created for a broad spectrum of courses in aging-related higher education. It features 32 classroom and community-based educational activities for instructors seeking to introduce and/or enhance aging content in their courses. Underscoring the interdisciplinary nature of aging studies, the book encompasses teaching strategies for instructors in such disciplines as Counseling, Family Studies, Gerontology, Geriatrics, Medicine, Psychology, Public Administration, Public Health, Nursing, Social Work, Sociology, Speech Pathology,

and others. This peer-reviewed collection of hands-on activities is designed by noted educators in aging and incorporates AGHE competencies. It offers clear, step-by-step procedures for implementing each activity including preparation, introduction, the activity itself, discussion/reflection, wrap-up, and assessment. The book also addresses learning outcomes and includes recommendations for number of participants, settings, materials, and time required. Encompassing key, impactful issues affecting older individuals, the text examines Ageism and Aging in the Media, Dementia, Demography, Health Care, Housing, Physical Aging, Policy and Politics of Aging, Positive Interactions with Older Adults, and Spirituality. In addition to its value to students, the book's activities are also beneficial to professionals instructing or participating in staff trainings, inservices, and continuing education. Key Features: Contains 32 experiential learning activities for students in a great variety of aging-related disciplines. Designed for activities in the classroom, in the community, on line, and take-home. Provides clear, step-by-step procedures for each activity from implementation through assessment. Addresses student learning outcomes and includes a glossary. Incorporates AGHE competencies. *ACTIVITY PROGRAM GUIDE for ASSISTED LIVING, MEMORY CARE HOMES and ADULT DAY PROGRAMS* Springer Publishing Company  
Elders can struggle with issues of social isolation and self-esteem, and benefit from having positive coping skills at their disposal. The practical ideas Kathie Erwin imparts in this second edition help mental health professionals working with elderly populations to create an interactive, multi-modal program that addresses the issues and needs elders have. The group modalities are defined in holistic contexts of mind, body, society, and spirituality. Among the group modalities are

reminiscence, bibliotherapy, remotivation, humor, expressive art, and therapeutic writing and sacred spaces, which are new to this edition. Mental health professionals appreciate the practical and detailed guidelines for how to design, implement, and monitor progress for various types of group modalities that allow them to put theory into practice easily. Their elder clients will benefit from the methods they develop in group to deal with problems such as isolation and reduced social networks.

The fast paced world of human resources (HR) management, development, and utilization requires HR professionals to fill many roles and speak many "languages." The Human Resources Glossary answers the demand for a single authoritative source that compiles and explains the vocabulary of HR practitioners. This glossary defines HR terms and explains the *Health Promotion and Aging* Infobase Publishing

As societies are experiencing increasing levels of immigration from contexts outside of the Western, industrialized world, child care programs are experiencing, simultaneously, increasing diversity in enrollment. A question that has been raised by early childhood advocates and practitioners is whether the former articulations regarding definitions of quality, models of relationships, and peer relations in the child care context are accurate and relevant within the increasing racial, linguistic, and ethnic diversity of the United States. The *Culture of Child Care* provides a much-needed integration of research pertaining to crucial aspects of early childhood development-- attachment in non-familial contexts, peer relations among ethnically and linguistically diverse children, and the developmental importance of child care contexts during early childhood. This volume highlights the interconnections between these three distinct bodies of research and crosses disciplinary boundaries by linking psychological and educational theories to the improvement of young children's development and experiences within child care. The importance of cultural diversity in early childhood is widely acknowledged and discussed, but up until now, there has been little substantive work with a cultural focus on today's educational and early child care settings. This innovative volume will be a unique resource for a wide range

of early childhood professionals including basic and applied developmental researchers, early childhood educators and advocates, and policymakers.

