A Short History of the Movies McGraw-Hill Education

In this remarkably accessible, concise, and engaging introduction to moral philosophy, Steven M. Cahn brings together a rich, balanced, and wide-ranging collection of fifty-two readings on ethical theory and contemporary moral issues. He has carefully edited all the articles to ensure that they will be exceptionally clear and understandable to undergraduate students. The selections are organized into three parts--Challenges to Morality, Moral Theories, and Moral Problems--providing instructors with flexibility in designing and teaching a variety of ethics courses. Each reading is followed by study questions. The fifth edition features twelve new articles and unparalleled representation of women philosophers, with nearly half of the essays authored or coauthored by women. A password-protected Instructor's Manual is available on the book's Ancillary Resource Center. Visit the book's free, open-access Companion Website for additional student and instructor resources.

This fifth edition incorporates material from the vast array of new literature, along with suggestions from readers. This new edition places greater emphasis on the ideological aspects of the German war against the Soviet Union, including the notorious "commissar order," as well as the complicity of the Wehrmacht in Nazi atrocities on the Eastern Front. It also pays more attention to Stalin's initial failure to react to the invasion and the Soviet murder of German prisoners. There is increased coverage of the Holocaust, including a consideration of the reasons why the Western Allies were not able to intercede in behalf of the European Jews.

An Introductory Anthology Macmillan

Now your students can become intelligent consumers of scientific research, without being overwhelmed by the statistics! Jaccard and Becker's text teaches students the basic skills for analyzing data and helps them become intelligent consumers of scientific information. Praised for its real-life applications, the text tells students when to use a particular statistic, why they should use it, and how the statistic should be computed and interpreted. Because many students, given a set of data, cannot determine where to begin in answering relevant research questions, the authors explicate the issues involved in selecting a statistical test. Each statistical technique is introduced by giving instances where the test is most typically applied followed by an interesting research example (each example is taken from psychology literature).

"This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and exercises and critical thinking activities end each section"--BCcampus website.

Critical Thinking, Reading, and Writing is a compact but complete guide to critical thinking and argumentation. Comprising the text portion of the widely adopted *Current Issues and Enduring Questions*, it draws on the authors' dual expertise in effective persuasive writing and comprehensive rhetorical strategies to help students move from critical thinking to argumentative and researched writing. This extraordinarily versatile text includes comprehensive coverage of classic and contemporary approaches to argument, from Aristotelian to Toulmin, to a new chapter on rhetorical analysis of pop culture texts, as well as 35 readings (including e-Pages that allow students to take advantage of working with multimodal arguments on the Web), and a casebook on the state and the individual. This affordable guide can stand alone or supplement a larger anthology of readings.

A Brief Guide to Writing Essays Macmillan

In this fresh new offering to the Intro Psychology course, authors John Cacioppo and Laura Freberg portray psychology as being an integrative science in two ways. First, they have written a text that reflects psychology's rightful place as a hub science that draws from and is cited by research in many other fields. Second, this text presents psychology as a unified science that seeks a complete understanding of the human mind, rather than as a loosely organized set of autonomous subspecialties. As psychology moves rapidly toward maturity as an integrative, multidisciplinary field, the introductory course offers an opportunity to teach all of psychology in one place and at one time. This text reflects that evolution--and the authors' excitement about it.
