Whether you are interpreting the medical literature to optimize patient care, improve health outcomes, or generate hypothesis for research, an understanding of biostatistics is essential for success. Despite exposure to biostatistics in undergraduate and professional education, pharmacists tend to be less confident in their knowledge of biostatistics and their ability to interpret the medical literature than in their clinical skills. This book was developed to bolster the pharmacist's knowledge and confidence for using biostatistical tools for interpreting the literature. With material drawn from ACCP's renowned Pharmacotherapy Self-Assessment Program (PSAP) and the live pharmacotherapy preparatory course Updates in Therapeutics, editor Robert DiCenzo, Pharm.D., FCCP, BCPS, has designed this review to support pharmacists' preparation for the Pharmacotherapy and Ambulatory Care Board of Pharmacy Specialties (BPS) examinations.

A Pharmacist's Guide to Inpatient Medical Emergencies Pharmaceutical Press

This comprehensive, first-of-its kind title is an indispensable resource for pharmacists looking to learn or improve crucial patient assessment skills relevant to all pharmacy practice settings. Pharmacists' role as health care practitioners is evolving as they are taking a more active part in primary patient care -- helping patients manage their medications and diseases, providing patient education, and, in some jurisdictions, prescribing and adapting medications. To perform their day-to-day duties, pharmacists are best-served using a framework called the patient care process. This framework involves three steps: patient assessment; care plan development and implementation; and monitoring and follow up. Organized in four parts, this practical book begins with introductory chapters regarding the basics of patient assessment and the patient care process. Part II includes a detailed assessment of common symptoms encountered by pharmacists. Part III discusses assessment of patients with various chronic illnesses. Part IV addresses select specialized topics and assessment considerations. An invaluable contribution to the literature, Patient Assessment in Clinical Pharmacy: A Comprehensive Guide will be of great benefit to pharmacists, regardless of their practice setting, and to pharmacy students as well.

Nurse Practitioner's Clinical Pocket Guide F.A. Davis

There are few publications about chemotherapy in children, and none of them is a book aimed at pharmacists. Pediatric Oncology Pharmacy is an area where more and more specific knowledge is required in daily practice. Pharmacists who work in pediatric oncology area do not have a book directed at them; none of the oncopediatric books addresses topics unique to pharmacy — such as manipulation of cytotoxic drugs for children, analysis of oncopediatric prescriptions, clinical pharmacy in oncopediatrics, pharmaceutical care in oncopediatric area, and other subjects that are of exclusive interest to these professionals, but no less essential for a therapy of excellence. As for this need, the purpose of this book is to be a guideline for all subjects that pediatric oncology pharmacists need to know to work in this area. It will be an essential guide to pediatric oncology pharmacists, clinical pharmacists, pharmaceutical residents who work with drug therapy in children and pharmaceutical researchers. It will be a pocket guide to assist in daily practice, and it

will be essential to Pediatric Oncology/ Hematology Institutions. The essential propose of this book is to be the first one focusing pediatric oncology for pharmacists.
