Geography of International Affairs Elsevier  
This book, originally published in 1986, shows the importance of geography in international power politics and shows how geopolitical thought influences policy-making and action. It considers the various elements within international power politics such as ideologies, territorial

competition and spheres of influences, and shows how geographical considerations are crucial to each element. It considers the effects of distance on global power politics and explores how the geography of international communication and contact and the geography of economic and social patterns change over time and affect international power balances.

**Geopolitics and Empire** Routledge  
"Develops a geographic approach to the politics of spectacle and its unspectacular Others through examining recent

spectacular capital city development projects in seven authoritarian, resource-rich states of Central Asia, the Arabian Peninsula, and East Asia"--  
**Observant States** Cambridge University Press  
Grygiel asserts that, though many other aspects of foreign policy have changed throughout history, strategic response to geographical features remains one of the most salient factors in establishing and maintaining power in the international arena.

*Engaging Geopolitics* Springer Nature  
This volume examines geopolitics by looking at the interaction between geography, strategy and history. This book addresses three interrelated questions: why does the geographical scope of political objectives and subsequent strategy of states change? How do these changes occur? Over what period of time do these changes occur? The theories of Sir Halford Mackinder and Nicholas Spykman are examined in order to provide an analytical narrative for five case studies, four historical and one contemporary. Taken together they offer the prospect of converting descriptions of historical change into analytic explanations, thereby highlighting the importance of a number of commonly overlooked variables. In addition, the case studies will illuminate the challenges that states face when attempting to change the scope of their foreign policy and geo-strategy in response to shifts in the geopolitical reality. This book breaks new ground in seeking to provide a way to understand why and how the geographical scope of political objectives and subsequent strategy both expands and

contracts. This book will be of much interest to students of geopolitics, strategic studies, military history, and international relations.

**Political Geography** Rowman & Littlefield

On Geopolitics shows how the 'new geopolitics' combines the fields of geography and international relations to create a comprehensive overview of current political developments. Using recent developments in geographical technology as well as traditional theories and methods, Harvey Starr explores themes of spatiality and territoriality as they connect to international affairs. He also examines geopolitical dynamics beyond borders in a world now buffeted by non state actors and subject to intergovernmental institutions and norms. On Geopolitics is a brilliant synthesis of Starr's ongoing work on conflict and co-operation, alliances, opportunity, and willingness, within a geographic framework. At the same time, Starr points the way toward new tools and techniques for the study of globalisation and world politics.

A comparative study of the relationship between the end of the Cold War and the resurgence of geopolitics in Europe.

Geopolitics and Development Springer

This textbook offers valuable insights into the nexus between geography, geopolitics, and humanitarian action. It elucidates concepts regarding conflict and power, as well as the role of the state and the international community in mitigating and preventing violence and war. Here the material and non-material, existential or imagined reasons for conflict are deconstructed, ranging from land and resource grabs to Utopian ideals that can degenerate into dystopias, as with Daesh's caliphate in Syria and Iraq. In turn, the issues discussed range from the local to wider national and global levels, as do their resolution mechanisms. Due to insecurities, the impacts of globalization, divisive nationalistic and isolationist reactions emerging in some democracies including the USA, the UK's Brexit stress, and the ominous rise of populist parties across continental Europe (from France and the Netherlands to the Visegrád Group, the Balkans, and Greece), citizen

fatigue has become increasingly evident, reflected in ever-growing socio-political malaise and violence. As the impact of any humanitarian disaster is proportional to the level of development of the area affected, concepts and categories of humanitarian action are explored, along with development issues at their core, especially in the Global South. Broadly speaking, humanitarian disasters fall into the categories of natural, human-made, technological, or complex; here, however, the focus is on human-made crises. Attempts at greater regulation, national and international organization and multilateralism to prevent violent conflicts, as well as enhanced responses to humanitarian emergencies, need to be supported now more than ever before. This textbook will appeal to graduate and upper undergraduate students and practitioners in the fields of geography, geopolitics, humanitarian action and geographies of conflict and war. In addition to the main content, it includes exercises, questions and sections for autonomous student learning.

This book examines the long entanglement between ideas of Geopolitics and the ideology and practices of Empire tracing these matters back to the true founder of Geopolitics, a British geographer of the early-twentieth century, Halford Mackinder.

*Geopolitics* Rowman & Littlefield

Since the late 1980s, critical geopolitics has gone from being a radical critical perspective on the disciplines of political geography and international relations theory to becoming a recognised area of research in its own right. Influenced by poststructuralist concerns with the politics of representation, critical geopolitics considers the ways in which the use of particular discourses shape political practices. Initially critical geopolitics analysed the practical geopolitical language of the elites and intellectuals of statecraft. Subsequent iterations have considered the role that popular representations of the international political world play. As critical geopolitics

has become a more established part of political geography it has attracted ever more critique: from feminists for its apparent blindness to the embodied effects of geopolitical praxis and from those who have been uncomfortable about its textual focus, while others have challenged critical geopolitics to address alternative, resistant forms of geopolitical practice. Again, critical geopolitics has been reworked to incorporate these challenges and the latest iterations have encompassed normative agendas, non-representational theory, emotional geographies and affect. It is against the vibrant backdrop of this intellectual development of critical geopolitics as a subdiscipline that this Companion is set. Bringing together leading researchers associated with the different forms of critical geopolitics, this volume produces an overview of its achievements, limitations, and areas of new and potential future development. The Companion is designed to serve as a key resource for an interdisciplinary group of scholars and practitioners interested in the spatiality of politics.

