The classic guide for designing robust science and mathematics professional development programs! This expanded edition of one of the most widely cited resources in the field of professional development for mathematics and science educators demonstrates how to design professional development

experiences for teachers that lead to improved student learning. Presenting an updated professional development (PD) planning framework, the third edition of the bestseller reflects recent research on PD design, underscores how beliefs and local factors can influence PD design, illustrates a wide range of PD strategies, and emphasizes the importance of: Continuous program monitoring Combining strategies to address diverse needs Building cultures that sustain learning
Practical Insights in
Brain Science to Help
Students Learn
Routledge

This book focuses on the professional development of teacher educators, forming a definitive and expert resource for all those interested in this area of professional learning. It offers an in-depth overview of existing international research and professional development initiatives in the area of teacher educators' learning. The book highlights relevant research on the topic, identifies the lessons learnt from recent initiatives, and indicates ways forward for teacher educators' professional learning internationally. It provides a unique combination of six years of pan-European collaborative work, resulting in a book with clear relevance and appeal to both

academics and practitioners internationally. The book conceptualizes teacher educators' professional development, in order to deepen understanding of how and why learning occurs and conducts empirical research into the professional development needs of teacher educators internationally using quantitative and qualitative methods in order to redress gaps in existing research. This book will be of great interest to academics, researchers and post-graduate students in the fields of teacher education and professional development and learning.
Methods for Improved Education Delivery IAP

Much-needed direction for navigating online professional development Online professional development expert John D. Ross's practical framework will help you ask the right questions and make sound development and purchasing decisions. Based on proven principles of professional learning and instructional design, he guides you through charting your course to success and provides a path to answering these fundamental questions: Why do I need OPD? How much does it cost? How do I get started? What does high-quality online learning look like? What technologies are right for me? Did it work?

The delivery of quality education to students relies heavily on the actions of an institution's administrative staff. Effective leadership strategies allow for the continued progress of modern educational initiatives. Educational Leadership and Administration: Concepts, Methodologies, Tools, and Applications provides comprehensive research perspectives on the multi-faceted issues of leadership and administration considerations within the education sector. Emphasizing theoretical frameworks, emerging strategic initiatives, and future outlooks, this publication is an ideal reference source for educators,

professionals, school administrators, researchers, and practitioners in the field of education. From Goals to Growth
Online Professional Development for Teachers Emerging Models and Methods How can professional development for teachers be more efficient and effective? This essential question lies at the heart of this timely and useful book. In an era marked by a heightened emphasis on school reform, the education and professional development of teachers is widely regarded as the keystone to educational improvement. Recently a bewildering array of online professional development programs

has arisen. But how effective are these programs and how do they compare with one another? Inspired by a recent conference on usable knowledge at the Harvard Graduate School of Education, this book offers clear and practical answers to these and other questions about online professional development. The authors look closely at exemplary online programs, compare them carefully with one another, and draw helpful conclusions about them both for those who develop online programs, and for teachers and administrators in search of professional development programs that make a difference. A book that brings clarity and insight to this burgeoning and

influential field, Online Professional Development for Teachers will be of great value to researchers, policymakers, administrators, and teachers as they work to make the most of online professional development. Online Professional Development for Teachers Presents a multifaceted model of understanding, which is based on the premise that people can demonstrate understanding in a variety of ways. *Making Every Student an Active Learner, 2nd ed.* IGI Global Educators play a significant role in the intellectual and social development of children and young adults. Next-generation

teachers can only be as strong as their own educational foundation which serves to cultivate their knowledge of the learning process, uncover best practices in the field of education, and employ leadership abilities that will inspire students of all ages. *Teacher Education: Concepts, Methodologies, Tools, and Applications* explores the current state of pre-service teacher programs as well as continuing education initiatives for in-service educators. Emphasizing the growing role of technology in teacher skill development and training as well as key teaching methods and pedagogical developments, this multi-volume work compiles research

essential to higher education professionals and administrators, educational software developers, and researchers studying pre-service and in-service teacher training.

