published in the pages

of Popular Mechanics magazine, including step-by-step instructions for crafting such items as greeting cards, model airplanes, combined kites, and snowshoes.

Wordless Workshop

Sonoran Publishing

The iconic author of *My New York Diary* returns with a collection of dreamy, collaged photo comics. Julie Doucet is an artist who has mastered many voices and styles, from her landmark and medium-defining early work in comics with her comic book series *Dirty Plotte* and the classic graphic novel *My New York Diary*, to her linocut and collage work in *Lady Pep* and *Long Time Relationship*. Most recently, Doucet has focused primarily on collage, crafting

impeccable zines, prints, and other ephemera. In *Carpet Sweeper Tales*, her first new book in almost a decade, we see this multifaceted artist combine her many talents into one genre-defying masterwork. Though Doucet stopped drawing comics more than ten years ago, here she revisits the art form, pulling images from 1970s Italian fumetti or photonovels to create her own collage comics. Using vintage women's and home decorating magazines, Doucet collages a unique dialogue of love and travel between characters sitting in classic cars, driving through cities and pristine countryside. This book is the first to combine Doucet's love of collage with her gift

at comics storytelling. The result is a collection of lighthearted stories that play upon the disconnects between 1970s imagery and our modern world. Lost in translation, the dialogue is stilted, the characters alien, the mood always playful. *Carpet Sweeper Tales* is a milestone in a career filled with milestone achievements.

Popular Mechanics knows: there are two types of people in the world--those able to fix whatever goes bust, and those who beg the first group for help

when something goes wrong. But it doesn't have to be that way, because this easy-to-follow guide will give anyone the basics to tackle those frustrating (and sometimes nerve-racking) quandaries that crop up around the house: plumbing problems, electrical snafus, appliance failures, computer and electronics breakdowns, pest infestations, and furniture in need of renewal. They range from the serious to the merely annoying, but every one is cause for concern. So, whether the issue is a fast repair for a running toilet or a leaking pipe, or a simple, inexpensive way to keep deer from pillaging the garden, it's all in here.

Among the thousands and thousands of dirt bikes, scramblers, trials bikes, play bikes and early motocross bikes; which are the best bikes to make your own? Vintage Dirt Bikes will help the reader make that decision by providing them with information on all the most popular makes.

41st AIAA Aerospace Sciences Meeting & Exhibit MIT Press

American road racing began just after World War II and quickly blossomed into a movement. The Sports Car Club of America (SCCA) and the United States Auto Club (USAC), clubs that became fierce rivals in the 1950s and 1960s, were the principal race

promoters. Race tracks popped up everywhere, at first on city streets, then at airports and U.S. Air Force bases, and finally at purpose-built circuits like Road America and Laguna Seca. Although most of the cars that competed in American road racing were built in Europe, an underground movement sprang up of "special builders" who constructed their racers in home garages and small-town machine shops. Some were so homely and slow that only the builders could love them. Others trounced every Ferrari in sight and are now on the wish lists of wealthy collectors the world over. Vintage American Road Racing Cars 1950-1970 is the first

book devoted exclusively to American road racing cars of all types and sizes. Hundreds of race cars built in America have never before been mentioned in print, and this book chronicles those and other cars with vintage and modern photography, specifications, memorabilia, and the stories and characters behind each car. About the Author Harold Pace's writing and photography has appeared in such magazines as Automobile Quarterly, Class & Sportscar, Excellence, Sports Car International, Vintage Racecar Journal, and others. He lives in Weatherford, Texas. Mark Brinker is a vintage race car enthusiast who has

raced at the Monterey Historics. He is a doctor with three published medical textbooks and 70+ published scientific papers. He hails from Houston, Texas.

Tarzan at the Earth's Core

Amer Inst of Aeronautics & Build the coolest car in the pinewood derby! In this ultimate design guide, Troy Thorne shares his expert tips, techniques and amazing patterns so parents and scouts of any skill can build a jaw-dropping, prize-winning car that's quick out of the gate. Escape from Saigon Urbana, Ill. : National Council of Teachers of English "Offers many projects that are still functional today as well as several that are purely entertaining."--From

source other than the Library of Congress Quick Fixes for Everyday Disasters Wolfgang Productions This nostalgic flashback to a simpler time is filled with illustrated projects that range from the everyday (birdhouse, bean shooter) to the unusual (ice glider, magnetic theater).

Vintage Dirt Bikes

Skyhorse
Noted automobile historian James M. Flamming offers the ultimate book on the Volkswagen and the love affair it fostered with generations of American auto owners. 16 pages in full color and more than 250 pages of text give readers the inside story on the VW, from the prewar days of Hitler's Germany to the vehicles enshrined in

the American counterculture of the '60s to the models poised to roll off today's assembly lines. Full Fathom Five Wrecks of the Spanish Armada Images from the Past Incorporated "This book presents the histories of the major North American shortwave clubs and reviews the professional and listener-generated shortwave literature of the era. It also covers the DX programs and other listening fare to which shortwave listeners were most attracted and the QSL-cards they sought as confirmation of their reception."--Provided by publisher.

A Cultural History of Early Spaceflight

Drawn and Quarterly
This comprehensive account of the past,

present and future of the automobile examines the key trends, key technologies and key players involved in the race to develop clean, environmentally friendly vehicles that are affordable and that do not compromise on safety or design. Undertaking a rigorous interrogation of our global dependency on oil, the author demonstrates just how unwise and unnecessary this is in light of current developments such as the fuel cell revolution and the increasing viability of hybrid cars, which use both petrol and electricity - innovations that could signal a new era of clean, sustainable energy. The arguments put forward draw on support from an

eclectic range of sources - including industry insiders, scientists, economists and environmentalists - to make for an enlightening read.

