Metalwork and Material Culture in the Islamic World Cengage Learning

With the rise of science, we moderns believe, the world changed irrevocably, separating us forever from our primitive, premodern ancestors. But if we were to let go of this fond conviction, Bruno Latour asks, what would the world look like? His book, an anthropology of science, shows us how much of modernity is actually a matter of faith. What does it mean to be modern? What difference does the scientific method make? The difference, Latour explains, is in our careful distinctions between nature and society, between human and thing, distinctions that our benighted ancestors, in their world of alchemy, astrology, and phrenology, never made. But alongside this purifying practice that defines modernity, there exists another seemingly contrary one: the construction of systems that mix politics, science, technology, and nature. The ozone debate is such a hybrid, in Latour's analysis, as are global warming, deforestation, even the idea of black holes. As these hybrids proliferate, the prospect of keeping nature and culture in their separate mental chambers becomes overwhelming—and rather than try, Latour suggests, we should rethink our distinctions, rethink the definition and constitution of modernity itself. His book offers a new explanation of science that finally recognizes the connections between nature and culture—and so, between our culture and others, past and present. Nothing short of a reworking of our mental landscape. We Have Never Been Modern blurs the boundaries among science, the humanities, and the social sciences to enhance understanding on all sides. A summation of the work of one of the most influential and provocative interpreters of science, it aims at saving what is good and valuable in modernity and replacing the rest with a broader, fairer, and finer sense of possibility.

Broadway: An Encyclopedia of Theater and American Culture [2 volumes] ABC-CLIO

PSYCHOLOGY: FOUNDATIONS AND FRONTIERS offers a fresh and updated approach that combines the appealing content, visuals, and effective features of Douglas Bernstein's two previous introductory psychology textbooks. Focusing on active learning, the text presents important findings from established and current research, emphasizes the many ways psychological theory and research results are being applied to benefit human welfare, and integrates extensive pedagogy. The integrated pedagogical system helps students master the material by supporting the elements of the PQ4R (Preview, Question, Read, Recite, Review, and Reflect) study system. Try This activities illustrate psychological principles or phenomena by encouraging students to learn by doing. Other features designed to promote efficient learning include Linkages diagrams and sections that show how topics in psychology are interrelated, Thinking Critically sections that apply a five-question approach to various topics, and Focus on Research sections that help students think objectively about research questions and results. To offer flexibility in a single-term course, the book includes eighteen chapters that may be assigned in whatever order meets instructors' needs. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Presenting detailed bibliographic information on all aspects of orchestration, instrumentation, and musical arranging with the broadest possible historical and stylistic palette, this work includes over 1,200 citations. The sources range from treatises, dissertations, and textbooks to journal articles and are cross-referenced and indexed. This is the only comprehensive bibliographic reference guide of its kind on the subject of orchestration. It will be of value to the music theory teacher, undergraduate and graduate students of orchestration, and the researcher. The book contains chapters devoted to book-length treatises; a general bibliography of journal articles and books partially related to orchestration; a chronological list of orchestration treatises; a list of jazz-arranging treatises; a list of band-related treatises; a list of treatises dealing with specific instruments or instrumental families; and an index. This is the first in a series of music theory reference books the author is developing.

Philosophers of War: The Evolution of History's Greatest Military Thinkers [2 Volumes] New York : United Nations

Scholars and governments recognize the importance of policy development and implementation for population health, but there is a lack of systematic theoretical and conceptual development in the health field to address the issue. Health Promotion and the Policy Process is the first book to take an in-depth look at the theoretical advances in the political sciences, including discussing the significance of political economy and sociology, which so far have made little progress in health promotion development. The book argues that focusing on how public policies work makes it possible to move beyond the more behavioural 'health education' approach, and make the transition from political statements to political strategies. The authors draw from a wide array of theories on the policy process in the fields of political science and political sociology to illuminate health promotion strategies and objectives. For example they discuss how Kingdon's Multiple Streams Model, Sabatier's Advocacy-Coalition Framework and policy network theories can contribute to greater health equity, healthy public policies and community development. Through practical and critical tools, research, and experience-based discussion, Health Promotion and the Policy Process discusses how theories can be used to influence, evaluate, orient or implement health promotion interventions and policies. This book will be essential reading for health promoters who want to make a difference by influencing social determinants of health at the policy level including students, public health professionals, researchers, practitioners, decision makers and those concerned with applied policy research.

This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in

an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

Swing Dancing Harvard University Press

This book explores the revivals of Shakespeare's history plays during the Victorian period, as staged by the famous actor-manager Charles Kean. Between 1852 and 1859, Kean produced celebrated productions of Henry V, Henry VIII, King John, Macbeth and Richard II, renowned for their unprecedented attention to antiquarian detail in sets, costumes, and properties (many of which are shown in the book's illustrations). These productions provided audiences with an unparalleled opportunity to participate in the Victorian obsession with history, especially of the medieval period. Using valuable primary sources, including promptbooks, scenic designs, costume sketches and contemporary reviews, Richard Schoch places mid-Victorian attitudes towards the theatre in the context of major intellectual and political movements of the age. The book will be of interest to scholars and students of theatre history, Shakespeare studies and Victorian culture.

This bibliography provides the reader with a comprehensive

reference tool that will enhance understanding of methodological issues and enable the user to employ research methods appropriate to their subject of study. It also provides accounting historians a comprehensive data base for the development of papers addressing methodological issues in an accounting history context. Access to this type of resource is particularly crucial to the development of accounting history research since the number of papers dealing with methodological issues published in accounting history literature is very small. Hence the references in this bibliography are drawn from the literature of general history, economic and business history, legal and social history and philosophy. The scope and range of its contents are broad - references are taken from texts as well as papers published in over 450 journals.

Handbook on the Peaceful Settlement of Disputes Between States Springer Nature

The material and visual culture of the Islamic World casts vast arcs through space and time, and encompasses a huge range of artefacts and monuments from the minute to the grandiose, from ceramic pots to the great mosques. Here, Venetia Porter and Mariam Rosser-Owen assemble leading experts in the field to examine both the objects themselves and the ways in which they reflect their historical, cultural and economic contexts. With a focus on metalwork, this volume includes an important new study of Mosul metalwork and presents recent discoveries in the fields

of Fatimid, Mamluk and Qajar metalwork. By examining architecture, ceramics, ivories and textiles, seventeenth-century Iranian painting and contemporary art, the book explores a wide range of artistic production and historical periods from the Umayyad caliphate to the modern Middle East. This rich and detailed volume makes a significant contribution to the fields of Art History, Architecture and Islamic Studies, bringing new objects to light, and shedding new light on old objects.

Cinema: The time-image United Nations

Modernism is still widely acknowledged as perhaps the most important and influential artistic and cultural phenomenon of the 20th century. Written by expert scholars from around the world and covering hundreds of different topics in a clear, incisive, and critical manner, this reference maps the complex field of modernism in a fresh and original way. The principal focus of the book is on English-language literary modernism and the period 1890-1939, yet many entries extend beyond those parameters to include important precursors and successors of the movement. The book also covers the crucial European and interdisciplinary dimensions of modernism and provides complementary comparative perspectives from countries and regions not usually included in traditional accounts of the subject. Entries cite works for further reading, and the volume closes with a selected, general bibliography.
