Most books are to be read, some are to be studied, but a few are meant to be lived in for a short time. Merlin's Star is of this last kind. A story that begins with Merlin, the wise and powerful wizard of Camelot. Trickery and the ultimate betrayal of another causes Merlin to divide a magical star among a chosen five, each pledging to use the power to bring joy and happiness to the children of the world. But all is not as it seems...and centuries

later when the stars are stolen, disaster looms for Santa Claus, the Tooth Fairy, the Sandman and the last of the great sorcerers. Their fate rests with two of Santa's elves, Alfred and Henry, joining with two Haole to search for, and return the stars before it's too late. A journey that will lead them to Bitter Realm, and a final encounter with the wizard known only as Churilar.

GIS Tutorial 1 for ArcGIS Pro Cambridge University Press
In Making Uzbekistan, Adeeb Khalid chronicles the tumultuous history of Central Asia in the age of the Russian revolution. He explores the complex interaction between

Uzbek intellectuals, local Bolsheviks, and Moscow to sketch out the flux of the situation in early-Soviet Central Asia. His focus on the Uzbek intelligentsia allows him to recast our understanding of Soviet nationalities policies. Uzbekistan, he argues, was not a creation of Soviet policies, but a project of the Muslim intelligentsia that emerged in the Soviet context through the interstices of the complex politics of the period. Making Uzbekistan introduces key texts from this period and argues that what the decade witnessed was nothing short of a cultural revolution.

Fundamentals of Real Estate Appraisal Phaidon Press

Why do people study religion? How have they studied it in the past? How do we study religion today? Is the academic study of religion the same as religious education?

These and many other questions are addressed in this engaging introduction to the discipline of religious studies, written by two experienced university teachers. The authors have crafted this book to familiarize novice students with key concepts and terminology in the study of religion.

More advanced students will find a varied array of theoretical perspectives and methodological approaches to the field.

Topics include: definitions of religion perspectives in the study and teaching of religion how religion began to be studied:

traditional perspectives – philosophical and theological how people experience religion:

perspectives in the study of religious consciousness and perception – phenomenological and psychological studying religion within

communities: Social and cultural perspectives – anthropological,

sociological, political and economic judging religion: critical perspectives

–feminist approaches, the interaction of popular literature and religion contextual perspectives – historical and

comparative. The book encourages students to think critically about the theories and methods presented. Students will find arguments for the strengths and limitations of these approaches, understand connections among religious studies and other intellectual movements, and develop their own ideas of how they might want to go about the study of religion. Summary boxes, a timeline, a glossary and other pedagogic aids help students grasp key concepts, along with a companion website at www.sastor.com.

The History of Folklore in Europe Walter de Gruyter

Both hydrologists and meteorologists need to speak a common scientific language, and this has given rise to the new scientific discipline of hydrometeorology, which deals with the transfer of water and energy across the land/atmosphere interface. Terrestrial Hydrometeorology is the first graduate-level text with sufficient breadth

and depth to be used in hydrology departments to teach relevant aspects of meteorology, and in meteorological departments to teach relevant aspects of hydrology, and to serve as an introductory text to teach the emerging discipline of hydrometeorology. The book will be essential reading for graduate students studying surface water hydrology, meteorology, and hydrometeorology. It can also be used in advanced undergraduate courses, and will be welcomed by academic and professional hydrologists and meteorologists worldwide. Additional resources for this book can be found at: <http://www.wiley.com/go/suttleworth/hydrometeorology>.

The Role and Impact of Public-private Partnerships in Education University of Pittsburgh Press

Since the reign of the Abassid Caliph at Baghdad al-Mutawakil (847-861) more than eleven centuries ago, the discussion about the nature of the Qur'an has been blocked in favour of the Orthodox view that it is the exclusive verbatim Word of God. The human

dimension, which includes the language as well as the recipient, is almost absent. This book aims to reopen the debate by rereading the classical material and addressing the present situation of Muslims in the context of the challenges of modernity. The basic question is whether or not Muslims can modernize their societies without disregarding their own belief. The implicit answer is that this is indeed possible once the human dimension of the Qur'an is regarded. So far, Muslims have only been able to rethink Tradition while the question of the Qur'an is untouched. Those who dared to open the question were condemned as heretics, and some of them were executed. Nasr Abu Zayd, Ibn Rushd Professor at the University for Humanistics (Netherlands), delves into the academic adventure of reopening the debate that has been blocked for so long."