Beetles, Buses & Beyond Courier Corporation

This volume contains notes for 21 of the 22 major 16-mm sound films prepared under the direction of the NCFMF and covering nearly all of the fundamental phenomena of fluid motions.

An Alphabet Book of Vintage Photographs

book includes over 880 illustrations and photos from every phase of his career.

The Ultimate Guide to Creating the Coolest Car Fox

Chapel Publishing

In response to a radio plea from Abner Perry, a scientist who with his friend David Innes has discovered the interior world of Pellucidar at the Earth's core, Jason Gridley launches an expedition to rescue Innes from the Korsars (corsairs), the scourge of the internal seas. He enlists Tarzan, and a fabulous airship is constructed to penetrate Pellucidar via the natural polar opening connecting the outer and inner worlds. The airship is crewed primarily by Germans, with Tarzan's Waziri warriors under their chief Muviro also along

for the expedition.

Alligators Always Dress for Dinner

Routledge

Rockets and Revolution offers a multifaceted study of the race toward space in the first half of the twentieth century, examining how the Russian, European, and American pioneers competed against one another in the early years to acquire the fundamentals of rocket science, engineer simple rockets, and ultimately prepare the path for human spaceflight. Between 1903 and 1953, Russia matured in radical and dramatic ways as the tensions and expectations of the Russian revolution drew it both westward and spaceward. European and American industrial

capacities became the models to imitate and to surpass. The burden was always on Soviet Russia to catch up—enough to achieve a number of remarkable “firsts” in these years, from the first national rocket society to the first comprehensive surveys of spaceflight. Russia rose to the challenges of its Western rivals time and again, transcending the arenas of science and technology and adapting rocket science to popular culture, science fiction, political ideology, and military programs. While that race seemed well on its way to achieving the goal of space travel and exploring life on other planets, during the second half of the

twentieth century these scientific advances turned back on humankind with the development of the intercontinental ballistic missile and the coming of the Cold War.

Tanar of Pellucidar

Courier Corporation

The trading, selling, and buying of personal transport has changed little over the past one hundred years. Whether horse trading in the early twentieth century or car buying today, haggling over prices has been the common practice of buyers and sellers alike. Horse Trading in the Age of Cars offers a fascinating study of the process of buying an automobile in a historical and gendered context. Steven M. Gelber convincingly demonstrates that the

combative and frequently dishonest culture of the showroom floor is a historical artifact whose origins lie in the history of horse trading. Bartering and bargaining were the norm in this predominantly male transaction, with both buyers and sellers staking their reputations and pride on their ability to negotiate the better deal. Gelber comments on this point-of-sale behavior and what it reveals about American men. Gelber's highly readable and lively prose makes clear how this unique economic ritual survived into the industrial twentieth century, in the process adding a colorful and interesting chapter to the history of the

automobile.

200 Classic Things to Build U of Nebraska Press

The Skycrane was the last creation of aircraft design pioneer Igor Sikorsky. In *SKYCRANE: Igor Sikorsky's Last Vision*, former Sikorsky Aircraft Executive Vice President John A.

McKenna traces the development of this remarkable helicopter from original concept and early sketches to standout performer for the military and private industry. Responsible for building the first S-64 Skycrane in 1961 and for supporting its Army and commercial programs, McKenna has written a comprehensive history chronicling a radically designed helicopter that many thought would not succeed. Indeed, initial versions

generated no orders. But General Harry Kinnards vision and advocacy resulted in the Skycranes support of combat operations in Vietnam as part of the groundbreaking concept of supporting Army troops with helicopters rather than trucks. In 1971 Erickson Lumber Company acquired the first Skycrane intended for commercial use to move timber deep in American forests. Owner Jack Erickson later acquired the world manufacturing and support rights to the aircraft creating Erickson Air-Crane Inc. A half century after its first flight the Skycrane continues to save lives, provide essential services, and earn daily profits worldwide. Beautifully illustrated with scores of historical

photographs, SKYCRANE features interviews with engineers who designed and tested the helicopter and with Army pilots who flew it during combat in Vietnam. This engagingly written work is the definitive history of a unique and important aircraft.

Tube Testers and Classic Electronic Test Gear

Adlard Coles
The further adventures of David Innes and Abner Perry at the Earth's core. We learn of new developments occurring in Pellucidar, including the capture of Tanar the Fleet One by the piratical Korsars, together with picturesque details about the lovely Stellara of the Island of Amiocap, Bohar the Bloody, and others, as

well as reptilian monsters.

Projects for the Young Mechanic Mit Press

The inaugural title in our exclusive new series of books about traditional boats and traditional seamanship. Wooden boats didn't disappear with the invention of GRP. Building them is a classic craft that attracts people with a keen interest in traditional boats and is a thriving activity among professional craftsmen and DIY boat builders alike. This thoroughly modern book aimed at the

novice builder and accessible to the amateur takes a fresh new approach to a timeless activity. The focus is on classic boat construction and restoration, but at all stages modern methods, materials and techniques are employed, together with step-by-step diagrams and explanations. Well illustrated with color photos and detailed close-up watercolor illustrations, this book will be invaluable for students of boat design and construction, do-it-yourself boat builders and even model makers.