Geopolitics and Development examines the historical emergence of development as a form of governmentality, from the end of empire to the Cold War and the War on Terror. It illustrates the various ways in which the meanings and relations of development as a discourse, an apparatus and an aspiration, have been geopolitically imagined and enframed. The book traces some of the multiple historical associations between development and diplomacy and seeks to underline the centrality of questions of territory, security, statehood and sovereignty to the pursuit of development, along with its enrolment in various (b)ordering practices. In making a case for greater attention to the evolving nexus between geopolitics and development and with particular reference to Africa, the book explores the historical and contemporary geopolitics of foreign aid, the interconnections between development and counterinsurgency, the role of the state and social movements in (re)imagining development, the rise of (re)emerging donors like China, India and Brazil, and the growing significance of

South-South flows of investment, trade and development cooperation. Drawing on post-colonial and postdevelopment approaches and on some of the author's own original empirical research, this is an essential, critical and interdisciplinary analysis of the complex and dynamic political geographies of global development. Primarily intended for scholars and post-graduate students in development studies, human geography, African studies and international relations, this book provides an engaging, invaluable and up-to-date resource for making sense of the complex entanglement between geopolitics and development, past and present.

**Introduction to Geopolitics** Rowman & Littlefield

This proceedings book addresses the main issues of contemporary political geography and international relations, providing a platform for discussion and collaboration of experts in the fields of Political Geography, Geopolitics, International Relations, etc. Participants from all over the world consider the controversies and challenges posed by globalization, focusing, in particular, on the ideologies of

globalization and regionalism, migration crises, prevention of ethnic conflicts, and measures to promote sustainable development. The content of the book may be interesting to expert community, academics and popular audience.

Great Powers and Geopolitical Change  
Concept Publishing Company

In the last two decades, various states from the Global South have emerged as important players in international relations. Most popular among them is China. Brazil, India and South Africa have also taken essential roles in global and regional politics. Compared to traditional great powers, they can be labelled 'regional great powers' or 'regional powers' because their influence is - with the exception of China - concentrated on their neighbourhood. The impact of regions, meaning the impact of geography, on the economics and politics of regional powers is surprisingly understudied. This book analyses how geographical conditions influence the regional economics and politics of South Africa, allowing the author to delineate its region of influence.

Now thoroughly revised and updated, this concise text offers a deeply knowledgeable and balanced history and overview of political geography since its inception in the late nineteenth century. Rather than trying to impose a single "fashionable" theory, leading geographers John Agnew and Luca Muscarà consider the underlying role of changing geopolitical context for understanding the evolution of the discipline. The authors focus especially on reinterpretations of the post-Cold War period, exploring the renewed questioning of international borders, the emergence of the Middle East and displacement of Europe as the center of global geopolitics, the rise of China and other new powers, the reappearance of environmental issues, and the development of critical geopolitics. Offering more flexibility than a traditional core text, this book will be a valuable resource for all courses in political geography.

**On Geopolitics** I.B. Tauris

Written by one of the world's leading political geographers, this fully revised and updated textbook examines the dramatic changes wrought by ideological and

economic forces unleashed by the end of the Cold War. Saul Bernard Cohen considers these forces in the context of their human and physical settings and explores their geographical influence on foreign policy and international relations. *International Encyclopedia of Human Geography* Routledge  
Engaging Geopolitics provides a comprehensive introduction to the influence of geography, demography and economics on politics and international relations in the world in which we live today. The authors' expressed aim is to make geopolitics more accessible to undergraduate students, with the hope that the book will be an ideal starting point for those who will be moving vertically into more advanced courses in political geography or laterally into other concerns of international affairs.

*Aligning Geopolitics, Humanitarian Action and Geography in Times of Conflict* Cornell University Press

"A comprehensive reader for my political geography course. Good summaries at the

end, and articles include effective case study examples." - Rachel Paul, Western Washington University "A very useful and comprehensive introduction to key concepts in political geography. This book provides useful context not just for 'traditional' political geography modules, but also those examining broader issues of power, resistance and social movements." - Gavin Brown, University of Leicester "Vital for introducing basic concepts and terminology in a clear and concise fashion. The short chapters are accessible and well supplemented with pertinent examples." - Daniel Hammett, Sheffield University "I found the book to be very useful in a supplemental capacity, full of information that would be useful for an undergraduate or early graduate student." - Jason Dittmer, University College London This textbook forms part of an innovative set of companion texts for the human geography subdisciplines. Organized around 20 short essays, *Key Concepts in Political Geography* provides a cutting-edge introduction to the central concepts that define contemporary research in the field. Involving detailed yet expansive discussions, the book includes: An

introductory chapter providing a succinct overview of the recent developments in the field. Over 20 key concept entries covering the expected staples of the sub-discipline, such as nationalism, territoriality, scale and political-economy, as well as relatively new arrivals to the field including the other, anti-statism, gender, and post-conflict. A glossary, figures, diagrams and further reading. It is essential reading for undergraduate and postgraduate students of political geography.

**The Geopolitics of Power and Conflict**  
Greenwood

This volume of specially commissioned interpretative essays marks the centenary of the establishment of the International Geographical Union in 1922. Written by leading human and physical geographers from all parts of the world, *A Geographical Century* considers the history and present condition of geography as an international science. Based on the latest research, *A Geographical Century* provides new and critical analyses of the different forms of geographical internationalism that emerged during the 20th century; the changing relations between geography and cognate disciplines in the natural and social sciences; the geopolitics of international geographical collaboration; and the prospects of geography as a 21st century international science.
