Now you can master Bach's most beautiful prelude—even if you've never sat down at a piano before! Do you have a piano (or keyboard) and forty-five spare minutes every day? Then spend the next six weeks with acclaimed concert pianist James Rhodes. By the end, you'll be able to perform Bach's Prelude No. 1 in C major—no prior musical experience required! Rhodes reveals How to Play the Piano step by step—how to read the treble and bass clefs as well as sharp and flat notes, and then how to practice—before teaching the Prelude in easy, bite-size segments. His method is free of tedious drills, and filled with inspiration: "If listening to music is soothing for the soul, then playing music is achieving enlightenment." Before you know it, not only will you have learned how to play one of Bach's most beloved masterpieces—you also will have unleashed your creativity, exercising your mind (and fingers) and accomplishing something you never thought possible. Bravo! Includes four instructional videos supported by select e-reader devices.

The Viewpoints Book Routledge

"Game Feel" exposes "feel" as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music (time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks where game design is concerned. They create the meta-sensation of involvement with a game. The understanding of how game designers create feel, and affect feel are only partially understood by most in the field and tends to be overlooked as a method or course of study, yet a game's feel is central to a game's success. This book brings the subject of feel to light by consolidating existing theories into a cohesive book. The book covers topics like the role of sound, ancillary indicators, the importance of metaphor, how people perceive things, and a brief history of feel in games. The associated web site contains a playset with ready-made tools to design feel in games, six key components to creating virtual sensation. There's a play palette too, so the designer can first experience the importance of that component by altering variables and feeling the results. The playset allows the reader to experience each of the sensations described in the book, and then allows them to apply them to their own projects. Creating game feel without having to program, essentially. The final version of the playset will have enough flexibility that the reader will be able to use it as a companion to the exercises in

the book, working through each one to create the feel described.

John L. Austin was one of the leading philosophers of the twentieth century. The William James Lectures presented Austin's conclusions in the field to which he directed his main efforts on a wide variety of philosophical problems. These talks became the classic How to Do Things with Words. For this second edition, the editors have returned to Austin's original lecture notes, amending the printed text where it seemed necessary. Students will find the new text clearer, and, at the same time, more faithful to the actual lectures. An appendix contains literal transcriptions of a number of marginal notes made by Austin but not included in the text. Comparison of the text with these annotations provides new dimensions to the study of Austin's work.

"The Twelve Healers And Other Remedies" is a book of herbal remedies and ingredients that may be used to treat a variety of ailments. The author claims that it is because of our fears, cares, and worries that we get ill; and, by treating these problems, we will be happier and healthier. To that end, he presents simple herbal remedies for a variety of problems ranging from indecision and apathy to hay fever and beyond. Contents include: "For Fear", "For Uncertainty", "For Insufficient Interest in Present Circumstances", "For Loneliness", "For Those Over-Sensitive to Influences and Ideas", "For despondency or Despair", "For Over-Care for Welfare of Others", etc. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-quality edition complete with the original text and artwork.

This text is a practical guide to the compositional techniques, resources, and technologies available to composers today. Each chapter traces the development of traditional and modern elements that form the foundation of music in the late twentieth century. Among the subjects discussed are interval exploration, serialism, pitch-class sets, twelve-tone music, electronic music, algorithmic

composition, and indeterminacy.

The Music of the Temporalists Apress

One book. Two readers. A world of mystery, menace and desire A young woman picks up a book left behind by a stranger. Inside it are his margin notes, which reveal a reader entranced by the story and by its mysterious author. She responds with notes of her own, leaving the book for the stranger, and so begins an unlikely conversation that plunges them both into the unknown. THE BOOK: *Ship of Theseus*, the final novel by a prolific but enigmatic writer named V. M. Straka, in which a man with no past is shanghaied onto a strange ship with a monstrous crew and launched on a disorienting and perilous journey. THE WRITER: Straka, the incendiary and secretive subject of one of the world's greatest mysteries, a revolutionary about whom the world knows nothing apart from the words he wrote and the rumours that swirl around him. THE READERS: Jennifer and Eric, a college senior and a disgraced grad student, both facing crucial decisions about who they are, who they might become, and how much they're willing to trust another person with their passions, hurts and fears. S., conceived by filmmaker J.J. Abrams and written by award-winning novelist Doug Dorst, is the chronicle of two readers finding each other in the margins of a book and enmeshing themselves in a deadly struggle between forces they don't understand. It is also Abrams and Dorst's love letter to the written word.

A Parisian drugstore owner (André Pogoriloffsky), a man in his early fifties, who is also a skilled amateur piano player, experiences a two year long mental trip to a parallel (Temporalist) world, as an avatar. He will soon find out that he was purposely "imported" there in order to be taught the basics of that culture's music theory. Pogoriloffsky is permanently accompanied by a local musicologist - Jean-Philippe, an expert in the European musical tradition - and, for a while, initiated by an old psychologist (Herr Sch... etc.) in the cognitive aspects of Temporalist music theory. The two men ask Pogoriloffsky to memorize as much as he is capable to from the theoretical notions that he is presented with so that, once returned to Paris, be able to transcribe all that information for the use of his own musical culture. The music of the Temporalists describes a journey into a parallel world that is populated with humans like us who just happened to have cultivated music as "the art of time" and not as "the art of sounds". Pogoriloffsky recounts all that experience with honesty, doing his best to meet his two guides' expectations.
