Korean: A Comprehensive Grammar is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of **Korean: A Comprehensive Grammar** makes it an essential reference source on the Korean language.

Orphaned and homeless in New York City at 14 years old in 2009, Carlo Juliano lived on the streets to survive until a local crime family boss, Johnny Toracio, gave him a job, his own place to live, and mentored him into a life as a gangster. For the next few years, Carlo flourished on the streets of New York befriending leaders of construction scams, art theft rings, drug cartels, biker gangs, extortion rackets, gambling, and cybercrime. In 2015, a series of events ignited a treacherous power struggle for control of New York City's underworld.

The pursuit of nuclear fusion as an energy source requires a broad knowledge of several disciplines. These include plasma physics, atomic physics, electromagnetics, materials science, computational modeling, superconducting magnet technology, accelerators, lasers, and health physics. Nuclear Fusion distills and combines these disparate subjects to create a concise and coherent foundation to both fusion science and technology. It examines all aspects of physics and technology underlying the major magnetic and inertial confinement approaches to developing nuclear fusion energy. It further chronicles latest developments in the field, and reflects the multi-faceted nature of fusion research, preparing advanced undergraduate and graduate students in physics and engineering to launch into successful and diverse fusion-related research. Nuclear Fusion reflects Dr. Morse's research in both magnetic and inertial confinement fusion, working with the world's top laboratories, and embodies his extensive thirty-five year career in teaching three courses in fusion plasma physics and fusion technology at University of California, Berkeley.

Charlaine Harris's beloved mystery series featuring Lily Bard. In Shakespeare's Christmas, Lily heads home to Bartley, Arkansas—always an uncomfortable scenario for the introverted Lily—for her sister Varena's Christmas wedding. But Lily has more to worry about than being a bridesmaid for a sister

to whom she's no longer close. Soon after she arrives in Bartley, Lily's private-detective boyfriend shows up too, and not just for moral support: He's investigating a four-year-old unsolved kidnapping. Try as she might, Lily can't help but get involved when she discovers that the case hits dangerously close to home—for Varena's new husband is the widowed father of a girl bearing a remarkable resemblance to the vanished child.

Keeping It Living A. S. Barnes

Keeping It Living brings together some of the world's most prominent specialists on Northwest Coast cultures to examine traditional cultivation practices from Oregon to Southeast Alaska. It explores tobacco gardens among the Haida and Tlingit, managed camas plots among the Coast Salish of Puget Sound and the Strait of Georgia, estuarine root gardens along the central coast of British Columbia, wapato maintenance on the Columbia and Fraser Rivers, and tended berry plots up and down the entire coast. With contributions from a host of experts, Native American scholars and elders, Keeping It Living documents practices of manipulating plants and their environments in ways that enhanced culturally preferred plants and plant communities. It describes how indigenous peoples of this region used and cared for over 300 species of plants, from the lofty red cedar to diminutive plants of backwater bogs.

Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as:

- physical principles of various material handling systems;
- considerations in selecting technically efficient and environmentally friendly equipment;
- best practices in upgrading and optimizing existing bulk material handling facilities;
- strategies to select proper equipment in the early phases of a new project.

Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

No matter what anyone tells you, boat cooking IS different from cooking ashore. The space is smaller, there's no grocery store 5 minutes away, you have fewer prepared foods and electric appliances, and food storage is much different. Despite cruising different oceans, we—Jan and Carolyn—both faced the same challenges: eating well while having time to enjoy all the other great aspects of cruising. We love to snorkel, swim, kayak, explore—and just sit and admire the view. We learned with the cookbooks we both had aboard, and wished for information that wasn't available—like when Jan ended up with a frozen chicken complete with head and feet and no instructions on how to cut it up. When we couldn't get foods such as sour cream, English muffins, spaghetti sauce or yogurt, we adapted recipes to make our own. Other times, we experimented with substituting ingredients—maybe the result wasn't identical, but it was still tasty. We ended up with over 150 substitutions and dozens of “make it yourself” options. As we traded recipes and knowledge with each other, we realized we were compiling information that became The Boat Galley Cookbook:

800+ recipes made from readily-obtainable ingredients with hand utensils, including numerous choices to suit every taste: not just one cake but 20, 16 ways to prepare fish, 10 regional barbecue sauces, and so on. Step-by-step directions to give even “non-cooks” the confidence they can turn out tasty meals without prepared foods. Detailed instructions on unfamiliar things like making yogurt and bread, grilling virtually every food imaginable, preparing and cooking freshly-caught fish and seafood, cutting up and boning meat, cooking in a Thermos and baking on the stove top, as well as lots of tips on how to do things more easily in a tiny, moving kitchen. All this in an easy-to-navigate format including side tabs on the Contents to help you find your way and extensive cross-reference lists at the end of each chapter. Quick Reference Lists provide idea starters: suggestions of included recipes for such categories as Mexican, Asian, and Potluck. The Boat Galley Cookbook is designed to help you every step of the way. We hope it becomes a trusted reference on your boat, and a source of many enjoyable meals.

Riley Blakely and the remainder of Grandview High's french class is heading out on a school trip to Paris. The three weeks in Paris are supposed to be an 'educational opportunity' for this lot. But of course, these hormonal teenagers just cannot abide by the rules. The one rule set by their lovely Mr. Walker: You cannot room with somebody of the opposite gender. So what does this french class do? Room with the opposite gender, with a funny way of picking roommates. Chit picking. Because hormonal teenagers can just never get enough. Insert Asher West. Her not so secret annoying hater. It's a hate-hate relationship. He's the guy who picked Riley's name. He's the most popular guy in the freaking school and Riley? Not so much. Put the two together and you'll get a whole lot of arguments and awkward moments. They're roommates and they're stuck in Paris, the city of love and the city of lights
