Report of the
Commissioner of
Education for Puerto Rico
Houghton Mifflin Harcourt
Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that

of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the

school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included:

recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

Papers and Addresses Presented at the Annual Meeting of the Technical Association of the Pulp and Paper Industry

"This eloquent, elegant book thoughtfully plumbs the . . . consequences of our dependence on plastics" (The Boston Globe, A Best Nonfiction Book of 2011). From

pacemakers to disposable bags, plastic built the modern world. But a century into our love affair, we're starting to realize it's not such a healthy relationship. As journalist Susan Freinkel points out in this eye-opening book, we're at a crisis point. Plastics draw on dwindling fossil fuels, leach harmful chemicals, litter landscapes, and destroy marine life. We're drowning in the stuff, and we need to start making some hard choices.

Freinkel tells her story through eight familiar plastic objects: a comb, a chair, a Frisbee, an IV bag, a disposable lighter, a grocery bag, a soda bottle, and a credit card. With a blend of lively anecdotes and analysis, she sifts through scientific studies and economic data, reporting from China and across the United States to assess the real impact of plastic on our lives. Her conclusion is severe, but not without hope. Plastic points the way toward a new creative partnership with the material we love, hate, and can't seem to live without. "When you write about something so ubiquitous as plastic, you must be prepared to write in several modes, and Freinkel rises to this task.

... She manages to render the most dull chemical reaction into vigorous, breathless sentences." —SF Gate "Freinkel's smart, well-written analysis of this love-hate relationship is likely to make plastic lovers take pause, plastic haters reluctantly realize its value, and all of us understand the importance of individual action, political will, and technological innovation in weaning us off our addiction to synthetics." —Publishers Weekly "A compulsively interesting story. Buy it (with cash)." —Bill McKibben, author of *The End of Nature* "What a great read—rigorous, smart, inspiring, and as seductive as plastic itself." —Karim Rashid, designer

Physical Sciences, Grade 10

Early adolescence can be a challenging time for children and parents alike. Parents often feel unprepared and they may view the years from 10 through 14 as a time just "to get through."

However, research and common sense tell us that this view is very limited. During the early adolescent years, parents and families can greatly influence the growth and development of their

children. We sell our children short if we expect little from them and we sell ourselves short if we believe that we have no influence. A growing awareness that young adolescents can accomplish a great deal is behind a national effort to improve education in America's middle grades. At the heart of the No Child Left Behind Act of 2001 is a promise to raise standards for all children and to help all children meet those standards. In support of this goal, President George W. Bush is committed to promoting the very best teaching programs. Well-trained teachers and instruction that is based on research can bring the best teaching approaches and programs to children of all ages and help ensure that no child is left behind.

Helping Your Child through Early Adolescence is part of the president's efforts to provide parents with the latest research and practical information that can help you support your children both at home and in school. It's not easy to raise a young teen. Many outside influences distract our children and complicate our efforts. Exhaustion, anxiety, a lack of support and

limited resources may make it hard for us to be all that we want to be for our children. But whatever the challenges, we share one aim: to do the best job possible as parents. We hope that you will find this publication helpful in achieving this goal.
