In thirteenth-century China, a Daoist monk named Gao Daokuan (1195-1277) composed a series of illustrated poems and accompanying verse commentary known as the Daoist Horse Taming Pictures. In this annotated translation and study, Louis Komjathy argues that this virtually unknown text offers unique insights into the transformative effects of Daoist contemplative practice. Taming the Wild Horse examines Gao's illustrated poems in terms of monasticism and contemplative practice, as well as the multivalent meaning of the "horse" in traditional Chinese culture and the consequences for both human and nonhuman animals. The Horse Taming Pictures consist of twelve poems, ten of which are equine-centered. They develop the metaphor of a "wild" or "untamed" horse to represent ordinary consciousness, which must be reined in and harnessed through sustained self-cultivation, especially meditation. The compositions describe stages on the Daoist contemplative path. Komjathy provides opportunities for reflection on contemplative practice in general and Daoist meditation in particular, which may lead to a transpersonal way of perceiving and being. *Daoist Modern* Univ of California Press

Nei Gong has been a well-kept secret within the Daoist sects of China for centuries. Based upon the original teachings of the great sage Laozi, it has only ever been taught to close students of the masters chosen as the heads of the ancient orders. This book provides a breakdown of the entire Nei Gong process, and explains in plain English the philosophy which underpins Nei Gong practice, and which is based on the original teachings of the ancient Daoist priests. The methodology of Sung breathing, an advanced meditative practice which has until now been reserved for 'inner-door' students is described, and the book contains an entire set of Qigong exercises accompanied by instructional photographs and drawings. This book will be of interest to all practitioners of Qi Gong, martial arts and meditation, and will be a rewarding read for anyone interested in Eastern philosophy. *Dream Trippers* Three Pine Press

Here in one slender volume is a basic introduction to Chinese alchemy—a tradition that dates back 5,000 years. Chinese alchemy, largely associated with Taoism, has a recorded history of more than 2,000 years, but traditionally it goes back even further to nearly 3000 BC and the time of the Yellow Emperor. While Western alchemy was concerned with the search for spiritual and material gold, classic Taoist alchemy was a mystical quest for immortality with its aim being union with the Absolute. Jean Cooper describes the history and development of Taoist alchemy, compares it to similar traditions in India and Turkistan, and gives it context by contrasting it with the rationale of the Western hermetic tradition. As she writes in her concluding chapter: The whole work of alchemy is summed up in the phrase "To make of the body a spirit and of the spirit a body". . . . The goal of the Taoist alchemist-mystic was transformation, or perhaps more correctly, transfiguration, of the whole body until it ceases to "be" and is absorbed into and becomes the Tao. This is an essential guide for anyone interested in Chinese legend and lore, Chinese magic and medicine, and Taoism.

The Routledge Handbook of Chinese Medicine is an extensive, interdisciplinary guide to the nature of traditional medicine and healing in the Chinese cultural region, and its plural epistemologies. Established experts and the next generation of scholars interpret the ways in which Chinese medicine has been understood and portrayed from the beginning of the empire (third century BCE) to the globalisation of Chinese products and practices in the present day, taking in subjects from ancient medical writings to therapeutic movement, to talismans for healing and traditional medicines that have inspired global solutions to contemporary epidemics. The volume is divided into seven parts: Longue Durée and Formation of Institutions and Traditions Sickness and Healing Food and Sex Spiritual and Orthodox Religious Practices The World of Sinographic Medicine Wider Diasporas Negotiating Modernity This handbook therefore introduces the broad range of ideas and techniques that comprise pre-modern medicine in China, and the historiographical and ethnographic approaches that have illuminated them. It will prove a useful resource to students and scholars of Chinese studies, and the history of medicine and anthropology. It will also be of interest to practitioners, patients and specialists wishing to refresh their knowledge with the latest developments in the field. The I Ching , or "Book of Change," is considered the oldest of the Chinese classics and has throughout history commanded unsurpassed prestige and popularity. Containing several layers of text and given numerous levels of interpretation, it has captured continuous attention for well over two thousand years. It has been considered a book of fundamental principles by philosophers, politicians, mystics, alchemists, yogins, diviners, sorcerers, and more recently by scientists and mathematicians. This first part of the present volume is the text of the I Ching proper—the sixty-four hexagrams plus sayings on the hexagrams and their lines—with the commentary composed by Liu I-ming, a Taoist adept, in 1796. The second part is Liu I-ming's commentary on the two sections added to the I Ching by earlier commentators, believed to be members of the original Confucian school; these two sections are known as the Overall Images and the Mixed Hexagrams. In total, the book illuminates the Taoist inner teachings as practiced in the School of Complete Reality. Well versed in Buddhism and Confucianism as well as Taoism, Liu I-ming intended his work to be read as a guide to comprehensive self-realization while living an ordinary life in the world. In his attempt to lift the veil of mystery from the esoteric language of the I

