Problem 1:Ratio Analysis_ Problems and Solutions _ Accounting ...ADVERTISEMENT: List of top five problems on financial ratios with its relevant solution. Problem # 1: The working capital of ABC Ltd. has deteriorated in recent years and now stands as under: (a) Compute the current and quick ratios. ADVERTISEMENTS: (b) A further bank loan of Rs. 50,000 against debtors is under negotiation. Assuming the [...]Top 5 Problems on Financial Ratios (With Solution)The angles of a triangle are in the ratio 1:3:8. Find the measures of the three angles of this triangle. Solution If the ratio of the three angles is 1:3:8, then the measures of these angles can be written as x, 3x and 8x. Also the sum of the three interior angles of a triangle is equal to 180°. Hence x + 3x + 8x = 180 Solve for x 12x = 180 x = 15Ratio Maths Problems with Solutions and Explanations for ...Ratio Problems: Two-Term Ratios. Example 1: In a bag of red and green sweets, the ratio of red sweets to green sweets is 3:4. If the bag contains 120 green sweets, how many red sweets are there? Solution: Step 1: Assign variables: Let x = number of red sweets. Write the items in the ratio as a fraction. Step 2: Solve the equation. Cross Multiply 3 x 120 = 4 x x 360 = 4x. Isolate variable xRatio Word Problems (video lessons, examples and solutions)Hard ratio word problems. Example #4: Suppose the width of a soccer field 60 meters and the length is 100 meters. What is the ratio in simplest form of the length to the area of the field? Solution: The area of the field is 60 x 100 = 6000 The ratio of the length to the area is 100 to 6000, 100:6000 or 100/6000. 100/6000 = 1/60 The ratio of the length to the area in simplest form is 1/60Ratio Word Problems with Answers - Basic MathematicsRatio analysis is a technique of

financial analysis to compare data from financial statements to history or competitors. It focuses on ratios that reflect the profitability, efficiency, financing leverage, and other vital information about a business.
