Negotiating International Commercial Contracts - Practical Exercises is an innovative workbook that comprises over 80 real-life case scenarios, accompanied by suggested answers and guidelines. These are built upon the authors' experience and understanding of both legal and business interests which underlie the negotiation of an international commercial contract. The exercises focus on two of the most vital choices in an international commercial contract: (i) the choice of the substantive law to govern the contract (or the failure to choose a law); and (ii) the method and place of dispute resolution (or the failure to specify in the dispute resolution clause). You will be invited to consider challenging situations, all of which are designed to enhance your ability to anticipate legal and business risks, minimise potential pitfalls and give you an idea of a checklist to tackle these commercial issues. The suggested answers aim to guide you towards the sort of thoughtful approach that will help you with similar situations in real life, and allow you to make commercially sensible decisions to avoid being caught by the "all-too-familiar" approach. This workbook is designed to assist anyone involved in the negotiation, enforcement, or interpretation of international commercial contracts. The book aims to help build skills for any counsel assisting clients in international transactions, including those in law firms and in-house legal departments, those acting as judges, arbitrators, mediators, or for training purposes in university and professional training courses. Many books have been written on negotiation tactics and a few books have been written on contract drafting, but no book has combined the two disciplines into one-until now. Resulting from over 10 years of actual negotiation experience as both buyer and seller, author Stephen Guth offers insight into a world of negotiations and contracts that few ever see. This book isn't a feel-good book on win-win negotiations. It's an insider's view into real life negotiation tactics and ploys. Readers will learn how to use negotiation tactics such as the Columbo, the Price Slice and Dice, and the Signature Limit Lasso. Readers will also learn how to spot and counter vendor ploys such as the Pop-Tart, Mirroring, and the Only Game in Town. To put it all together, readers are instructed on contract drafting tricks such as Expressly Implied Warranties, the Endless Indemnification, and the Unlimited Limitation of Liability. Readers will never look at contracts the same way again.

Negotiating International Business is a comprehensive reference guide designed to aide business people when dealing with foreign counterparts. It explains fundamental aspects of international business negotiations, culture-specific expectations and practices, as well as numerous techniques used by international negotiators. Here is the advice you need in order to be successful by adjusting business, personal, and social behaviors as required in any of 50 countries around the world.

Arbitration Clauses for International Contracts - 2nd Edition Diana With the aim of creating an autonomous regime for the interpretation and application of the contract, boilerplate clauses are often inserted into international commercial contracts without negotiations or regard for their legal effects. The assumption that a sufficiently detailed and clear language will ensure that the legal effects of the contract will only be based on the contract, as opposed to the applicable law, was originally encouraged by English courts, and today most international contracts have these clauses, irrespective of the governing law. This collection of essays demonstrates that this assumption is not fully applicable under systems of civil law, because these systems are based on principles, such as good faith and loyalty, which contradict this approach.

Compared to domestic transactions, the risks associated with international sales are greatly multiplied. It is a rare international sales agreement that can rely on minor variations of standard terms, as is so often the case in domestic agreements. Foreign laws, export/import and currency exchange controls, treaties, transit issues, inspection of goods, insurance, tariffs—and all these and more must be taken into account in contract negotiations. This is the second edition, expanded and updated, of an enormously useful book that guides practitioners through the process of drawing up sound agreements for the international sale of goods. Organised according to the framework of an annotated agreement, with detailed commentary on each provision, it incorporates hundreds of model clauses designed to cover every contingency, including such factors as the following (and a great deal more): definitions; Incoterms; price adjustments; documentation; labelling; delivery dates; transportation modes; limitation of liability; confidentiality; arbitration; and antitrust issues. Although the clauses are drawn without reference to any particular country, relevant national

circumstances are covered in the commentary to each clause. Appendices reprint the texts of the United Nations Convention on Contracts for the International Sale of Goods (CISG), the UNIDROIT Principles, and the Principles of European Contract Law. For lawyers charged with drafting an international sales contract, this book is invaluable. Clause by clause, it clearly details the drafting process, commenting expertly on every issue likely to arise as it goes. It would be hard to find a more useful guide.