The Purchase of the North Pole or Topsy-Turvy (French: Sans dessus dessous) is an adventure novel by Jules Verne, published in 1889. It is the third and last novel of the

Baltimore Gun Club, first appearing in *From the Earth to the Moon*, and later in *Around the Moon*, featuring the same characters but set twenty years later. Like some other books of his later years, in this novel Verne tempers his love of science and engineering with a good dose of irony about their potential for harmful abuse and the fallibility of human endeavors. In the year of 189-, an international auction is organized to define the sovereign rights to the part of the Arctic extending from the 84th parallel, the highest yet reached by man, to the North Pole. Several countries send their official delegates, but the auction is won by a representative from an anonymous United States buyer. After the auction closes, the mysterious buyer is revealed to be Barbicane and Co., a company founded by Impey Barbicane, J.T. Maston and Captain Nicholl - the same members of the Baltimore Gun Club who, twenty years earlier, had traveled around the Moon inside a large cannon shell. The brave gunmen-astronauts had come out of their retirement with an even more ambitious

engineering project: using the recoil of a huge cannon to remove the tilt of the Earth's axis - so that it would become perpendicular to the planet's orbit, like Jupiter's. That change would bring an end to seasons, as day and night would be always equal and each place would have the same climate all year round. But the society's interest lay in another effect of the recoil: a displacement of the Earth's rotation axis, that would bring the lands around the North Pole, which they had secured in the auction, to latitude 67 north. Then the vast coal deposits that were conjectured to exist under the ice could be easily mined and sold. The technical feasibility of the plan had been confirmed by J. T. Maston's computations. The necessary capital had been provided by Ms. Evangelina Scorbitt, a wealthy widow and ardent Maston's admirer (whose more than scientific interest was lost on the obsessive engineer). The cannon needed for that plan would be enormous, much larger than the huge Columbiad that had sent them to the Moon. Once the plan became public, the brilliant French

engineer Alcide Pierdeux quickly computes the required force of the explosion. He then discovers that the recoil would buckle the Earth's crust; many countries (mostly in Asia) would be flooded, while others (including the United States) would gain new land... (wikipedia.org)

Water is vital for life. Since the dawn of civilization, much effort has been made to harness sources of fresh water. Recent years have raised global awareness of the need for increasing demand of water worldwide, largely because of growing population, rising standard of living, higher demand for energy, and greater appreciation for environmental quality. As an example, the world population has increased threefold in the past five decades. In order to meet the rising water demand, water resources are being developed by building large dams, reservoirs, barrages and weirs across rivers worldwide. The guiding principle for water resources development has been to ensure adequate supply of water for agriculture, domestic use (including fine

drinking water), waste disposal, industries, and energy production, with due attention to maintain the ecosystem functions. This development, however, depends on a holistic, cooperative and scientific approach. The basic inputs in the assessment of water resources for a given region are from hydrological data and the subject of hydrology forms the core in achieving sustainable development of water resources. Barring a few exceptions, hydrological data for most river basins are sparse and therefore it is difficult to comprehensively assess their water resources. The major source of water is rainfall which occurs as a result of condensation of atmospheric moisture governed by the science of meteorology.

The questions which this volume seeks to address include: what is translation competence? How can it be built and developed? How can the product of the performance be used to measure levels of competence? These questions are addressed with specific reference to

the training situation. They are arranged in three sections, the first focusing on the identification of subcompetences.

The Bronze Age

Civilization of Central Asia

edited by Philip L. Kohl

collates translated articles from soviet findings of Bronze Age and Aenolithic remains in Central Asia.

Originally published in 1981, these articles

include the latest

discoveries at the time of publication such as the

Murghab Delta sites to

build a clearer picture of

civilizations and

settlements in Bronze Age

Southern Central Asia and

their history and evolution

for new English

audiences. This title will

be of interest to students

of history, archaeology

and anthropology.

The Pacing mustang.

