What is the mission of American public education? As a nation, are we still committed to educating students to be both workers and citizens, as we have long proclaimed, or have we lost sight of the second goal of encouraging students to be contributing members of a democratic society? In this enlightening book, John Puckett and Michael Johaneck describe one of America's most notable experiments in "community education." In the process, they offer a richly contextualized history of twentieth-century efforts to educate students as community-minded citizens. Although student test scores now serve to measure schools' achievements, the authors argue compellingly that the democratic goals of citizen-centered

community schools can be reconciled with the academic performance demands of contemporary school reform movements. Using the twenty-year history of community-centered schooling at Benjamin Franklin High School in East Harlem as a case study-and reminding us of the pioneering vision of its founder, Leonard Covello-they suggest new approaches for educating today's students to be better "public citizens." *Building Traditions That Breathe Life Into Your Home* Trafford Publishing

In this remarkable work, Rae Katherine Eighmey presents Franklin's delight and experimentation with food throughout his life. At age sixteen, he began dabbling in vegetarianism. In his early twenties, citing the health benefits of water over alcohol, he convinced his printing-press colleagues to abandon their traditional breakfast of beer and bread for "water gruel," a kind of tasty porridge he enjoyed. Franklin is known for his scientific discoveries, including electricity and the lightning rod, and his curiosity and logical mind extended to the kitchen. He even conducted an electrical experiment to try to cook a turkey and installed a state-of-the-art oven for his beloved wife Deborah. Later in life, on his diplomatic missions--he lived fifteen years in England and nine in France--Franklin ate like a local. Eighmey discovers the meals served at his London home-away-from-home and analyzes his account books from Passy, France, for insights to his farm-to-fork diet there. Yet he also longed for American foods; Deborah, sent over favorites including cranberries, which amazed his London kitchen staff. He saw food as key to understanding the developing culture of the United States, penning essays presenting maize as the

defining grain of America. Stirring the Pot with Benjamin Franklin conveys all of Franklin's culinary adventures, demonstrating that Franklin's love of food shaped not only his life but also the character of the young nation he helped build.

A key figure in the administrations of Franklin D. Roosevelt and Harry S. Truman, Benjamin V. Cohen (1894–1983) was a major architect of public policy from the first days of FDR's presidency through the early days of the Cold War. Although he kept a low public profile, Cohen's influence extended across a wide range of domestic and foreign policy initiatives. In this biography, William Lasser offers the first account of Ben Cohen's life and career, and an assessment of his contribution to the origin and development of modern American liberalism. Cohen's life provides an extraordinary lens through which to view the development of the evolving political philosophy of the Roosevelt and Truman presidencies. A brilliant lawyer noted for his good judgment and experience, Cohen was a leading member of FDR's "Brain Trust," developing ideas, drafting legislation, lobbying within the administration and in Congress, and defending the New Deal in court. The book traces his contributions to domestic financial policy, his activities during the war years in London and Washington, his service as counselor to the State Department and member of the American delegation

to the United Nations after the war, and his role in the American Zionist movement. From Cohen's life and work, Lasser draws important insights into the development of the New Deal and the evolution of postwar liberalism.

CIGAR BOX LITHOGRAPHS: The Inside Stories Uncovered is a thought-provoking production exposing its readership to more than 160 vintage cigar boxes manufactured during the late 19th and early 20th centuries. Most convey stunning litho- graphs that portray prominent historical figures. Such cigar boxes during the 19th century attracted a massive smoking cliental numbering in the millions.... While puffers more than one hundred years ago likely recognized the prominent personalities peering at them from the inside labels of these wooden cigar boxes, those same headlined names, today, are now essentially erased from memory. Lew Wallace

(1827- 1905), portrayed in this stunning portrait label, is virtually a forgotten name today. World-famous during his day, he was not only a Major General during the Civil War but became more famous when he wrote what some consider to be the best-selling novel of the 19th century. His *Ben Hur* (see page 34), a novel that was turned into a Hollywood blockbuster winning a record eleven Oscars in 1959, was certainly the most read and the best-known book title during the 20th century, that is, until it was superseded by *Gone with the Wind* in the 1930s. By examining the cartouche to the left of this stunning label portrait, one detects Wallace's role as a General during the Civil War, especially at the Battle of Shiloh. The cartouche to the right of his portrait details his writing studio in Crawfordsville, Indiana. This is where his most famous novel was written. Cigar boxes from the past often became an educational platform inadvertently recording and preserving history. To this day, this nearly 120-year old collectible cigar container whispers its provocative past, that is, providing one takes time out to lift its lid and peer at the lithographic image waiting to be re-discovered or uncovered.... Peer long enough and the box just might whisper its past to you.

*My Two Grannies* Simon and Schuster Benjamin Franklin Butler was one of the most important and controversial military and political leaders of the Civil War and Reconstruction eras. Remembered most often for his uncompromising administration of the Federal occupation of New Orleans during the war, Butler reemerges in this lively narrative as a man whose journey took him from childhood destitution to wealth and profound influence in state

and national halls of power. Prize-winning biographer Elizabeth D. Leonard chronicles Butler's successful career in the law defending the rights of the Lowell Mill girls and other workers, his achievements as one of Abraham Lincoln's premier civilian generals, and his role in developing wartime policy in support of slavery's fugitives as the nation advanced toward emancipation. Leonard also highlights Butler's personal and political evolution, revealing how his limited understanding of racism and the horrors of slavery transformed over time, leading him into a postwar role as one of the nation's foremost advocates for Black freedom and civil rights, and one of its notable opponents of white supremacy and neo-Confederate resurgence. Butler himself claimed he was "always with the underdog in the fight." Leonard's nuanced portrait will help readers assess such claims, peeling away generations of previous assumptions and characterizations to provide a definitive life of a consequential man.

This book tells the story of the International Rescue Committee (IRC), the largest nonsectarian refugee relief agency in the world. Founded in the 1930s by socialist militants, the IRC

attracted the support of renowned progressives such as Eleanor Roosevelt, Norman Thomas, and Reinhold Niebuhr. But by the 1950s it had been absorbed into the American foreign policy establishment. Throughout the Cold War, the IRC was deeply involved in the volatile confrontations between the two superpowers and participated in an array of sensitive clandestine operations. The IRC thus evolved from a small organization of committed activists to a global operation functioning as one link in the CIA's covert network.

South Africa needs no introduction to the global narratives of violence and crimes against women and children. With reported sexual offences exceeding 60000 and incidents of murder totalling 17805 for the 2014/2015 period, our countrys notoriety in this arena contributes to the landscape within which *The Symbol of No Escape* plays out. As forensic thriller *The Symbol of No Escape* is an emergent property of qualities that not too many authors are able to harness. These include Dr Tanya Robinsons practical experience and extensive work with the abused child, her knowledge in forensic psychopathology and her laudable scholarly credentials that underpins each page with legitimacy whilst powerfully infusing the characters of protagonist Dr Claire and villain Dann Carmen. The reader is systematically drawn in and absorbed in the lifeworld of Dr Claire, a profiler and expert assessor who is tasked to create a profile that would help close the case against depraved child serial murderer and family killer, Dann Carmen. His crimes are brutal and bizarre, yet Dr Claires assertion that Dann instils no fear in me paves the way

for explicating her goal which is to establish what contributed to him becoming a monster (Marcel Van der Watt, University of South Africa, Department of Police Practice).
