Bizarre illnesses and plagues that kill people in the most unspeakable ways. Obsessive and inspired efforts by scientists to solve mysteries and save lives. From *The Hot Zone* to *The Demon in the Freezer* and beyond, Richard Preston's bestselling works have mesmerized readers everywhere by showing them strange worlds of nature they never dreamed of. *Panic in Level 4* is a grand tour through the eerie and unforgettable universe of Richard Preston, filled with incredible characters and mysteries that refuse to leave one's

mind. Here are dramatic true stories from this acclaimed and award-winning author, including:

- The phenomenon of "self-cannibals," who suffer from a rare genetic condition caused by one wrong letter in their DNA that forces them to compulsively chew their own flesh—and why everyone may have a touch of this disease.
- The search for the unknown host of Ebola virus, an organism hidden somewhere in African rain forests, where the disease finds its way into the human species, causing outbreaks of unparalleled horror.
- The brilliant Russian brothers—"one mathematician divided between two bodies"—who built a supercomputer in their apartment from mail-order parts in an attempt to find hidden order in the number pi (π). In fascinating, intimate, and exhilarating

detail, Richard Preston portrays the frightening forces and constructive discoveries that are currently roiling and reordering our world, once again proving himself a master of the nonfiction narrative and, as noted in *The Washington Post*, “a science writer with an uncommon gift for turning complex biology into riveting page-turners.”

"The long and illustrious career of Edouard Vuillard spans the fin-de-siecle and the first four decades of the twentieth century, during which time the French painter, printmaker, and photographer created an extraordinary body of work. This is the first volume to explore Vuillard's rich and varied career in its totality, presenting nearly 350

works that demonstrate the full range of his subject matter and reveal both the public and private sides of this quintessentially Parisian artist." "In a series of illustrated essays and catalogue entries, the authors explore Vuillard's complex and diverse artistic development, beginning with his academic training in Paris in the late 1880s and the innovative Nabi paintings of the 1890s for which he is best known, including his provocative, disquieting middle-class interiors and his work associated with the avant-garde theatre. The authors also examine Vuillard's splendid but lesser known large-scale decorations, his luminous landscapes, and the elegant portraits from the last decades of his career. In addition to paintings, the volume includes a

substantial selection of drawings and graphics, together with a large group of striking photographs by the artist, many of which are published here for the first time." "This illustrated catalogue accompanies the most comprehensive exhibition ever devoted to the work of Edouard Vuillard (1868-1940). The exhibition opens at the National Gallery of Art in Washington and travels to the Montreal Museum of Fine Arts, the Galeries nationales du Grand Palais in Paris, and the Royal Academy of Arts, London."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Whether we realize it or not, our churches are full of those who have experienced and are living with the aftereffects of horror and trauma, whether as survivors, carers, or perpetrators. The central question of this book is simple: How can our churches become open to the Trinity such that they are trauma-safe environments for everyone? How can we join the triune God to become trauma-safe churches? While the reality is bleak, the church can dare to hope for healing because of the reality of God and the body of Christ. Using the metaphor of the dawn of Sunday, the authors propose a double witness to trauma that straddles the boundary between the deadly silence of

Holy Saturday and the joy of Easter Sunday. While witnessing loss and lament we can also be open to the possibility of new life through God's trinitarian works of safety and recovery in the church. This involves adopting some basic principles and practices of trauma safety that every pastor, congregation, and layperson can begin using today. Creating trauma-safe churches is possible through God the Trinity.

From Holden Caulfield to Moses Herzog, our best literature has been narrated by malcontents. To this lineage add Peter Jernigan, who views the world with ferocious intelligence, grim rapture, and a chainsaw wit that he turns, with disastrous consequences, on his wife, his

teenaged son, his dangerously vulnerable mistress—and, not least of all, on himself. This novel is a bravura performance: a funny, scary, mesmerizing study of a man walking off the edge with his eyes wide open—wisecracking all the way.