Illustrated edition

Routledge

Long recognized in the

field as the leading

educational technology

text, "Integrating

Educational Technology

into Teaching" links

technology integration

strategies to specific

learning theories, shows

pre- and in-service

teachers how to plan for technology integration, and offers opportunities to practice integrating technology by designing curriculum to meet teaching and learning needs. Carefully selected exercises, sample lessons, and recommended resources encourage teachers to reflect on their practice as they develop the insights, knowledge, and skills they need to infuse technology across all disciplines.

Throughout the book, content is updated to align with the latest ISTE Standards for Educators and Students and showcases the most current tools, methods, and ideas shaping the role of technology in education. -- From product description.

Nebenzahl documents the mapping and discovery of West Asia and the trade routes of the Silk Road. The book includes rare maps spanning 2,000 years of cartographic history.

Developing Translation

Competence Ladybird Books

Tales of animals are not accidentally so loved in many countries by adults

and children. The heroes of the stories written by the famous Canadian writer Ernest Thompson Seton, and among them stands out for its originality the "The Pacing Mustang", are animals and birds. However, often their life and behavior are more exalted and noble than that of people. A beautiful black mustang was a pacer, that is, when running, he moved first both right legs, then both left. The Mustang took home mares with him and they eventually got used to the wild life.

Bank Shot Psychology Press

Sport is a growing industry with enormous numbers of people now involved in the management and administration of sports, fitness and exercise.

Whether voluntary, public or commercial sectors, all can benefit by improving the practice and delivery of the management of sport and its organisations. This text is designed to help all those delivering sport to deliver it better and includes:

- What's different and special about sports management?
- The voluntary sector
- Event management and marketing
- Marketing, fundraising and

- sponsorship
- Managing staff and volunteers
- Organisational management principles
- Legal issues including health and safety
- Case studies - both local and national. Full of practical examples this book reveals sports management in action, showing how good management helps us to deliver better sports participation, at all levels. This book is a must for undergraduates as well as an invaluable tool for professionals in sport management and administration in the private public and voluntary sectors.

Walter de Gruyter

""Richard Frye's translation from the Persian presents an engaging, readable narrative that recreates the lively intellectual and commercial life of this vibrant ancient city. In the tenth century, Bukhara was a cultural center that rivaled Baghdad, and was known as ""the dome of learning in the East."" It was a dynamic metropolis, capital of the semi-independent dynasty that ruled most of present-day Iran and Central Asia. It was in Bukhara that the so-called Persian Renaissance began, with its far-reaching literary implications. Narshakhi portrays not only rulers, but also everyday life in cities and villages. This primary source affords insights into life in Eastern Iran and Central Asia during a period of change in the Islamic world.""--

Publisher's description.

Sports Management and Administration Springer Science & Business Media Instead of robbing a bank, Dortmund tries to steal the whole building Encyclopedias are heavy, and John Dortmund is sick of carrying them.

While in between jobs, the persistent heist-planner is working an encyclopedia-selling scam that's about to blow up in his face. The cops are on their way when his friend Kelp pulls up in a stolen Oldsmobile, offering a quick escape from the law and a job that's too insane to turn down. Kelp's nephew is an FBI washout who's addicted to old-time pulp novels and adventure stories. He tried being a cop, and now he wants to be a robber. His target: a Main Street bank that has temporarily relocated to a large mobile home.

Breaking in is impossible—there are seven guards and a police station down the street—but mobile homes were meant to be driven. Dortmund just has to drive the bank away.

[The Semantics of Prepositions](#) New In Chess The Avestan Hymn to Mithra, written in the fifth century BC, is the one extensive, ancient literary record of the attributes,

companions and cult of the Iranian god whose worship spread, five or six centuries later, as far as Britain. Dr Gershevitch here reproduces Geldner's text and critical apparatus of the Hymn, adding his own introduction, translation and commentary. The introduction offers an orientation on the main problems concerning Mithra: how the god came to be included in the Zoroastrian religious system, his relation to Zarathustra's god Ahura Mazda, his functions, his development from the stage at which the Indian Mitra is found in the Rig Veda, and the extent to which the Western Mithras has preserved the characteristics of the Avestan Mithra. The text is faced by the English translation, and is followed by Dr Gershevitch's exhaustive commentary.