This resource serves to educate lawyers and business professionals on how to draft the many types of "boilerplate" provisions, a legal term that refers to the standardized, one-size-fits-all provisions of a contract. Each chapter tackles one of 20 provisions and analyzes why it is important, the key legal and business issues raised, and how to draft the provision to suit a particular transaction. Such analysis not only helps readers better understand how to draft these provisions in their contracts, but also helps them better understand the other party's process.

Although negotiation still lies at the heart of international commercial agreements, much of the detail has migrated to the Internet and has become part of electronic commerce. This incomparable one-volume work—now in its sixth edition—with its deeply informed emphasis on both the face-to-face and electronic components of setting up and performing an international commercial agreement, stands alone among contract drafting

guides and has proven its enduring worth. Following its established highly practical format, the book's much-appreciated precise information on a wide variety of issues—including those pertaining to intellectual property, alternative dispute resolution, and regional differences—is of course still here in this new edition. There is new and updated material on such matters as the following: • the need for contract drafters to understand and to use the concepts of "standardization" (i.e., the work of the International Organization for Standardization (ISO) as a contract drafting tool); • new developments and technical progress in e-commerce; • new developments in artificial intelligence in contract drafting; • the possible use of electronic currencies such as Bitcoin as a payment device; • foreign direct investment; • special considerations inherent in drafting licensing agreements; • online dispute resolution including the innovations referred to as the "robot" arbitrator; • changes in the arbitration rules of major international organizations; and • assessment of possible future trends in international commercial arrangements. Each chapter provides numerous references to additional sources, including a large number of websites. Materials from and citations to appropriate literature in languages other than English are also included. In its recognition that a business executive entering into an international commercial transaction is mainly interested in drafting an agreement that satisfies all of the parties and that will be performed as promised, this superb guide will immeasurably assist any lawyer or business executive to plan and carry out individual transactions even when that person is not interested in a full-blown understanding of the entire landscape of international contracts. Business executives who are not lawyers will find that this book gives them the understanding and perspective necessary to work effectively with the legal experts.

This book focuses on the private dimensions of international trade, and specifically on its contractual aspects. Its focus reflects the reality of the day-to-day business of international trade, which is primarily an undertaking between two private businesses based on a contract drafted and negotiated between the two contracting parties for performance by them with occasional third-party assistance. The work is organized so that the user can read or skip various topics as needed rather than having to read cover-to-cover.

Drafting and Negotiating Commercial Contracts, Fourth Edition is the 'one-stop-shop' for practical contractual matters, making it essential reading for anyone involved in negotiating and drafting commercial contracts. Many works published on the topic of negotiating have dealt with techniques of and preparation for negotiation from a psychological standpoint, but this book contends that in the commercial world, hard commercial considerations rather than psychological warfare matter most in successfully negotiating commercial contracts. The text highlights the most important special features of selected contracts, namely payment contracts and petroleum contracts in addition to ordinary export contracts, syndicated loan agreements, international engineering and construction contracts, and issues relating to project finance and risk. One of the basic themes of this work is to remind negotiators of the changing attitudes towards the negotiation of international commercial contracts, including more awareness of bargaining powers of both parties. The Fourth Edition has been fully updated to take account of important court decisions regarding the interpretation of contracts and changes in consumer legislation. This includes commercial lawyers, contract managers, in-house lawyers, lawyers in private practice, LPC course tutors and law

and business students.

Drafting an international contract can be a risky business. Yet

with the increasing globalization of markets, these cross-border contracts are becoming a common practice for most traders, as well as for the lawyers assisting them. At the same time, international contracts remain a difficult and mysterious subject for business people as well as their lawyers. In his new book, *Drafting and Negotiating International Commercial Contracts*, Professor Fabio Bortolotti, a world-renowned expert on contract law, clarifies the issues surrounding these contracts and provides solutions to the thorny problems they raise: choice of the applicable law choice of jurisdiction international arbitration the use of more international drafting techniques hardship, force majeure and liquidated damages As an added feature, this volume provides insights into the basic requirements of a well-drafted contract and analyzes in depth the negotiating process. It concludes with incisive commentary on the model contracts developed by the International Chamber of Commerce. Lawyers and other legal professionals will find in these pages the tools they need to ensure their contracts meet the requirements of a globalized world.
