How Artificial  
SuperIntelligences May

Destroy Or Save the  
Human Race Abrams  
"Fascinating.... Lays a  
foundation for  
understanding human  
history."—Bill Gates In this  
"artful, informative, and

delightful" (William H.  
McNeill, New York Review  
of Books) book, Jared  
Diamond convincingly  
argues that geographical  
and environmental factors  
shaped the modern world.

Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war -- and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history.

Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth club of California's Gold Medal. *Face to Face* Sterling Publishing (NY)  
 In this social and cultural history of Czechoslovakia's "gentle revolution," James Krapfl shifts the focus away from elites to ordinary citizens who endeavored—from the outbreak of revolution in 1989 to the demise of the Czechoslovak federation in 1992—to establish a new,

democratic political culture. Unique in its balanced coverage of developments in both Czech and Slovak lands, including the Hungarian minority of southern Slovakia, this book looks beyond Prague and Bratislava to collective action in small towns, provincial factories, and collective farms. Through his broad and deep analysis of workers' declarations, student bulletins, newspapers, film footage, and the proceedings of local administrative bodies,

Krapfl contends that Czechoslovaks rejected Communism not because it was socialist, but because it was arbitrarily bureaucratic and inhumane. The restoration of a basic “humanness”—in politics and in daily relations among citizens—was the central goal of the revolution. In the strikes and demonstrations that began in the last weeks of 1989, Krapfl argues, citizens forged new symbols and a new symbolic system to reflect the humane, democratic,

and nonviolent community they sought to create. Tracing the course of the revolution from early, idealistic euphoria through turns to radicalism and ultimately subversive reaction, *Revolution with a Human Face* finds in Czechoslovakia’s experiences lessons of both inspiration and caution for people in other countries striving to democratize their governments. The Structure of Digital Computing takes a fifty year perspective on computing and discusses what is significant, what is novel, what endures, and why it is all so confusing. The book tries to balance two point of views: digital computing as viewed from a business perspective, where the focus is on marketing and selling, and digital computing from a research perspective, where the

focus is on developing fundamentally new technology.

Make workplace conflict resolution a game that EVERYBODY wins! Recent studies show that typical managers devote more than a quarter of their time to resolving

coworker disputes. The Big Book of Conflict-Resolution Games offers a wealth of activities and exercises for groups of any size that let you manage your business (instead of managing personalities). Part of the acclaimed, bestselling Big Books series, this guide offers step-by-step directions and customizable tools that empower you to heal rifts arising from ineffective communication, cultural/personality clashes, and other specific problem areas—before

they affect your organization's bottom line. Let The Big Book of Conflict-Resolution Games help you to: Build trust Foster morale Improve processes Overcome diversity issues And more Dozens of physical and verbal activities help create a safe environment for teams to explore several common forms of conflict—and their resolution. Inexpensive, easy-to-implement, and proved effective at Fortune 500 corporations and mom-and-pop businesses alike, the

exercises in The Big Book of Conflict-Resolution Games delivers everything you need to make your workplace more efficient, effective, and engaged. McGraw Hill Professional One minute you've got a quiet life. No friends except those in your record collection. Free from technological slavery. Just pizza for dinner and a job you love at the local record store... Funny how things spiral out of control... Next thing you know you're embroiled in some poorly

thought out conspiracy. Cavorting with shady government officials, scientists and recently resurrected music legends. A cog in a baffling plot that keeps getting stranger by the minute. Getting shot at, kidnapped, trailed by possible alien-human hybrids. Forced to endure not only potentially dangerous scientific experiments but also the crackpot philosophical musings of possible agent/probable nutcase Jones. A man on a mission that could lead to

complete knowledge... or the complete destruction of the world. And all because you did a little accidental necromancy on your way home from work. Funny how things spiral out of control... The Hiroshima Cover-up and the Reporter Who Revealed It to the World Activibooks for Kids A NEW YORK TIMES NOTABLE BOOK OF 2020 New York Times bestselling author Lesley M.M. Blume reveals how one courageous American reporter uncovered one of the deadliest cover-ups of

