This open access book examines the future of inequality, work and wages in the age of automation with a focus on developing countries. The authors argue that the rise of a global 'robot reserve army' has profound effects on labor markets and economic development, but, rather than causing mass unemployment, new technologies are more likely to lead to stagnant wages and premature deindustrialization. The book illuminates the debate on the impact of automation upon economic development, in particular issues of poverty, inequality and work. It highlights public policy responses and strategies—ranging from containment to coping mechanisms—to confront the effects of automation.

Nearly four decades ago, Dilip Hiro's *Inside India Today*, banned by Indira Gandhi's government, was acclaimed by *The Guardian* as simply "the best book on India." Now Hiro returns to his native country to chronicle the impact of the dramatic economic liberalization that began in 1991, which ushered India into the era of globalization. Hiro describes how India has been reengineered not only in its economy but also in its politics and cultural mores. Places such as Gurgaon and Noida on the outskirts of Delhi have been transformed from nondescript towns into forests of expensive high-rise residential and commercial properties. Businessmen in Bollywood movies, once portrayed as villains, are now often the heroes. The marginal, right-wing Hindu militants of the past now rule the nominally secular nation, with Prime

Minister Narendra Modi as their avatar, one whose electoral victory was funded by big business. Hiro provides a gripping account of the role played by Indians who have settled in the United States and Britain since 1991 in boosting India's GDP. But he also highlights the negatives: the exponential growth in sleaze in the public and private sectors, the impoverishment of farmers, and the rise in urban slums. A masterful panorama, *The Age of Aspiration* covers the whole social spectrum of Indians at home and abroad.