 Banish math anxiety and give students of all ages a clear roadmap to success
 Mathematical Mindsets provides practical strategies and activities to help teachers and parents show all children, even those who are convinced that they are bad at math, that they can enjoy and succeed in math. Jo Boaler—Stanford researcher, professor of math education, and expert on math learning—has studied why students don't like math and often fail in math classes. She's followed thousands of students through middle and high

schools to study how they learn and to find the most effective ways to unleash the math potential in all students. There is a clear gap between what research has shown to work in teaching math and what happens in schools and at home. This book bridges that gap by turning research findings into practical activities and advice. Boaler translates Carol Dweck's concept of 'mindset' into math teaching and parenting strategies, showing how students can go from self-doubt to strong self-confidence, which is so important to math learning. Boaler reveals the steps that must be taken by schools and parents to improve math education for all.

Mathematical Mindsets: Explains how the brain processes mathematics learning Reveals how to turn mistakes and struggles into valuable learning experiences Provides examples of rich mathematical activities to replace rote learning Explains ways to give students a positive math mindset Gives examples of how assessment and grading policies need to change to support real understanding Scores of students hate and fear math, so they end up leaving school without an understanding of basic mathematical concepts. Their evasion and departure hinders math-related pathways and STEM career opportunities. Research has shown very clear methods to

change this phenomena, but the information has been confined to research journals—until now. Mathematical Mindsets provides a proven, practical roadmap to mathematics success for any student at any age.

Strategies, Mindsets, and Beliefs for Supporting Male Black and Latino Students ASCD

Top 10 Pick for Learning Ladders' Best Books for Educators Summer 2021 A groundbreaking guide to improve teaching based on the latest research in neuroscience, from the bestselling author of *A Mind for Numbers*. Neuroscientists and cognitive scientists have made enormous strides in understanding the brain and how we learn, but little of that insight has filtered down to the way teachers teach. *Uncommon Sense Teaching* applies this research to the classroom for teachers, parents, and anyone interested in improving education. Topics include: • keeping students motivated and engaged, especially with online

learning • helping students remember information long-term, so it isn't immediately forgotten after a test • how to teach inclusively in a diverse classroom where students have a wide range of abilities Drawing on research findings as well as the authors' combined decades of experience in the classroom, *Uncommon Sense Teaching* equips readers with the tools to enhance their teaching, whether they're seasoned professionals or parents trying to offer extra support for their children's education. *How Schools and Parents Around the World are Inspiring Greatness, One Child at a Time* Delmar Pub At a time of profound crises around the

world, when social justice, peace, democracy and the environment seem under increasing threat, the promise of "a world for all" seems a viable aspiration for education. Ample evidence from many schools today, and dating back throughout the last century, prove that the purpose of educating young people to develop character, compassion, purpose and commitment is integral with the mastery of intellectual skills and life competencies. Schooling, without a doubt, can play a monumental part in the development of the personal values people take with them to the world. Unfortunately, as the saying goes, "if you don't know where you're going, you'll

probably get someplace else." Educational policy directions over the last twenty years have veered far away from the important work of educating for humanity. This book makes a powerful appeal to revisit educational purpose in light of what is most fundamental and important to human beings everywhere. The authors address timely issues such as high stakes testing, school choice, and privatization of education in looking beyond these measures to new approaches to educational excellence. The Leader in Me IGI Global Snippet The Creative Curriculum comes alive! This videotape-winner of the 1989

Silver Apple Award at the National Educational Film and Video Festival--demonstrates how teachers set the stage for learning by creating a dynamic well-organized environment. It shows children involved in seven of the interest areas in the The Creative Curriculum and explains how they learn in each area. Everyone conducts in-service training workshops for staff and parents or who teaches early childhood education courses will find the video an indispensable tool for explaining appropriate practice.