*Certificate in Child Care and Education* Infobase Publishing

Abstract: A selected listing of 93 nutrition education resources is provided to aid child care center staff and family day care home providers in initiating or maintaining a nutrition education program for children of ages 2-5. The materials in this guide are organized into 5 sections according to either intended audience of instruction or to type of material. The 5 sections comprise: nutrition education programs (materials directed towards child and adult audiences for providing a complete child care nutrition education program); aids for teaching care-givers (materials directed towards child care providers and parents); lesson plans for teaching children; food and nutrition activities for teaching children; and audiovisuals for teaching children and care givers Each section includes an introduction providing additional information on the types of materials included. Each resource citation includes information on the type of material, source availability, cost, an abstract, and an appraisal. (wz).

*Aging Intergenerational Programs* Past, Present, and Future

*Certificate in Child Care and Education* is clearly written and covers all the underpinning knowledge needed to study for the examination in the CACHE *Certificate in Child Care and Education*.

**Research in Education** Routledge Support the very best health, well-being, and quality of life for older adults! Here's the ideal resource for rehabilitation professionals who are working with or preparing to work with older adults! You'll find descriptions of the normal aging process, discussions of how health and social factors can impede your clients' ability to participate in regular activities, and step-by-step guidance on how to develop strategies for maximizing their well-being.

**Child Care Handbook** Springer Publishing Company

*Activity Guide Book for Seniors* was developed and compiled by experienced Recreational Therapists to facilitate the development of effective and vibrant activity programs for residents in long-term care communities and adult day programs. The suggestions, ideas, and examples provided in this book are used in communities nationwide and are designed to assist providers in meeting State regulatory requirements for activity programs. Included in this book are

activities for adult day programs, tips for assessing and addressing resident interests, conducting group and individual activities, holding resident council meetings, and facilitating family involvement and vibrant volunteer programs. The book also has additional activity programs that facilitate continued engagement and provide meaning to residents, hands-on approach to enhancing memory, improving physical health, sparking creativity, promoting social interaction, and ensuring the overall well-being of dementia residents.

This book provides an understanding of television research from both the quantitative and qualitative perspectives. It systematically analyzes the various research paradigms used in the study of television, and focuses on the integration of quantitative and qualitative methodologies as a means for understanding the complexities associated with this medium. The information is presented in a straightforward and engaging style, and concrete step-by-step examples of how to conduct major research and evaluation projects are provided.

Education, Nursing, Organization F.A. Davis

Abstract: A bibliography of resources for educating and training teachers, school foodservice personnel, and students in nutritional principles covers nutrition education materials developed in the US Nutrition Education and Training (NET) Program as well as citations to literature about the program. A total of 445 citations

are grouped according to 17 audience levels (e.g., primary grades (K-3); postsecondary education; foodservice training; adult education), with each citation containing an informative, nonevaluative abstract, a format description, and a Food and Nutrition Information Center (FNIC) number. A listing of names and addresses of regional and state NET coordinators and title, language, and state indices are appended. (wz). *Group Techniques for Aging Adults* Oxford University Press

This handbook is the outgrowth of five years of intensive day care study. As a result, it is the story of one public school district's belief in and commitment to establishing a day care center for its children.

As the U.S. population ages, healthcare is shifting from acute care environments to post-acute and community settings. New nurses in particular lack the specialized knowledge required for chronic care and gerontological care and are often

unprepared to transition into post-acute settings. *Developing a Residency in Post-Acute Care* offers practical curricula based on an innovative and successful nurse residency model that positions staff educators and preceptors to support new nurses as they enter post-acute settings. This indispensable book also provides tools and resources for nurse educators to use in developing and training new and existing staff, including:

- Lesson plans, objectives, and outlines
- Detailed case studies
- Activities geared toward adult learners
- Participant evaluation methods
- Strategies for presenting material
- References and additional resources

The application model provided in *Developing a Residency in Post-Acute Care* is fully adaptable for multiple post-acute settings. This resource enables instructors to enhance competence and confidence in new nurses—not simply re-teach materials learned in school. In the end, better onboarding can lead to significant improvements in cost, quality of care, and nurse retention rates.
