The new fourth edition of Technology, War and Independence is Book 3 of the best-selling Oxford KS3 History by Aaron Wilkes series. This textbook introduces the history knowledge and skills needed to support a coherent knowledge-rich curriculum, prepares students for

success in Key Stage 3 History, and builds solid foundations for GCSE study.

White Paper on Education in the Republic of Slovenia Nashville, Tenn. : Abingdon

This volume provides a comprehensive overview of environmental aspects of the Sava River, which is the greatest tributary to the Danube River and the major drainage river system of South Eastern Europe. Hydroelectric power plants, river traffic, intensive agricultural activities, heavy industry and floods have considerable influence on the environment and biota in the basin. Summarizing the results that were gathered in the course of EU, bilateral and national projects, the book highlights the most important stressors and helps readers to better understand

the impact of anthropogenic activities on the function of river basins. Topics include: transboundary water cooperation between the riparian countries; climate change projection, including its impact on flood hazards; evaluation of anthropogenic pollution sources; pollution of sediments, metal bioavailability and ecotoxicological and microbiological characterization of the river. The biological part also addresses quality aspects related to wildlife in river aquatic ecosystems (algae, macrophytes, zooplankton, macroinvertebrates and fish) and riparian ecosystems (amphibians, reptiles, birds and mammals). The general state of biodiversity and pressures caused by invasive aquatic species are also discussed.

Based on the bestselling book, *Rivers of North America*, this new guide stands as the only primary source of complete and comparative baseline data on the biological and hydrological characteristics of more than 180 of the highest profile rivers in Europe. With numerous full-color photographs and maps, *Rivers of Europe* includes conservation information on current patterns of river use and the extent to which human society has exploited and impacted them. *Rivers of Europe* provides the information ecologists and conservation managers need to better assess their management and meet the EU legislative good governance targets. Coverage on more than 180 European

rivers Summarizes biological, ecological and biodiversity characteristics Provides conservation managers with information to resolve conflicts between recreational use of rivers, their use as a water supply, and the need to conserve natural habitats Data on river hydrology (maximum , minimum and average flow rates), seasonal variation in water flow Numerous full-color photographs Information on the underlying geology and its affect on river behaviour *Bosnian, Croatian, Serbian, a Textbook* Oxford University Press Written by senior examiners, this text provides thorough coverage of the AS Level citizenship specification, providing an accessible and engaging narrative. It offers relevant and thought-provoking stimuli, such as articles and

photographs, to encourage students to engage with the topics covered. Case studies illustrate the issues in a contemporary context and each chapter contains exam-style and stimulus response question along with a section on exam revision that should ensure that students are well prepared for the final exam.

The Sava River Viella Libreria Editrice

This book offers an accessible introduction and a comprehensive guide to a range of ideas on creativity in education. The book provides an overview of the major theories related to creativity and explores the implications for policy and practice. The popular topic of creativity has given rise to a large number of theoretical positions, sometimes contradictory or contested.

This book clarifies and organises these approaches so that teachers understand where particular pedagogical and curricular practices originate and can develop them coherently. Topics covered include: Creativity in a social context Creativity and technology Creativity and curriculum planning Assessment and creativity Group creativity Managing creativity Tools of creativity The creative learner Creativity and cognition Creativity as expression Approaches to Creativity is an invaluable resource for those who wish to reflect on creativity and explore and engage in the modern discourse of education. It will be of value in teacher education, postgraduate studies, curriculum design and administration. "I'm thrilled to see a book aimed at helping teachers deepen

their understanding of creativity and, at the same time, offering practical insights for how teachers might nurture creativity in their everyday curriculum." Professor Ronald A. Beghetto, Associate Dean and Associate Professor of Education, University of Oregon, USA "At a time when many books designed to help us rethink big issues distract by their priestly tone and their pretensions to having found a solution, this is refreshingly clear, new and open." Professor John Onians, Emeritus Professor of World Art History, University of East Anglia, England "It is a rare book which manages to combine deep scholarship with readability. This one achieves that goal while also being timely and relevant. It should be read by all busy teachers who are concerned to

apply research about creativity into their teaching practice." Professor John Panter, Ex-Head of Academic Staff Development, University of Wollagong, Australia "This excellent overview of creativity is consistent with what the social and behavioral sciences tells us about creativity but is an easy read and perhaps more than anything else is enormously practical. Approaches to Creativity is, in short, accessible yet grounded in science. It presents both the broad context for creativity as a part of human effectiveness, as well as the nuts-and-bolts fine points that will allow everyone to learn something about themselves and about fulfilling creative potentials." Mark A. Runco, PhD Torrance Professor, Creative Studies & Gifted Education Editor, Creativity Research

