CARLA PRESTON

The Reincarnation of a World War II Fighter Pilot
Simon and Schuster
A fully updated 2-in-1 edition, with a new introduction by the author, combining Dr. Jim B. Tucker's bestselling books about children who remember past lives—Return to Life and Life Before Life. These two books contain first-person accounts of Jim B. Tucker's experiences with a number of extraordinary children with memories of past lives, and expands on the international work started by Tucker's University of Virginia colleague Ian Stevenson. Tucker's work has been lauded by the likes of parapsychologist Carol Bowman and Deepak

Chopra, and has been described by some as quantum physics. His goal in each case of a child reporting memories of previous lives is to determine what happened—what the child has said, how the parents have reacted, whether the child's statements match the life of a particular deceased person, and whether the child could have learned such information through normal means. Tucker has found case studies that provide persuasive evidence that some children do, in fact, possess memories of previous lives. Thought-provoking and captivating, the stories in Before urge readers, skeptics and supporters alike to think about life, death, and reincarnation and to reflect about their own consciousness and

spirituality.

Is DEATH the FINAL CHAPTER? In The Big Book of Reincarnation, Roy Stemman attempts to answer one of the big questions of existence: Is death the end? Or, is it the merely the end of a chapter in the book of existence? A self-described "skeptical believer," Stemman uses his skills as a professional journalist to perform an in-depth exploration of reincarnation. Using case studies, anecdotes, and physical evidence from the best-documented cases from around the world, Stemman shines a bright light on this subject, inviting readers to decide for themselves on the basis of facts, rather than on the basis of hearsay, speculation, and superstition. Stemman

finds fascinating examples of evidence of reincarnation in the nightmares of a Louisiana bayou boy, the past-life recall of a renowned neurosurgeon, the research of a highly respected university professor, and the unique system of governance in the mountains of Tibet, to name just a few. He examines the lives of those affected by reincarnation, such as children who can actually remember their previous lives. Instead of shying away from the skeptics, Stemman evaluates their leading theories and compares them to the findings that he has accumulated throughout his global research. *The Big Book of Reincarnation* is thorough, well researched, engaging, and the most comprehensive book ever published on this fascinating subject. Readers who love Brian Weiss's *Many Lives, Many Masters* and *Only Love is Real* will appreciate the depth of study that the author brings to this work. Topics that have long been scoffed by skeptics, past lives and reincarnation are enjoying a revival of mainstream interest after prominent medical professionals and

scientists have added their personal experiences and research to a growing chorus of proof that the afterlife is no myth for the weak minded. Neurosurgeon Dr. Eben Alexander's book, *Proof of Heaven*, is one such example. The truth is, a deeper exploration of the human psyche and transpersonal psychology offers a frontier for the brightest minds of our day. Other popular books that explore these and related topics include: *The Wheel of Life* by Elisabeth Kübler-Ross, *Life After Death - The Burden of Proof* by Deepak Chopra, *Life After Life: The Bestselling Original Investigation That Revealed "Near-Death Experiences"* by Raymond Moody and many others. *My Side of the Mountain* Houghton Mifflin Harcourt When the Sudanese civil war reaches his village in 1985, 11-year-old Salva becomes separated from his family and must walk with other Dinka tribe members through southern Sudan, Ethiopia and Kenya in search of safe haven. Based on the life of Salva Dut, who, after emigrating to America in 1996, began a project to dig water wells in Sudan. By a Newbery Medal-winning author.

Have We Lived Before?

Flatiron Books

In this book children from England and the rest of Europe, the U.S.A, Lebanon, South Africa, Israel, India, Brazil, Sri Lanka and Turkey remember their past lives. Scientists - most notably Professor Ian Stevenson, Director of the Division of Personality Studies at the Health Sciences Center at the University of Virginia - report on how their stories are then followed up to verify that the children's memories are correct. Especially convincing are the cases of children born with missing limbs who are able to describe exactly where and when they lost these limbs in a past life. They also often know precisely who their parents and relatives were and where they lived. When the children's statements are subjected to scientific verification, they are invariably confirmed in every detail. Through these investigations, reincarnation is proved to be more than a belief or a philosophy, having been categorically proven through the statements of children. The scientific evidence, as presented in this book, shows reincarnation to be the

truth and all religions and philosophies will have to swiftly encompass these ideas into their existing concepts to maintain any credibility. We will all be talking and thinking about rebirth as a fact of life.

