Written by two experienced toxicology lecturers, *Principles of Toxicology* provides a broad-based yet in-depth introduction to this diverse subject. Comprehensive and easy-to-read, the book covers this broad and interdisciplinary field from the viewpoint of three different functional levels: molecular and cellular; physiological; and ecological and environmental. This revised second edition expands the coverage of the book while keeping the organizational format that made the first edition a bestseller. It also includes a series of brief case studies illustrating the application of toxicological principles to current issues of interest. Each and every chapter has been revised, several have been significantly rewritten, and three are entirely new. It also includes an appendix of selected toxicants that describes chemical structure and category of use. These

[An Introduction to Human-Environment Geography](#) John Wiley & Sons
More than ever, people are longing for deep and meaningful change. Another world is not only possible; it is essential. Yet despite our creative and determined efforts to attain social justice and ecological sustainability, our global crises continue to deepen. In *Drinking Molotov Cocktails with Gandhi*, best-selling author Mark Boyle argues that our political and economic system has brought us to the brink of climate catastrophe, ransacking ecosystems and unraveling communities for the benefit of the few at the expense of the many. He makes a compelling case that we must "rewild" the political landscape, as history teaches us that positive social change has always been wrought by movements prepared to use any means available. The time has come for pacifists, revolutionaries, and freedom

fighters to work together for the creation of a world worth sustaining. Eloquent, visionary, and beautifully written, this incendiary manifesto strikes at the heart of the world's crises and reframes our understanding of how to solve them, signaling a turning point in our journey towards an ecologically just society. The three R's of the climate change generation—reduce, reuse, and recycle—are long overdue for an upgrade. Welcome to resist, revolt, rewild. Mark Boyle is the author of *The Moneyless Man* and *The Moneyless Manifesto*. He lived completely without money for three years, and is a director of the global sharing community streetbank.com.

You're Not as Crazy as I Thought (but You're Still Wrong) Houghton Mifflin Harcourt

"Intense and elegiac...devastatingly agile." —New York Times Book Review
The year is 1968. The world is changing, and sixteen-year-old Jon Mosher is determined to change with it. Racked by guilt over his older brother's childhood death and stuck in the dead-end town of Brewster, New York, he turns his rage into victories running track. Meanwhile, Ray Cappicciano, a rebel as gifted with his fists as Jon is with his feet, is trying to take care of his baby brother while staying out of the way of his abusive, ex-cop father. When Jon and Ray form a tight friendship, they find in each other everything they lack at home, but it's not until Ray falls in love with beautiful, headstrong Karen Dorsey that the three friends begin to dream of breaking away from Brewster for good. Freedom, however, has its price. As forces beyond their control begin to bear down on them, Jon sets off on the race of his life—a race to redeem his past and save them all. Mark Slouka's work has been called "relentlessly observant, miraculously expressive" (New York Times Book Review). Reverberating with compassion, heartache, and grace, Brewster is an unforgettable coming-of-age story from one of our most compelling novelists. Waiting at the Paris airport, two immigrants from Djibouti reveal parallel stories of war, child soldiers, arms trafficking, drugs, and hunger. Bashir is recently discharged from the army and wounded, finding himself inside the French Embassy. Harbi, whose wife, Alice, has been killed by the police, is there too—arrested earlier as a political suspect. An embassy official mistakes Bashir for Harbi's son, and as Harbi does not deny it, both will be exiled to France, Alice's home country. This brilliantly shrewd and cynical universal chronicle of war and exile, translated into English for the first time, amounts to a lyrical and reflective history of Djibouti and its tortuous politics, crippled economy, and devastated moral landscape.

Americans have been divided along political lines for so long that they have

nearly forgotten how to talk to one another, much less how to listen. This is not likely to improve as long as differences between them continue to be cast in overly simplistic terms, such as "ignorance" vs. "enlightened awareness" or "morality" vs. "reprobate immorality." Such dichotomies ignore the fact that many citizens who disagree politically nonetheless share a desire to work for the larger good of society. Phil Neisser, a self-described "left-wing atheist," first met Jacob Hess, a social conservative, at the 2008 proceedings of the National Coalition for Dialogue and Deliberation. After discovering a shared commitment to cross-party dialogue, they embarked together on a yearlong attempt to practice what they preached. In this book they share the result by exploring the boundaries of core disagreements about morality, power, gender roles, sexuality, race, big government, big business, and big media. Each chapter revolves around an issue explored in depth through back-and-forth, lively question and response. This nuanced, iterative process was transformative for both authors, and could likewise serve as a valuable resource for anyone-- liberal or conservative--who feels disillusioned by today's often shallow, demagogic public discourse.

The Story of the Stone (or Dream of the Red Chamber), a Chinese novel by Cao Xueqin and continued by Gao E, tells of an amazing garden, of a young man's choice between two beautiful women, of his journey toward enlightenment, and of the moral and financial decline of a powerful family. Published in 1792, it depicts virtually every facet of life in eighteenth-century China—and has

influenced culture in China ever since. Part 1 of this volume, "Materials," provides information and resources that will help teachers and students begin and pursue their study of Stone. The essays that constitute part 2, "Approaches," introduce major topics to be covered in the classroom: Chinese religion, medicine, history, traditions of poetry, material culture, sexual mores, servants; Stone in film and on television; and the formidable challenges of translation into English that were faced by David Hawkes and then by John Minford.

This comprehensive volume explores the political, social, economic and geographical implications of Brexit within the context of an already divided UK state. It demonstrates how support for Brexit not only sharpened differences within England and between the

separate nations comprising the UK state, but also reflected how austerity politics, against which the referendum was conducted, impacted differently, with north and south, urban and rural becoming embroiled in the Leave vote. This book explores how, as the process of negotiating the secession of the UK from the EU was to demonstrate, the seemingly intractable problem of the Irish border and the need to maintain a 'soft border' provided a continuing obstacle to a smooth transition. The authors in this book also explore various other profound questions that have been raised by Brexit; questions of citizenship, of belonging, of the probable impacts of Brexit for key economic sectors, including agriculture, and its meaning for gender politics. The book also brings to the forefront how the UK was geographically imagined – a new lexicon of 'left behind places', 'citizens of somewhere' and 'citizens of nowhere' conjuring up new imaginations of the spaces and places making up the UK. This book draws out the wider implications of Brexit for a refashioned geography. It was originally published as a special issue of the journal *Space and Polity*.

The continuing expansion of neoliberalism into ever more spaces and spheres of life has profound implications for social justice. Despite the number of policies designed to target 'social exclusion', people in many communities continue to be marginalized by economic restructuring. *Social Justice and Neoliberalism* explores the connections between neoliberalism, social justice and exclusion. The authors raise critical questions about the extent to which neoliberal programmes are able to deliver social justice in different locations around the world. The book offers grounded, theoretically oriented, empirically rich analysis that critiques neoliberalism while understanding its material impacts. It also stresses the need to extend analyses beyond the dominant spheres of capitalism to look at the ways in which communities resist and remake the economic and social order, through contestation and protest but also in their everyday lives. Global in scope, this book brings together writers who examine these themes in the global South, the former 'communist' East and the West, using the experience of marginal peoples, places and communities to challenge our conceptions of capitalism and its

geographies.