Journal “As an educationalist and policy-maker, I am pleased to recommend this comprehensive and exciting book which clearly outlines international developments in creativity education, including in particular, the Russian contribution to the field.” Professor Nadezhda Shaidenko, Deputy Chair of the Education Committee of the Duma of the Russian Federation “This book takes the complexity of creativity research and breaks it down into readable and interesting prose. Teachers – and everyone else – will enjoy and learn from this valuable contribution.” Professor J.C.Kaufman, Professor of Psychology, California State University, USA “If it is possible to pin down the lightning flash of creativity then this book is the best attempt I have read so far.” Mark Patrick

 What is the Mediterranean? The perception of the Mediterranean leans equally on the nature, culture, history, lifestyle, and landscape. To approach the question of identity, it seems that we have to give importance to all of these. There is no Mediterranean identity, but Mediterranean identities. Mediterranean is not about the homogeneity and uniformity, but about the unity that comes from diversities, contacts, and interconnections. The book tends to embrace the environment, society, and culture of the Mediterranean in their multiple and unique interconnections over the millennia, contributing to the better understanding of the essential

human-environmental interrelations. The choice of 17 chapters of the book, written by a number of prominent scholars, clearly shows the necessity of the interdisciplinary approach to the Mediterranean identity issues. The book stresses the most serious concerns of the Mediterranean today - threats to biodiversity, risks, and hazards - mostly the increasing wildfires and finally depletion of traditional Mediterranean practices and landscapes, as constituent parts of the Mediterranean heritage.

Strategies for Differentiating

Instruction McGraw-Hill Education (UK)

This set of papers presents a description of the synthesis of hydrological problems and various environmental implications and management strategies for different highland and headwater regions of the

world. Regions covered include the Himalayas, Russian mountains, Amazonia, and upland Wales.

Comparative Archaeologies Crossbill Guides Foundation

"Three official languages have emerged: Croatian in Croatia, Serbian in Serbia, and both these languages plus Bosnian in Bosnia-Herzegovina. Bosnian, Croatian, Serbian, a Textbook introduces the student to all three. Dialogues and exercises appear in each language, presented side by side for easy comparison; in addition, Serbian is rendered in both its Latin and its Cyrillic spellings. Teachers may choose a single language to use in the classroom, or they may want to familiarize students with all three"--Book jacket.

Science & Business Media
 Archaeology, as with all of the social sciences, has always been characterized by competing theoretical propositions based on diverse bodies of locally acquired data. In order to fulfill local, regional expectations, different goals have been assigned to the practitioners of Archaeology in different regions. These goals might be entrenched in local politics, or social expectations behind cultural heritage research. This comprehensive book explores regional archaeologies from a sociological perspective—to identify and explain regional differences in archaeological practice, as well as their existing similarities. This work covers not only the currently-dominant Anglo-American archaeological paradigm, but also Latin

America, Western and Eastern Europe, Asia, and Africa, all of which have developed their own unique archaeological traditions. The contributions in this work cover these "alternative archaeologies," in the context of their own geographical, political, and socio-economic settings, as well as the context of the currently accepted mainstream approaches.

Hydrological Problems and Environmental Management in Highlands and Headwaters Bradt Travel Guides

Create a stimulating, well-paced teaching route through the 2016 GCSE History specification using this tailor-made series that draws on a legacy of market-leading history textbooks and the individual subject specialisms of the

author team to inspire student success. - Motivate your students to deepen their subject knowledge through an engaging and thought-provoking narrative that makes historical concepts accessible and interesting to today's learners - Embed progressive skills development in every lesson with carefully designed Focus Tasks that encourage students to question, analyse and interpret key topics - Take students' historical understanding to the next level by using a wealth of original contemporary source material to encourage wider reflection on different periods - Help your students achieve their potential at GCSE with revision tips and practice questions geared towards the changed assessment model, plus useful advice to aid exam preparation - Confidently navigate the

new AQA specification using the expert insight of experienced authors and teachers with examining experience This single core text contains all four period studies and the following wider world depth studies: - Conflict and tension, 1894-1918 - Conflict and tension, 1918-1939 - Conflict and tension between East and West, 1945-1972 - Conflict and tension in Asia, 1950-1975

This book gives an overview of the crucial events that took place during the passage from the Ottoman to the Venetian rules in the Dalmatian hinterland during the Candian and Morean Wars in the second half of the 17th century. The hinterland of the capital city of the Venetian dual province

of Dalmatia and Albania – the city of Zadar/Zara – has been used here as a case study to depict all the changes relating to: inhabitation, the appearance of settlements, changes in the populations and migrations, the forms and models of administrative and political institutions, specific border economies and the development of Venetian border areas through trade with the Ottomans alongside agriculture in the contado. Studied here is how the city of Zadar, whose life was organised as a typical coastal community like many in the Venetian Republic along with its contado, managed to enlarge its territory and incorporate elements of Ottoman political, administrative and cultural heritage along with thousands of Ottoman Christian subjects.

