It starts with a fast, practical introduction to what ICS can do for your business and then shows how ICS allows you to develop integrations not only quickly but in a way that means they are maintainable and extensible. Gradually it moves into more advanced integrations, showing how to achieve sophisticated results with ICS and work with external applications. Finally the book shows you how to monitor cloud apps and go beyond ICS to build even more powerful integrated applications. *Are You an Ostrich or a Llama?* Written by one of the world's most published authors in the field of hospitality, this book represents a radical departure from traditional texts in the industry. Targeted at hotel management, this book is intended to serve as a platform for discussion on current issues relating to the performance of hotels and resorts. Through a combination of real life examples and an examination of current challenges facing the hotel industry, the book comprises approximately one hundred individual segments each dedicated to a single thought or concept. These stand alone articles are then combined into ten chapters, each dedicated to a specific topic. The book has been written so that hoteliers of any level, from apprentice to seasoned general manager will be able to gain value from the contents. While the bulk of articles deal with marketing aspects, many of the items relate to core operational issues. A theme common throughout is to recognize the importance of guest service as it relates to the industry. For those who are not involved in the hotel industry, but have careers that involve customer service, s the practical hints provided throughout the text, serve as excellent training pointers. So, why the title? Ostriches are classically known as avoiding conflict by putting their head in the sand. While probably not true, the stigma remains, and those who are considered an ostrich, are living in the past. Llamas, on the other hand, are considered utilitarian, hardworking and reliable. This is what you want to strive for. By reading this book, and digesting the contents, the hope is to move from ostrich to llama.

Los procesos comerciales en la industria de la hostelería, como toda industria en la actualidad, están atravesados por las nuevas tecnologías que aportan rapidez, eficiencia y posibilidad de control al ámbito de la gestión. La industria del turismo, y en especial todo lo relacionado con el hospedaje y la alimentación del viajero, se mueve con una fuerte dinámica, y la rapidez de la respuesta es uno de los aspectos prioritarios junto con la necesidad de lograr la total satisfacción de las demandas tanto de clientes como de proveedores. En todos estos procesos, las tecnologías de la información (TI), los sistemas de información (IS) y los sistemas de gestión de la información (MIS) son la herramienta clave en el éxito de los procesos vinculados tanto en las operaciones diarias como en la planificación. Este libro, dirigido tanto a estudiantes como a profesionales vinculados a la hostelería, es el resultado de una colaboración entre autores que han vivido las situaciones que se plantean en él. Cada capítulo cuenta con entrevistas a líderes de la industria en las que se reconocen casos concretos de aplicación de tecnología en la hostelería. Sin dudas, las nuevas tecnologías ofrecen un mayor número de oportunidades tanto a gerentes como a clientes; desde hacer una reserva a través de una aplicación, hasta la experimentación de un servicio mediante recursos tecnológicos de realidad aumentada. De ahí la importancia, necesidad y pertinencia de este libro, que alcanza con esta su tercera edición, primera en español.
