This CD-ROM includes drawings from the latest edition of the Metric Handbook. It solves everyday planning problems. It puts 'must have' information at the fingertips of every designer, planner and architect. The Metric Handbook CD is a time-saving tool for all architects, planners and designers. On this CD you'll find the key illustrations from the new second edition of the 'Metric Handbook' provided as symbols compatible with three of the most popular CAD systems. There are over 1700 symbols on this CD and an additional key word search, select and insert facility alongside the standard menu options. Vital statistics for the spacing needed between different sets of furniture, as well as the normal spacing between, for example, a desk and a chair are also given. The drawings and software are designed to be used with: AutoCAD 2000, Architectural Desktop, r14, r13 and LT; Microstation Triforma J, Triforma, SEand 95; IntelliCAD 98; and new for this release of the software, Vectorworks v8 and v7. Also new with version 1.1 of the Metric Handbook CD are design details that can be used on a Mac operating system. \* Invaluable time-saving tool for architects and designers \* Over 1700 symbols dealing with all the principal building types, and with additional search, select and insert facilities; the CD includes space requirements between furniture as well as standard sizing specifications \* Now available for VectorWorks for Mac and Windows, fully compatible with AutoDesk's family of AutoCAD 2000 products including AutoCAD LT 2000, and updated for Microstation Triforma J with enhanced performance in all supported versions of AutoCAD LT

This book was originally devised as a guide for converting from imperial to metric measurements. The New Metric Handbook has since been totally transformed into a major international handbook of planning and design data. All principal building types are dealt with ranging from airports, factories and warehouses, to schools, churches and libraries. For each such building type the New Metric Handbook gives the basic design requirements and all the principal dimensional data. In addition, there are ten chapters dealing with general aspects of building such as materials, lighting, acoustics and tropical design. It is therefore a unique authoritative reference for solving everyday planning problems. In its various editions it has sold about 100,000 worldwide, and continues to be a reference work belonging on every design office desk or drawing board. A practical approach to planning residential spaces Residential Interior Design: A Guide To Planning Spaces is the industry-standard reference for all aspects of residential space planning, with a practical focus on accessible design, ergonomics, and how building systems affect each space. This new third edition has been updated with the most recent code information, including the 2015 International Residential Code and the International Green Construction Code, and new content on remodeling. Packed with hundreds of drawings and photographs, this book illustrates a step-by-step approach to design that applies to any residential space, and ensures that the most important factors are weighted heavily in the decision making process. Daily use is a major consideration, and the authors explore the minimum amount of space each room requires to function appropriately while examining the host of additional factors that impact bedrooms, bathrooms, kitchens, hallways, and more. Detailed information about accessibility is included in each chapter, making this book a reliable design reference for "aging in place" and universal design. The new companion website features teaching tools and a variety of learning supplements that help reinforce the material covered. Interior design is a fundamental component of a residential space, and a required skill for architecture and design professionals. This book is a complete reference on all aspects of residential design, and the factors that make a space "work." Design spaces with primary consideration of daily use Account for building systems, accessibility, human factors, and more Get up to date on the latest residential interior building codes Plan interiors for any home, any style, and any budget Designing a residential interior is about more than choosing paint colors and furniture—it's about people, and how they interact and use the space. It's about shaping the space to conform to its function in the best possible way. Residential Interior Design provides clear, comprehensive guidance on getting it right every time.

From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work."—Booklist (starred review) "The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job

market or new to management, or anyone hoping to improve their work experience."—Library Journal (starred review) "I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor."—Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide "Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way."—Erin Lowry, author of Broke Millennial: Stop Scraping By and Get Your Financial Life Together

Space planning involves much more than sketching a preliminary floor plan. A designer must take a client's programming needs into account and must also consider how other factors such as building codes and environmental factors affect a spatial composition. Space Planning Basics, now in its Third Edition, offers a highly visual, step-by-step approach to developing preliminary floor plans for commercial spaces. The book provides tools for visualizing space and walks the designer through other considerations such as building code requirements and environmental control needs. Specific programming techniques covered include matrices, bubble diagrams, CAD templates, block plans, and more. New to this edition are coverage of the basics of stair design, an essential aspect for planning spaces.

The most inspirational buildings in the world, as chosen by well-known contemporary architects. In this book, published in conjunction with the Twentieth Century Society, 50 contemporary architects choose the buildings from around the world that have inspired them and made an impact on their own work. Architectural journalist Pamela Buxton interviewed each of the architects to create these outstanding portraits of the buildings that have influenced modern architecture. The diverse selection is introduced by Twentieth Century Society director Catherine Croft, and illustrated throughout with photographs by Gareth Gardner and Edward Tyler. The book features a diverse range of inspirational buildings, from housing estates to castles, coal mines to cathedrals. Work by the giants of twentieth-century architecture including Le Corbusier, Mies van der Rohe and Alvar Aalto are featured, as well as lesser-known gems. Examples include Richard Rogers (of RHSP) on Maison de Verre (Paris, France); Chris Williamson (of Weston Williamson) on the Eames House by Charles and Ray Eames (Los Angeles, USA); Takero Shimazaki (of T-SA, UK) on Hexenhaus by Alison and Peter Smithson (Bad Karlshafen, Germany); Ted Cullinan (of Cullinan Studio) on Chapel of Notre Dame Du Haut by Le Corbusier (Ronchamp, France); Michael Squire (of Squire & Partners, UK) on Grundtvig s Church by Peder Vilhelm Jensen-Klint (Copenhagen, Denmark); and Jonathan Woolf (of Jonathan Woolf Architects) on Haus Esters and Haus Lange by Mies van der Rohe (Krefeld, Germany). This beautifully produced book offers a great insight into the power of existing architecture and its immense influence on the world we build today.

Standards for the design of interior spaces should be based on the measurement of human beings and their perception of space, with special consideration for disabled, elderly, and children [A Guide to Building Information Modeling for Owners, Designers, Engineers, Contractors, and Facility Managers](#) Lars Müller Publishers

This fully revised edition of the pocket book includes everyday information which the architect/designer normally has to find from a wide variety of sources and which is not always easily to hand. The book is of use to the student as well as the experienced practitioner. There is no similar compendium currently available. The book includes data about planning, structure, services, building elements, materials and addresses, and is intended to be used both at the drawing board and on site. The selection of the material by the author is based on many years' experience of architectural practice in both public and private offices. Now fully updated to take into account the new 2002 editions to the Building Regulations documents H, J, L1 and L2. Charlotte Baden-Powell was trained at the Architectural Association in London and has practised as an architect for 38 years. She began by working for British Rail and later for Sir Denys Lasdun. Since then she has run her own practice in London and Bath, dealing with new works as well as the restoration and extension of old buildings. She has written and lectured about the design of kitchens and bathrooms and is the author of Fireplace Design and Construction.