The Nature Guide to the Hortobágy and Tisza River Floodplain, Hungary

Cambridge University Press

In terms of energy security the Black Sea region is important to Europe. Inevitably and for very good reasons, a lot of attention has been given to the existing and planned pipeline routes going around or across the Black Sea. Much less attention has been given to the development of the Black Sea energy market in its own right and to the potential advantages of coping with some current and future energy issues in a multilateral regional format rather than through individual action at national level. The present book addresses, in a comprehensive manner, the current problematic of energy security and goes beyond pipeline politics, without playing

down their continued significance; it addresses some topical questions related to the sustainability and resilience of energy systems as applicable to the Black Sea region.

Servia by the Servians Vintage

An expanded edition of the original classic, long out-of-print, *The Mystic Symbol* describes thousands of Christian, inscribed tablets, unearthed across Michigan. The Michigan Mound Builders left behind 10,000 to 30,000 artifacts as a testament to their presence in North America. Mound burials have yielded evidence of a culture with Eastern Hemisphere influence in their spiritual and everyday life. Controversy has engulfed this find of artifacts mainly because they were here before Columbus of 1492 which is unacceptable

to our academics today. Nevertheless, the Michigan artifacts continue to surface even today in the state of Michigan. This is fascinating look into North America's diverse history.

Globalizacija, akulturacija i identiteti na Balkanu Springer

Finland has often been ignored or misunderstood by the English-speaking world and this work presents the reader with a readable and authoritative introduction to the life of the Finns and the position of their country in the modern world. The book explains how a small nation, placed in an unfavorable geopolitical situation, won its independence and eventually achieved a high material standard of living together with an enviable degree of social and political stability by adapting itself to the

realities of life in an unpromising environment. Copyright © Libri GmbH. All rights reserved.

Rivers of Europe Cambridge University Press

This book analyses the efforts throughout East Asia to deploy education for purposes of political socialization, and in particular in order to shape notions of identity. The chapters also examine the trend of 'common textbook initiatives', which have recently emerged in East Asia with the aim of helping to defuse tensions arguably fuelled by existing practices of mutual (mis)representation. These are analysed in relation to the East Asian political context, and compared with previous and ongoing endeavours in other parts of the world, particularly Europe, which

have been keenly observed by East Asian practitioners. Written by a group of international education experts, chapters discuss the enduring focus on the role of curricula in inculcating homogenous visions of the national self, and indeed homogenized visions of significant 'others'. Including contributions from scholars and curriculum developers involved personally in the writing of national and multi-national history textbooks this book will be of interest to students and scholars of Asian education, Asian history and comparative education studies. Gotelind Müller is Professor of Chinese Studies, University of Heidelberg, Germany

Mediterranean Identities University of Wisconsin Press

"If the Balkans hadn't existed, they would have been invented" was the verdict of Count Hermann Keyserling in his famous 1928 publication, *Europe*.

Over ten years ago, Maria Todorova traced the relationship between the reality and the invention. Based on a rich selection of travelogues, diplomatic accounts, academic surveys, journalism, and belles-lettres in many languages, *Imagining the Balkans* explored the ontology of the Balkans from the sixteenth century to the present day, uncovering the ways in which an insidious intellectual tradition was constructed, became mythologized, and is still being transmitted as discourse. Maria Todorova, who was raised in the Balkans, is in a unique position to bring both scholarship and sympathy to her subject, and in a new afterword she reflects on recent developments in the study of the Balkans and political developments on the ground since the

publication of *Imagining the Balkans*. The afterword explores the controversy over Todorova's coining of the term Balkanism. With this work, Todorova offers a timely, updated, accessible study of how an innocent geographic appellation was transformed into one of the most powerful and widespread pejorative designations in modern history.

Once part of the larger republic of

Yugoslavia, Slovenia is now an independent country with impressive Alpine scenery and charming Adriatic coastal towns. In addition to practical information on the country's accessible capital, Ljubljana, the Bradt guide explores off-the-beaten-track Slovenia including visits to wine-growing regions, hiking in the Julian Alps, white-water rafting and skiing. A strong emphasis on culture and history is combined with practical information on where to stay and eat, and how to get around.