Ching , he employs the terminology of psychology, sociology, history, myth, and religion. This commentary on the I Ching stands as a major contribution to the elucidation of Chinese spiritual genius.

Within the context of a larger discussion of Dao Yin, Damo Mitchell teaches and explains the Dragon Dao Yin exercises, a set of four short sequences designed to work with the subtle energies of the spine and lead pathogenic energies out of the body. More 'Yang' in nature than Qi Gong, Dao Yin focuses on outwards movements and strong internal cleansing. The book highlights this important distinction and covers the theory, history and development of Dao Yin exercises, as well as the relationship between Chinese medical theory and Dao Yin training. One chapter is devoted to problems related to stagnation and the flow of Qi, and explains the different causes and forms of stagnation. Later chapters look at breathing patterns and the extension of Yi, opening the joints, and rotating the bones and spine. Damo Mitchell also discusses stillness as the source of movement, the philosophical significance of the Dragon and the pearl, and the means of hardwiring Dao Yin exercises into the energetic body. Central to the discussion is the concept of the spine, and how to wake it up. For the first time in the English language, the Dragon exercises – Awakening, Swimming, Soaring and Drunken – are described in detail, with photographs and step-by-step instructions on each of the exercises as individual therapeutic exercises and as a form.

The Encyclopedia of Taoism provides comprehensive coverage of Taoist religion, thought and history, reflecting the current state of Taoist scholarship. Taoist studies have progressed beyond any expectation in recent years. Researchers in a number of languages have investigated topics virtually unknown only a few years previously, while others have surveyed for the first time textual, doctrinal and ritual corpora. The Encyclopedia presents the full gamut of this new research. The work contains approximately 1,750 entries, which fall into the following broad categories: surveys of general topics; schools and traditions; persons; texts; terms; deities; immortals; temples and other sacred sites. Terms are given in their original characters, transliterated and translated. Entries are thoroughly cross-referenced and, in addition, 'see also' listings are given at the foot of many entries. Attached to each entry are references taking the reader to a master bibliography at the end of the work. There is chronology of Taoism and the whole is thoroughly indexed. There is no reference work comparable to the Encyclopedia of Taoism in scope and focus. Authored by an international body of experts, the Encyclopedia will be an essential addition to libraries serving students and scholars in the fields of religious studies, philosophy and religion, and Asian history and culture.

Over the past few decades, Daoism has become a recognizable part of Western "alternative" spiritual life. Now, that Westernized version of Daoism is going full circle, traveling back from America and Europe to influence Daoism in China. Dream Trippers draws on more than a decade of ethnographic work with Daoist monks and Western seekers to trace the spread of Westernized Daoism in contemporary China. David A. Palmer and Elijah Siegler take us into the daily life of the monastic community atop the mountain of Huashan and explore its relationship to the socialist state. They follow the international circuit of Daoist "energy tourism," which connects a number of sites throughout China, and examine the controversies around Western scholars who become practitioners and promoters of Daoism. Throughout are lively portrayals of encounters among the book's various characters—Chinese hermits and monks, Western seekers, and scholar-practitioners—as they interact with each other in obtuse, often humorous, and yet sometimes enlightening and transformative ways. Dream Trippers untangles the anxieties, confusions, and ambiguities that arise as Chinese and American practitioners balance cosmological attunement and radical spiritual individualism in their search for authenticity in a globalized world.

