Today's rapidly flowing global economy, hit by recession following the financial crisis of 2008/9, means the geographical economic perspective has never been more important. An Introduction to Economic Geography comprehensively guides you through the core issues and debates of this vibrant and exciting area, whilst also exploring the range of approaches and paradigms currently invigorating the wider discipline. Rigorous and accessible, the

authors demystify and enliven a crucial subject for geographical study. Underpinned by the themes of globalisation, uneven development and place, the text explores the diversity and vitality of contemporary economic geography. It balances coverage of 'traditional' areas such as regional development and labour markets with insight into new and evolving topics like neoliberalism, consumption, creativity and alternative economic practices. An Introduction to Economic Geography is an essential textbook for undergraduate students taking courses in Economic Geography, Globalisation Studies and more broadly in Human Geography. It will also be of key interest to anyone in Planning, Business and Management Studies and Economics.

The quest for moral leaders is both a personal quest that takes place in the hearts and minds of leaders and a pursuit by individuals, groups, organizations, communities and societies for leaders who are both ethical and effective. The contributors to this volume, all top scholars in leadership studies and ethics, provide a nuanced discussion of the complex ethical relationships that lie at the core of leadership. Two distinct factors make the ethics of leadership different from the ethics of other individuals. The first is power - the way leaders exercise it and the temptations that come with it. The second is the moral relationship they have with followers and the range of people with whom they have moral relationships and obligations. In *The Quest for Moral Leaders*, the contributors explore how leaders themselves view their role, as well as the ways in which leadership functions within business, politics and society. The volume begins with chapters examining how religious beliefs and emotions color the way leaders make decisions. The second section covers how leaders think about morality, while the book's

final chapters shift our attention to the function of leadership within organizations. The first book to offer perspectives on leadership ethics from the ancient Greek ideas on reverence to the moral problems of executive compensation, *The Quest for Moral Leaders* is a must-read for scholars and students of leadership, ethics and business. Leadership consultants will also find this in-depth analysis a valuable resource.

Can business activities and decisions be virtuous? This is the first business ethics textbook to take a virtue ethics approach. It explains how virtue ethics compares with alternative approaches to business ethics, such as utilitarianism and deontology, and argues that virtue ethics best serves the common good of society. Looking across the whole spectrum of business—including finance, governance, leadership, marketing and production—each chapter presents the theory of virtue ethics and supports students' learning with chapter objectives, in-depth interviews with professionals and real-life case studies from a wide range of countries. *Business Ethics: A Virtue Ethics and Common Good Approach* is a valuable text for advanced undergraduates and masters-level students on business ethics courses.

Water Wellred Books

This volume examines the breadth and depth of virtue ethics and aims to counter the virtue ethics amnesia that both afflicts general moral philosophy and affects business and management ethics. Divided into two parts, the handbook starts out with a historical introduction and chronology of the development of virtue ethics, providing a comprehensive assessment of its evolution and identifying the most influential authors and their works. The authors discussed include those who follow a philosophical or conceptual tradition in their treatment of virtue and those who belong to the research tradition of positive

science, in particular, empirical, quantitative and applied psychology. The second part of the book discusses systematic approaches and major themes developed in virtue ethics. These contributions are conceptual, empirical/applied or case studies. They offer insight into the different topics to which virtue ethics has been applied, and show how virtue ethics has influenced the various operational areas of firms. Finally, they examine the virtue ethics responses to some of the most important issues that businesses and organizations face in the 21st century.

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. This groundbreaking volume brings together scholars from across the globe to discuss the infrastructure, energy, housing, safety and sustainability of African cities, as seen through local narratives of residents. Drawing on a variety of fields and extensive first-hand research, the contributions offer a fresh perspective on some of the most pressing issues confronting urban Africa in the twenty-first century. At a time when the future of the region as a whole will be determined in large part by its cities, the implications of these developments are profound. With case studies from cities in Ethiopia, Kenya, Malawi, Niger, Nigeria, South Africa and Tanzania, this volume explores how the rapid growth of African cities is reconfiguring the relationship between urban social life and its built forms. While the most visible transformations in cities today can be seen as infrastructural, these manifestations are cultural as well as material, reflecting the different ways in which the city is rationalised, economised and governed. How can we 'see like a city' in twenty-first-century Africa, understanding the urban present to shape its future? This is the central question posed throughout this volume, with a practical focus on how academics, local decision makers and international practitioners can collaborate to meet the challenge of rapid growth, environmental pressures and resource gaps.

The Quest for Moral Leaders Routledge

With numerous examples to supplement her rich theoretical discussion, Nel Noddings builds a compelling philosophical argument for an ethics based on natural caring, as in the care of a mother for her child. In *Caring*—now updated with a new preface and afterword reflecting on the ongoing relevance of the subject matter—the author provides a wide-ranging consideration of whether organizations, which operate at a remove from the caring relationship, can truly be called ethical. She discusses the extent to which we may truly care for plants, animals, or ideas. Finally, she proposes a realignment of education to encourage and reward not just rationality and trained intelligence, but also enhanced sensitivity in moral matters.

Biblical Commentary On The Old Testament (Volume I - The Pentateuch) Edward Elgar Publishing

"The pamphlet... outlined a broad plan of organisation in which

everyone would find a place for himself, become a cog in the revolutionary machine, a cog, which, no matter how small, was vital to the working of the machine. The pamphlet urged the necessity of intensive and tireless efforts to build the foundation that had to be built if the Party was to exist in deeds and not in words..." (Nadezhda Krupskaya, *Reminiscences of Lenin*.) First published in early 1902, *What Is to Be Done?* remains a classic of Marxism on the building of the revolutionary party, which sets out the party's role as the organiser and director of the revolution. The pamphlet was written as part of a conflict with the opportunism of the Economists, who emphasised 'bread and butter issues' rather than theory. Lenin uses the book to explain the necessity of creating a centralised group of professional and dedicated revolutionary cadres before the "times of explosion and outbursts." The history of the past 100 years has proven Lenin right: time and again, the masses have been ready to struggle, but let down by their leadership. Today, many working-class people are beginning to reject the status quo and are looking to socialist ideas as an alternative. It is the duty of Marxists to build an organisation capable of offering a way forward, and *What is to Be Done?* represents an excellent guide as to how to do this. With a new introduction by Rob Sewell.
