Asustek has introduced a single line of ultra-portable computers that could surpass all of Apple's Macintosh sales. Of that total, about 1.6 million units will be equipped not with Windows, but Xandros Linux. The Eee is designed to open up new market segments: In the U.S and other developed nations, it will be targeted largely at school students. Equipped with both "learning" programs as well as office and internet applications, the Eee will provide everything that students need regardless of their grade level. Because it is an ultra-light, highly mobile, yet fully capable computer, it will also appeal to business users and first-time computer buyers. This book will cover everything, from turning the machine on and connecting it to the internet, to how to upgrade, update, and generally get the most from these tiny computers.

### C202SA and C300SA Keith I Myers

An accessible and comprehensive guide to the future of computing. Cloud Computing is the next computing revolution and will have as much impact on your life as the introduction of the PC. Using websites including Facebook, Flickr and Gmail, many people already store some information out in the Internet cloud. However, within a few years most computing applications will be accessed online with the web at the heart of everything we do. In this valuable guide, expert Christopher Barnatt explains how computing will rapidly become more reliable, less complex, and more environmentally friendly. He explores online software and hardware, and how it will alter our office work and personal lives. Individuals and companies are going to be released from the constraints of desktop computing and expensive corporate data centres. New services like augmented reality will also become available. Including coverage of Google Docs, Zoho, Microsoft Azure, Amazon EC2 and other key developments, this book is your essential guide to the cloud computing revolution.
