The Interpretation of Realities Revell  
From Spinors to Quantum Mechanics discusses group theory and its use in quantum mechanics.

Chapters 1 to 4 offer an introduction to group theory, and it provides the reader with an exact and clear intuition of what a spinor is, showing that spinors are just a mathematically complete notation for group elements. Chapter 5 contains the first rigorous derivation of the Dirac equation from a simple set of assumptions. The remaining chapters will interest the advanced reader who is interested

in the meaning of quantum mechanics. They propose a novel approach to the foundations of quantum mechanics, based on the idea that the meaning of the formalism is already provided by the mathematics. In the traditional approach to quantum mechanics as initiated by Heisenberg, one has to start from a number of experimental results and then derive a set of rules and calculations that

reproduce the observed experimental results. In such an inductive approach the underlying assumptions are not given at the outset. The reader has to figure them out, and this has proven to be difficult. The book shows that a different, bottom-up approach to quantum mechanics is possible, which merits further investigation as it demonstrates that with the methods used, the reader can obtain the correct results in a context where one would hitherto not expect this to be possible.

**Elijah** RSMean Known as the "Corpus Areopagiticum", this collection of works was falsely attributed by its author as being written by Dionysius the Areopagite, a first century AD Athenian convert of Paul the Apostle mentioned in Acts 17:34. Because of this erroneous attribution great attention was given by early Christian scholars, most notably the late 13th and early 14th

century scholar Meister Eckhart. Sometime in the 15th century it came to light that this collection of works was most likely the work of some anonymous late 5th or early 6th century author, who has subsequently been referred to as Pseudo-Dionysius. While this reattribution has diminished the "Corpus Areopagiticum" importance in Christian literature the collection still holds an important interest among scholars because of a renewed interest in the huge impact of Dionysian thought on later Christian thought. Included in this collection is the complete "Corpus Areopagiticum", which includes the following individual works: "Divine Names", "Mystic Theology", "Heavenly Hierarchy", "Ecclesiastical Hierarchy", and "Letters of Dionysius the Areopagite". This edition is printed on premium acid-free paper and follows the translations of John Parker.

Essentialism: The Disciplined Pursuit of Less is a self-help book by Greg McKeown. The book outlines a minimalist approach to tasks and obligations by focusing on truly important goals and learning to turn down opportunities that do not directly contribute to

meeting those goals. The modern fixation with multitasking and having it all has paradoxically resulted in accomplished, motivated people doing many relatively unimportant things poorly while neglecting their true goals because they are afraid of refusing any request... What has Jung to do with the Postmodern? Chris Hauke's lively and provocative book, puts the case that Jung's psychology constitutes a critique of modernity that brings it in line with many aspects of the postmodern critique of contemporary culture. The metaphor he uses is one in which 'we are gazing through a Jungian transparency or filter being held up against the

postmodern while, from the other side, we are also able to look through a transparency or filter of the postmodern to gaze at Jung. From either direction there will be a new and surprising vision.' Setting Jung against a range of postmodern thinkers, Hauke recontextualizes Jung's thought as a response to modernity, placing it - sometimes in parallel and sometimes in contrast to - various postmodern discourses. Including chapters on themes such as meaning, knowledge and power, the contribution of architectural criticism to the postmodern debate, Nietzsche's perspective theory of affect and Jung's complex theory, representation and symbolization, constructivism and pluralism, this is a book which will find a ready audience in academy and profession alike.