The concept of reincarnation belongs to the future and this is only the beginning. Trutz Hardo is the most well-known expert on reincarnation and regression therapy in Germany. He holds seminars in Europe, Australia and the U.S.A. He has appeared on several television programmes.

"Should appeal to all rugged individualists who dream of escape to the forest."—The New York Times Book Review Sam Gribley is terribly unhappy living in New York City with his family, so he runs away to the Catskill Mountains to live in the woods—all by himself. With only a penknife, a ball of cord, forty dollars, and some flint and steel, he intends to survive on his own. Sam learns about courage, danger, and independence during his year in the wilderness, a year that changes his life forever. "An extraordinary

"We cannot change the cards we are dealt, just how we play the hand."--- Randy Pausch A lot of professors give talks titled "The Last Lecture."

Professors are asked to consider their demise and to ruminate on what matters most to them.

And while they speak, audiences can't help but mull the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less than you think"). It

was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Hachette Books

In this book, children from all around the world remember their past lives, and eminent scientists explain how many of these children's stories have been followed up to verify whether their statements have any foundation in fact.

Incredibly, when subjected to scientific investigation, children's memories about their past lives can invariably be confirmed in every detail.

Supported by overwhelming scientific evidence, the children's stories in this book suggest that reincarnation is a reality for us all.

Whether they are from England, Europe, the USA, Lebanon, South Africa, Israel, India, Brazil, Sri Lanka or Turkey, children who have lived before offer us insights into our global future, as well as profound messages from

our collective past. This book is a must for anyone interested in the subject of reincarnation. '[Trutz Hardo presents] convincing evidence on reincarnation that will even give the toughest sceptic much to think about. I hope that finally many readers will learn the truth of reincarnation'

She consistently remembered her former life in minute detail from the earliest age. She was so insistent that a major investigation was conducted by an impartial committee. Even Mahatma Gandhi became involved and encouraged examination of the case. The results were published and submitted to scientists for analysis. No one was able to disprove the evidence and it was declared valid. This was not a case obtained

through the use of hypnosis or any other means. Shanti Devi also reveals the extremely vivid memories of her experiences after death, the period between her lives, and her return to a physical body.

Nineteenth-century British poet William Wordsworth expressed the idea that we gradually lose our intimate knowledge of heaven as we grow up, observing that "our birth is but a sleep and a forgetting" of our previous heavenly existence. Dr. Wayne W. Dyer and co-author Dee Garnes had often talked about how the ones who know the most about God are those who have just recently been wrapped in the arms of the Divine, our infants and toddlers. In fact, Dee had an interaction with her own young son that convinced her of this. Curious about this phenomenon, Wayne and Dee decided to issue an invitation to parents all over the world to share their experiences. The overwhelming response they received prompted them to put together this book, which includes the most interesting and illuminating of these stories in which very

young children speak about their remembrances before they were born. It seems that infants and toddlers often arrive here with memories of their lifetimes in the spirit world and frequently provide evidence of this to their immediate families. They tell of dialogues with God, give evidence that they themselves had a hand in picking their own parents, speak about long-deceased family members they knew while in the dimension of Spirit, verify past-life recollections, and speak eloquently and accurately of a kind of Divine love that exists beyond this physical realm--and even of times when telepathic communication took place, as well as the ability to decide just when they would come here to Earth. This fascinating book encourages parents and grandparents to take a much more active role in communicating with their new arrivals . . . and to realize that there is far more to this earthly experience than what we perceive with our five senses.

Life Before Life Random House

Eddie is a wounded war veteran, an old man who has lived, in his mind, an uninspired life. His job is fixing rides at a seaside amusement park. On his 83rd birthday, a tragic accident kills him, as he tries to save a little girl from a falling cart. He awakes in the afterlife, where he learns that heaven is not a destination. It's a place where your life is explained to you by five people, some of whom you knew, others who may have been strangers. One by one, from childhood to soldier to old age, Eddie's five people revisit their connections to him on earth, illuminating the mysteries of his "meaningless" life, and revealing the haunting secret behind the eternal question: "Why was I here?"