This is the first book to examine extensively the religious aspects of Chinese alchemy. Its main focus is the relation of alchemy to the Daoist traditions of the early medieval period (third to sixth centuries). It shows how alchemy contributed to and was tightly integrated into the elaborate body of doctrines and practices that Daoists built at that time, from which Daoism as we know it today evolved. The book also clarifies the origins of Chinese

alchemy and the respective roles of alchemy and meditation in self-cultivation practices. It contains full translations of three important medieval texts, all of them accompanied by running commentaries, making available for the first time in English the gist of the early Chinese alchemical corpus.

Explains the science behind the practice of nei kung, the elemental nature of yin and yang energy--the two components of ch'i, and how learning to control the yang energy in our ch'i can result in the release of dynamic energy. • Establishes the existence and understanding of nei kung in the practices of many of the world's ancient cultures. • Includes a step-by-step guide to the meditation that forms the basis of the practice of nei kung. • By Kosta Danaos, author of *The Magus of Java* and apprentice to an immortal of the Mo-Pai tradition. In 1994 Kosta Danaos was accepted as a student by John Chang, a Chinese-Javanese Taoist in the Mo-Pai tradition and a master of nei kung, the practice of harnessing and controlling our body's bioenergy, or ch'i. *Nei Kung: The Secret Teachings of the Warrior Sages* describes the practice of nei kung and how learning to control our ch'i can result in the release of dynamic energy that can be used for healing, pyrogenesis, telekinesis, levitation, telepathy, and more. Danaos suggests that both components of ch'i--yin and yang energy--are fundamental to the earth and to life and were recognized and used in many of the world's ancient cultures. Though we have forgotten how to access them, these components are in fact elemental parts of us. The author explains that we first must open our minds to the fact that the power of ch'i is real. Next, in learning to control our ch'i as a whole, we must learn to channel our yang energy in productive ways--a potential we all possess. To help readers understand their capacity to connect with this inner elemental power, the author offers a fascinating blend of teachings that include sound scientific theories explaining much of the "magic" of nei kung. He also offers historical, linguistic, artistic, and literary proof of the presence and understanding of nei kung throughout the ages and a step-by-step introduction to several types of simple meditation--fundamental to directing one's ch'i. With his engaging storytelling and disarming humor, his physics-based explanations for seemingly mystical phenomena, and his reassurances that he's really no different from the rest of us, Kosta Danaos shows us that once we remember our capacity to harness our yang energy, we can change ourselves and our world.

This book explores the Daoist encounter with modernity through the activities of Chen Yingning (1880-1969), a famous lay Daoist master, and his group in early twentieth-century Shanghai. In contrast to the usual narrative of Daoist decay, with its focus on monastic decline, clerical corruption, and popular superstitions, this study tells a story of Daoist resilience, reinvigoration, and revival. Between the 1920s and 1940s, Chen led a group of urban lay followers in pursuing Daoist self-cultivation techniques as a way of ensuring health, promoting spirituality, forging cultural self-identity, building community, and strengthening the nation. In their efforts to renew and reform Daoism, Chen and his followers became deeply engaged with nationalism, science, the religious reform movements, the new urban print culture, and other forces of modernity. Since Chen and his fellow practitioners conceived of the Daoist self-cultivation tradition as a public resource, they also transformed it from an "esoteric" pursuit into a public practice, offering a modernizing society a means of managing the body and the mind and of forging a new cultural, spiritual, and religious identity.