the 20th century—the true effects of the atom bomb—potentially saving millions of lives. Just days after the United States decimated Hiroshima and Nagasaki with nuclear bombs, the Japanese surrendered unconditionally. But even before the surrender, the US government and military had begun a secret propaganda and information suppression campaign to hide the devastating nature of these experimental weapons. The cover-up intensified as Occupation

forces closed the atomic cities to Allied reporters, preventing leaks about the horrific long-term effects of radiation which would kill thousands during the months after the blast. For nearly a year the cover-up worked—until New Yorker journalist John Hersey got into Hiroshima and managed to report the truth to the world. As Hersey and his editors prepared his article for publication, they kept the story secret—even from most of their New Yorker colleagues. When the

magazine published “Hiroshima” in August 1946, it became an instant global sensation, and inspired pervasive horror about the hellish new threat that America had unleashed. Since 1945, no nuclear weapons have ever been deployed in war partly because Hersey alerted the world to their true, devastating impact. This knowledge has remained among the greatest deterrents to using them since the end of World War II. Released on the 75th anniversary of the Hiroshima bombing,

Fallout is an engrossing detective story, as well as an important piece of hidden history that shows how one heroic scoop saved—and can still save—the world.

*Economics with a Human Face* Abrams

A complete guide to creating realistic portraits in wood from a champion carver. Learn the techniques for carving hair, skin, muscle and more. Following a step-by-step project with more than 350 color photos and 50 drawings that provide useful anatomical

references, you'll be guided to completely sculpt the piercing features of a Native American warrior wearing a wolf headdress.

Featured on CBS This Morning, Squawk Box, MSNBC, CNN, Bloomberg, Forbes, Fast Company, The New York Times, and more. “Reading Face to Face is like being a fly on the wall, watching Brian Grazer work his magic. Utterly entertaining, this is how you become Hollywood’s best

producer.” —Malcolm Gladwell, author of Talking to Strangers  
Legendary Hollywood producer and author of the bestselling A Curious Mind, Brian Grazer is back with a captivating new book about the life-changing ways we can connect with one another. Much of Brian Grazer’s success—as a #1 New York Times bestselling author, Academy Award-winning producer, father, and husband—comes from his ability to establish genuine connections with

almost anyone. In *Face to Face*, he takes you around the world and behind the scenes of some of his most iconic movies and television shows, like *A Beautiful Mind*, *Empire*, *Arrested Development*, *American Gangster*, and *8 Mile*, to show just how much in-person encounters have revolutionized his life—and how they have the power to change yours. With his flair for intriguing stories, Grazer reveals what he’s learned through interactions with people like Bill Gates,

Taraji P. Henson, George W. Bush, Barack Obama, Eminem, Prince, Spike Lee, and the Afghani rapper activist Sonita: that the secret to a bigger life lies in personal connection. In a world where our attention is too often focused downward at our devices, Grazer argues that we are missing an essential piece of the human experience. Only when we are face to face, able to look one another in the eyes, can we form the kinds of connections that expand our world views, deepen

our self-awareness, and ultimately lead to our greatest achievements and most meaningful moments. When we lift our eyes to look at the person in front of us, we open the door to infinite possibility.

**The Human Face of Big Data** Open Data Press  
The publication of the King James version of the Bible, translated between 1603 and 1611, coincided with an extraordinary flowering of English literature and is universally acknowledged as the greatest influence

on English-language literature in history. Now, world-class literary writers introduce the book of the King James Bible in a series of beautifully designed, small-format volumes. The introducers' passionate, provocative, and personal engagements with the spirituality and the language of the text make the Bible come alive as a stunning work of literature and remind us of its overwhelming contemporary relevance.