The Five People You Meet in Heaven

Hachette Books
Has your child lived before? In this fascinating, controversial, and groundbreaking book, Carol Bowman reveals

overwhelming evidence of past life memories in children. Not only are such experiences real, they are far more common than most people realize. Bowman's extraordinary investigation was sparked when her young son, Chase, described his own past-life death on a Civil War battlefield--an account so accurate it was authenticated by an expert historian. Even more astonishing, Chase's chronic eczema and phobia of loud noises completely disappeared after he had the memory. Inspired by Chase's dramatic healing, Bowman compiled dozens of cases and wrote this comprehensive study to explain how very young children remember their past lives, spontaneously and naturally. In *Children's Past Lives*, she tells how to distinguish between a true past life memory and a fantasy, offers practical advice to parents on how to respond to a past life memory, and shows how to foster the spiritual and healing benefits of these experiences. Perhaps the most moving, convincing, and best-documented evidence yet for life after death, *Children's Past Lives* will stand alongside

the classics of Betty J. Eadie, Raymond Moody, and Brian Weiss in its power to comfort, uplift, and transform our thinking about life after death

In this book children from all over the world remember their past lives. When the children's statements are subjected to scientific verification, they are invariably confirmed in every detail. The Last Lecture Bantam "What if what you did mattered more because life happened again and again, consequences unfolding across decades and continents?...A relentlessly paced page-turner and a profound meditation on the meaning of life."

—Christina Baker Kline, #1 New York Times bestselling author of *The Orphan Train* What happens to us after we die? What happens before we are born? At once a riveting mystery and a testament to the profound connection between a child and parent, *The Forgetting Time* will lead you to reevaluate everything you believe... What would you do if your four-year-old son claimed he had lived another life and that he wants to go back to it? That he wants

his other mother? Single mom Janie is trying to figure out what is going on with her beloved son Noah. Noah has never been ordinary. He loves to make up stories, and he is constantly surprising her with random trivia someone his age has no right knowing. She always chalked it up to the fact that Noah was precocious—mature beyond his years. But Noah's eccentricities are starting to become worrisome. One afternoon, Noah's preschool teacher calls Janie: Noah has been talking about shooting guns and being held under water until he can't breathe. Suddenly, Janie can't pretend anymore. The school orders him to get a psychiatric evaluation. And life as she knows it stops for herself and her darling boy. For Jerome Anderson, life as he knows it has already stopped. Diagnosed with aphasia, his first thought as he approaches the end of his life is, I'm not finished yet. Once an academic star, a graduate of Yale and Harvard, a professor of psychology, he threw everything away to pursue an obsession: the stories of children who remembered past lives. Anderson became the

laughing stock of his peers, but he never stopped believing that there was something beyond what anyone could see or comprehend. He spent his life searching for a case that would finally prove it. And with Noah, he thinks he may have found it. Soon, Noah, Janie, and Anderson will find themselves knocking on the door of a mother whose son has been missing for eight years. When that door opens, all of their questions will be answered. Gorgeously written and fearlessly provocative, Sharon Guskin's debut explores the lengths we will go for our children. It examines what we regret in the end of our lives and hope for in the beginning, and everything in between.

30 Most Convincing Cases Of Reincarnation Penguin

This is the revised edition of Dr. Stevenson's 1987 book, summarizing for general readers almost forty years of experience in the study of children who claim to remember previous lives. For many Westerners the idea of reincarnation seems remote and bizarre; it is the author's intent to correct some common misconceptions. New material relating to

birthmarks and birth defects, independent replication studies with a critique of criticisms, and recent developments in genetic study are included. The work gives an overview of the history of the belief in and evidence for reincarnation.

Representative cases of children, research methods used, analyses of the cases and of variations due to different cultures, and the explanatory value of the idea of reincarnation for some unsolved problems in psychology and medicine are reviewed.
