[The authors use] language that helps the reader become engaged and invites them to start applying what they have learned to their situation immediately. The examples of the journal articles with the notations are very helpful and we use these for discussion in the class quite a bit. I also like the 'reviewing what we've learned' and 'practicing your skills' at the end of the chapter. I much prefer the consumer approach of this text over others on the market." -- Candyce Reynolds, Portland State University "Understanding Research is true to its name; it is much more user friendly, it explains WHAT research IS. It does an EXCELLENT job of covering all of the material I currently cover. [The authors] (fortunately) force me to provide a balanced, comparative description of both [quantitative and qualitative] research. . . . I find the writing style to be clear, interesting and engaging. " -- Carol A. This step-by-step guide takes the reader logically through the process of undertaking a literature review, from determining when this methodology might be useful, through to publishing the findings. It is designed particularly for students undertaking a dissertation using literature review methodology. However, it also caters to practitioners who wish to review the existing evidence in order to develop practice. Key features of the text include: a chapter on what makes a good literature review, so that readers are clear and confident about what they're aiming for; discussion of the value of literature reviews, whether for fulfilling the requirements of a course or for developing practice; a chapter structure that reflects the structure of a typical dissertation by literature review, making the material intuitive and easy to navigate; case examples throughout to illustrate how methodological principles work in practice; a troubleshooting guide to provide support and advice on common problems when carrying out a literature review; advice on the dissemination of findings. Written by an established author with significant experience teaching and supervising students doing literature reviews, this invaluable text offers systematic and insightful advice on all aspects of literature review methodology, from problem identification to synthesizing information to forming conclusions. It is ideal for any student or practitioner in health and social care looking to undertake a literature review for study or practice purposes.
