Esta publicación recoge las ponencias plenarias y las comunicaciones presentadas y leídas en el VII Simposio Internacional de la SEDLL, que con el título Canon, literatura infantil y juvenil y otras literaturas, fue asumido por la Universidad de Castilla-La Mancha y se celebró en Ciudad Real, en diciembre de 2001. Aparecen aquí recogidas también las actividades relacionadas con los estudios mencionadas arriba: talleres y seminarios que suscitaron provechosas discusiones, sugerencias y debates. Como dice Alfredo Rodríguez López-Vázquez en la Presentación: La celebración del VII Simposio con su doble concreción en el título, del objeto de estudio, y de su relación con el canon, ha venido a representar un hito importante. Este Simposio pretendía, ya desde su diseño por parte del Comité Científico, un nuevo planteamiento de orientaciones críticas y metodológicas en el ámbito de la educación y de la investigación en torno a la literatura que leen los niños y los jóvenes de hoy en día en el contexto de la sociedad tecnológica moderna. Creemos que esta publicación permite afirmar que se ha cumplido con los objetivos previstos para cada una de las áreas temáticas.

The Christmas Story R. R. Bowker

Una apasionante historia que cambió la teoría de los números en plena devastación a causa de la Primera Guerra Mundial. Una mañana de enero de 1913, G. H. Hardy –de treinta y siete años, excéntrico y carismático, y considerado ya uno de los más grandes matemáticos británicos de su tiempo– recibe un sobre misterioso con abundantes sellos indios. Dentro encuentra una carta un tanto incoherente de un humilde contable de Madrás, Srinivasa Ramanujan, que afirma estar muy cerca de encontrar la solución de uno de los más importantes –y nunca resueltos– problemas matemáticos de la época. Algunos colegas de Hardy en Cambridge piensan que eso es un cuento chino y no hacen caso de la misiva, pero él está cada vez más convencido de que Srinivasa Ramanujan merece ser tomado en serio. Y con la ayuda de su asistente Littlewood y del joven profesor Neville y su esposa Alice, que irán muy pronto a Madrás, Hardy decide averiguar todo lo que pueda sobre el misterioso Ramanujan, y hasta se propone convencerlo de que vaya a Cambridge. Esa decisión cambiará no sólo su propia vida y la de sus amigos, sino también la historia de la ciencia. El contable hindú está basada en la historia verdadera de la extraña y finalmente trágica relación entre un admirado matemático británico y un genio autodidacta y desconocido; una historia donde tuvieron un papel intelectuales como D. H. Lawrence, Bertrand Russell y Ludwig Wittgenstein. David Leavitt explora un período fascinante de la historia y la cultura en una novela apasionante, sutil y llena de matices acerca de la fragilidad de las relaciones humanas y nuestra necesidad de encontrar un orden en el mundo.

Nuevas y viejas formas de contar Dial Press

From the prolific author of The Moon Within comes the heart-wrenchingly beautiful story in verse of a young Latinx girl who learns to hold on to hope and love even in the darkest of places: a family detention center for migrants and refugees. Nine-year-old Betita knows she is a crane. Papi has told her the story, even before her family fled to Los Angeles to seek refuge from cartel wars in Mexico. The Aztecs came from a place called Aztlan, what is now the Southwest US, called the land of the cranes. They left Aztlan to establish their great city in the center of the universe-Tenochtitlan, modern-day Mexico City. It was prophesized that their people would one day return to live among the cranes in their promised land. Papi tells Betita that they are cranes that have come home. Then one day, Betita's beloved father is arrested by Immigration Customs Enforcement (ICE) and deported to Mexico. Betita and her pregnant mother are left behind on their own, but soon they too are detained and must learn to survive in a family detention camp outside of Los Angeles. Even in cruel and inhumane conditions, Betita finds heart in her own poetry and in the community she and her mother find in the camp. The voices of her fellow asylum seekers fly above the hatred keeping them caged, but each day threatens to tear them down lower than they ever thought they could be. Will Betita and her family ever be whole again? This critically acclaimed novel, Land of the Cranes, joins the Scholastic Gold line, which features award-winning and beloved novels. Includes exclusive bonus content!

In an era where many believe Big Data has rendered human perception and observation 'old-school' or passe, Martin Lindstrom shows that mining and matching technological data with up-close psychological insight creates the ultimate snapshot of who we really are and what we really want. He works like a modern-day Sherlock Holmes, accumulating small clues - the progressively weaker handshakes of Millenials, a notable global decrease in the use of facial powder, a change in how younger consumers approach eating ice cream cones - to help solve a stunningly diverse array of challenges. 'Small Data' presents a rare behind-the-scenes look at what it takes to create global brands, and reveals surprising and counter-intuitive truths about what connects us all as humans

“Marvelous . . . [Vonnegut] wheels out all the complaints about America and makes them seem fresh, funny, outrageous, hateful and lovable.”—The New York Times In Breakfast of Champions, one of Kurt Vonnegut’s most beloved characters, the aging writer Kilgore Trout, finds to his horror that a Midwest car dealer is taking his fiction as truth. What follows is murderously funny satire, as Vonnegut looks at war, sex, racism, success, politics, and pollution in America and reminds us how to see the truth. “Free-wheeling, wild and great . . . unquely Vonnegut.”—Publishers Weekly