Life and Letters of Zachary Macaulay

NEW YORK TIMES BESTSELLER • An urgent wake-up call about the future of emerging viruses and a gripping account of the doctors and scientists fighting to protect us, told through the story of the deadly 2013–2014 Ebola epidemic “Crisis in the Red Zone reads like a thriller. That the story it tells is all true makes it all more terrifying.”—Elizabeth Kolbert, Pulitzer Prize-winning author of *The Sixth Extinction* From the #1

bestselling author of *The Hot Zone*, now a National Geographic original miniseries . . . This time, Ebola started with a two-year-old child who likely had contact with a wild creature and whose entire family quickly fell ill and died. The ensuing global drama activated health professionals in North America, Europe, and Africa in a desperate race against time to contain the viral wildfire. By the end—as the virus mutated into its deadliest form, and spread farther and faster than ever before—30,000 people would be infected, and the dead would be spread across eight countries on three continents. In this taut and suspenseful medical drama, Richard Preston deeply chronicles the pandemic, in which we saw for the first time the specter of Ebola jumping continents,

crossing the Atlantic, and infecting people in America. Rich in characters and conflict—physical, emotional, and ethical—*Crisis in the Red Zone* is an immersion in one of the great public health calamities of our time. Preston writes of doctors and nurses in the field putting their own lives on the line, of government bureaucrats and NGO administrators moving, often fitfully, to try to contain the outbreak, and of pharmaceutical companies racing to develop drugs to combat the virus. He also explores the charged ethical dilemma over who should and did receive the rare doses of an experimental treatment when they became available at the peak of the disaster. *Crisis in the Red Zone* makes clear that the outbreak of 2013–2014 is

a harbinger of further, more severe outbreaks, and of emerging viruses heretofore unimagined—in any country, on any continent. In our ever more interconnected world, with roads and towns cut deep into the jungles of equatorial Africa, viruses both familiar and undiscovered are being unleashed into more densely populated areas than ever before. The more we discover about the virosphere, the more we realize its deadly potential. *Crisis in the Red Zone* is an exquisitely timely book, a stark warning of viral outbreaks to come. *Active Isolated Stretching* iUniverse In this book, Suzanne Preston Blier examines the intersection of art, risk and creativity in early African arts from the Yoruba center of Ife and the striking ways that ancient Ife artworks inform

society, politics, history and religion. Yoruba art offers a unique lens into one of Africa's most important and least understood early civilizations, one whose historic arts have long been of interest to local residents and Westerners alike because of their tour-de-force visual power and technical complexity. Among the complementary subjects explored are questions of art making, art viewing and aesthetics in the famed ancient Nigerian city-state, as well as the attendant risks and danger assumed by artists, patrons and viewers alike in certain forms of subject matter and modes of portrayal, including unique genres of body marking, portraiture, animal symbolism and regalia. This volume celebrates art, history and the shared passion and skill with which the

remarkable artists of early life sought to define their past for generations of viewers.

The Wild Rose Aaron Mattes Therapy Now in paperback, evolutionary biologist and science writer Alanna Collen's stunning alarm call concerning the widely-ignored role our gut microbes play in our health and well-being. "Fascinating.... Everything you wanted to know about microbes but were afraid to ask."— Kirkus Reviews (starred review) You are just 10% human. For every one of the cells that make up the vessel that you call your body, there are nine impostor cells hitching a ride. You are not just flesh and blood, muscle and bone, brain and skin, but also bacteria and fungi. Over your lifetime, you will

carry the equivalent weight of five African elephants in microbes. You are not an individual but a colony. Until recently, we had thought our microbes hardly mattered, but science is revealing a different story, one in which microbes run our bodies and becoming a healthy human is impossible without them. In this riveting, shocking, and beautifully written book, biologist Alanna Collen draws on the latest scientific research to show how our personal colony of microbes influences our weight, our immune system, our mental health, and even our choice of partner. She argues that so many of our modern diseases—obesity, autism, mental illness, digestive disorders, allergies, autoimmunity afflictions, and even cancer—have their root in our failure to

cherish our most fundamental and enduring relationship: that with our personal colony of microbes. The good news is that unlike our human cells, we can change our microbes for the better. Collen's book is a revelatory and indispensable guide. Life—and your body—will never seem the same again. Few directors of the 1930s and 40s were as distinctive and popular as Preston Sturges, whose whipsmart comedies have entertained audiences for decades. This book offers a new critical appreciation of Sturges' whole oeuvre, incorporating a detailed study of the last ten years of his life from new primary sources. Preston Sturges details the many unfinished projects of Sturges' last decade, including films, plays, TV series and his autobiography. Drawing on diaries, sketchbooks, correspondence, unpublished screenplays and more, Nick Smedley and Tom Sturges present the writer-director's final years in more

detail than we've ever seen, showing a master still at work – even if very little of that work ultimately made it to the screen or stage.