**Causation with a Human Face** Cornell

University Press  
Thomas Piketty's *Capital in the Twenty-First Century* initiated a great debate not just about inequality but also regarding the failures found in the economic models used by theoreticians and practitioners alike. *Wealth of Persons* offers a totally different perspective that challenges the very terms of the debate. The Great Recession reveals a great existential rift at the core of certain economic reflections, thereby showing the real crisis of

the crisis of economics. In the human sciences we have created a kind of "Tower of Babel" where we cannot understand each other any longer. The "breakdowns" occur equally on the personal, social, political, and economic levels. There is a need for an "about-face" in method to restore harmony among dissociated disciplines. *Wealth of Persons* offers a key to such a restoration, applying insights and analysis taken from different economic scholars, schools of

thought, philosophical traditions, various disciplines, and charismatic entrepreneurs. Wealth of Persons aims at recapturing an adequate understanding of the acting human person in the economic drama, one that measures up to the reality. The investigation is a passport allowing entry into the land of economic knowledge, properly unfolding the anthropological meaning of the free economy. *The First Book of Moses, Called Genesis* BoD -

Do you feel stuck in life, not knowing how to make it more successful? Do you wish to become more popular? Are you craving to earn more? Do you wish to expand your horizon, earn new clients and win people over with your ideas? *How to Win Friends and Influence People* is a well-researched and comprehensive guide that will help you through these everyday problems and make success look easier. You can learn to expand your social circle,

polish your skill set, find ways to put forward your thoughts more clearly, and build mental strength to counter all hurdles that you may come across on the path to success. Having helped millions of readers from the world over achieve their goals, the clearly listed techniques and principles will be the answers to all your questions. *The Human Face of Radiocarbon* Simon and Schuster  
New York Times Bestseller  
A Summer Reading Pick for President Barack

Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others?

And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives,

connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs,

6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

*A Novel* CreateSpace

The authors invited more than 100 journalists worldwide to use photographs, charts and essays to explore the world of big data and its growing influence on our lives and society.

*Methods of Sculpture* The Human Face of Big Data  
The original edition of *Emotion in the Human Face*, published in 1972, was the first volume to evaluate and integrate all the research on facial expression of emotion since Darwin's *The Expression of Emotions in Man and Animals* was published in 1872. It presented a detailed, critical discussion of research involving the face and emotion, focusing on the complex conceptual and methodological issues

involved, and settling many past controversies, such as whether the face provides accurate information about emotion, and whether some facial expressions are universal. This special Malor Books edition includes a new Preface, three additional chapters, and a new conclusion summarizing Ekman's final views on the field that he has played such a large part in creating. Contributors to this work include: Paul Ekman, Phoebe Ellsworth, Wallace V. Friesen, Joseph C.

Hager, Harriet Oster, Maureen O'Sullivan, William K. Redican and Silvan S. Tomkins.

**Fallout** Oxford University Press

The past few decades have seen an explosion of research on causal reasoning in philosophy, computer science, and statistics, as well as descriptive work in psychology. In *Causation with a Human Face*, James Woodward integrates these lines of research and argues for an understanding of how each can inform the

other: normative ideas can suggest interesting experiments, while descriptive results can suggest important normative concepts.

Woodward's overall framework builds on the interventionist treatment of causation that he developed in *Making Things Happen*. Normative ideas discussed include proposals about the role of invariant or stable relationships in successful causal reasoning and the notion of proportionality. He argues that these

normative ideas are reflected in the causal judgments that people actually make as a descriptive matter. Woodward also discusses the common philosophical practice-particularly salient in philosophical accounts of causation--of appealing to "intuitions" or "judgments about cases" in support of philosophical theses. He explores how, properly understood, such appeals are not different in principle from appeals to results from empirical research, and

demonstrates how they may serve as a useful source of information about causal cognition. *Strike Five* Harper Collins How Boston radio station WBCN became the hub of the rock-and-roll, antiwar, psychedelic solar system. While San Francisco was celebrating a psychedelic Summer of Love in 1967, Boston stayed buttoned up and battened down. But that changed the following year, when a Harvard Law School graduate student named Ray Riepen founded a radio station that played

music that young people, including the hundreds of thousands at Boston-area colleges, actually wanted to hear. WBCN-FM featured album cuts by such artists as the Mothers of Invention, Aretha Franklin, and Cream, played by announcers who felt free to express their opinions on subjects that ranged from recreational drugs to the war in Vietnam. In this engaging and generously illustrated chronicle, Peabody Award-winning journalist and one-time WBCN announcer Bill

Lichtenstein tells the story of how a radio station became part of a revolution in youth culture. At WBCN, creativity and countercultural politics ruled: there were no set playlists; news segments anticipated the satire of *The Daily Show*; on-air interviewees ranged from John and Yoko to Noam Chomsky; a telephone "Listener Line" fielded questions on any subject, day and night. From 1968 to Watergate, Boston's WBCN was the hub of the rock-and-roll, antiwar,

psychedelic solar system. A cornucopia of images in color and black and white includes concert posters, news clippings, photographs of performers in action, and scenes of joyousness on Boston Common. Interwoven through the narrative are excerpts from interviews with WBCN pioneers, including Charles Laquidara, the “news dissector” Danny Schechter, Marsha Steinberg, and Mitchell Kertzman. Lichtenstein’s documentary WBCN and

the American Revolution is available as a DVD sold separately.

**Human Anatomy Coloring Book** Hachette UK

This volume presents the results of a multidisciplinary research program (“Balkans 4000”) financed by the French National Research Agency (ANR) and coordinated by the editor between 2007 and 2011, when she was a member of the Maison de l’Orient et de la Méditerranée (Laboratory of Archaeology and Archaeometry). 192 new

radiocarbon dates have been produced in the laboratories of Lyon, Saclay and Demokritos, from 34 archaeological sites, spanning the years from the end of the 6th to the beginning of the 3rd millennium BC. They shed light on the evolution of human settlement during the late stages of the Neolithic period in Greece and Bulgaria, and more specifically on the transition from the Neolithic to the Early Bronze Age during the “obscure” 4th millennium BC. Thirty-one scholars,

archaeologists as well as radiocarbon scientists, are signing the contributions. *Buster Keaton, the Dawn of Cinema, and the Invention of the Twentieth Century* Dk Pub

The Influence of Teeth, Diet, and Habits on the Human Face discusses the relation between dental health, diet, and habits to the facial characteristics of humans. The book is comprised of 12 chapters that cover the various aspects of the relationship of the said variables. The text first compares the facial traits of primitives

and civilized peoples, and then proceeds to differentiating the characteristics of primitive and modern diets. The next chapter discusses disparity between meat and vegetable diet. The next five chapters deal topics related to dental health, such as tooth diseases among primitive tribes, establishing racial links through analyzing teeth, and some unusual dental customs. The remaining three chapters present the conclusion, review of related literature, and

methodology of the study. The book will be of great interest to dentists, physicians, anthropologists, and sociologists.

*Reassessing Chronology in prehistoric Greece and Bulgaria, 5000-3000 cal BC* Butterworth-Heinemann

'TEMPLETON CAN ALWAYS BE RELIED ON TO PROVIDE A WELL-WRITTEN, CLEVERLY PLOTTED WHODUNNIT'

THE TIMES Beatrice Lacey is passionate about two things: Human Face, the charity for Third World

children she helped to found, and its co-founder, Adam Carnegie. Her devotion to Adam has led her to turn a blind eye to strange goings-on over the years, including the endless merry-go-round of 'housekeepers' whose tenure at the charity headquarters is sometimes remarkably short. When the latest

housekeeper vanishes in mysterious circumstances, DI Kelso Strang is called to the remote corner of the Isle of Skye to investigate. Keen to move on from recent personal horrors, Strang revels in the responsibility the investigation affords. But with Beatrice unprepared

to face the reality of what Human Face has become and vital errors made when his team underestimates the danger, Strang has his work cut out to negotiate the highly complex situation and avoid the case ending in disaster. 'THE CRIME CZAR OF THE SCOTTISH SMALL TOWN' VAL MCDERMID