Responsive Practices for Holding Steady in Turbulent Times ASCD
In this galvanizing book for all educators,
Kristin Souers and Pete

Hall explore an urgent and growing issue--childhood trauma--and its profound effect on learning and teaching. Grounded in research and the authors' experience working with trauma-affected students and their teachers, *Fostering Resilient Learners* will help you cultivate a trauma-sensitive learning environment for students across all content areas, grade levels, and educational settings. The authors--a mental health therapist and a veteran principal--provide proven, reliable strategies to help you * Understand what trauma is and how it hinders the learning, motivation, and success of all students in the classroom. * Build strong relationships and

create a safe space to enable students to learn at high levels. * Adopt a strengths-based approach that leads you to recalibrate how you view destructive student behaviors and to perceive what students need to break negative cycles. * Head off frustration and burnout with essential self-care techniques that will help you and your students flourish. Each chapter also includes questions and exercises to encourage reflection and extension of the ideas in this book. As an educator, you face the impact of trauma in the classroom every day. Let this book be your guide to seeking solutions rather than dwelling on problems, to building relationships that allow

students to grow, thrive, and--most assuredly--learn at high levels. *Learning from the Past, Looking to the Future* National Academies Press Teachers of Color describes how racism serves as a continuous barrier against diversifying the teaching force and offers tools to support educators who identify as Black, Indigenous, or people of Color on both a systemic and interpersonal level. Based on in-depth interviews, digital narratives, and questionnaires, the book analyzes the toll of racism on their professional experiences and personal wellbeing, as well as their resistance and reimagination of schools. Teacher

educator and educational researcher Rita Kohli documents the hostile racial climate that teachers of color experience over the course of their academic and professional lives--first as students and preservice teachers and later in their classrooms and schools. She also highlights the tools of resistance these teachers employ to challenge institutionalized oppression and the kinds of professional development and support they need to thrive. Analyzed through the lens of critical race theory, *Teachers of Color* exposes the ongoing racialization via counter-stories from thirty racially, geographically, and

professionally diverse educators. The book concludes with recommendations that various education stakeholders can employ to improve the racial climates of schools and support the growing diversity of the teaching force. At this critical moment, Kohli offers readers an opportunity to strengthen their racial literacies and better understand the strengths, struggles, and power of teachers of color.

"They don't care about their education." "They are not capable of learning." "I can't work with them." "I can't get through to them." Just as you may have thought these things about your students, they, too, may have similar thoughts about you: "She doesn't care about my education." "He is not capable of understanding me." "I can't work with her." "I can't get through to him." While all students in your class, building, or school district need your support, the Black and Latino male students—the most

underserved, suspended, and expelled students in education—need you to understand them as you support them so that they can thrive academically. In *Becoming the Educator They Need*, former professional athlete turned educator Robert Jackson reminds teachers and administrators that although "a great majority of all the stories in the news about Black and Latino males are negative," these young men—the most likely to be incarcerated, drop out of school, and become victims of homicide—need you to work through any biases you may have and internalize and employ the five core beliefs and mindsets necessary to best

serve your Black and Latino male students, the six core values for teaching Black and Latino males, and the 11 characteristics of strong, healthy relationships and become the educator that these students need.

In *Unconscious Bias in Schools*, two seasoned educators describe the phenomenon of unconscious racial bias and how it negatively affects the work of educators and students in schools. “Regardless of the amount of effort, time, and resources education leaders put into improving the academic achievement of students of color,” the authors write, “if unconscious racial bias

is overlooked, improvement efforts may never achieve their highest potential.” In order to address this bias, the authors argue, educators must first be aware of the racialized context in which we live. Through personal anecdotes and real-life scenarios, *Unconscious Bias in Schools* provides education leaders with an essential roadmap for addressing these issues directly. The authors draw on the literature on change management, leadership, critical race theory, and racial identity development, as well as the growing research on unconscious bias in a variety of fields, to provide guidance for creating the conditions necessary to do this

work—awareness, trust, and a “learner’s stance.” Benson and Fiarman also outline specific steps toward normalizing conversations about race; reducing the influence of bias on decision-making; building empathic relationships; and developing a system of accountability. All too often, conversations about race become mired in questions of attitude or intention—“But I’m not a racist!” This book shows how information about unconscious bias can help shift conversations among educators to a more productive, collegial approach that has the potential to disrupt the patterns of perception that perpetuate racism and institutional injustice. Tracey A.

Benson is an assistant professor of educational leadership at the University of North Carolina at Charlotte. Sarah E. Fiarman is the director of leadership development for EL Education, and a former public school teacher, principal, and lecturer at Harvard Graduate School of Education.

Here are 51 easy-to-use, classroom-tested alternatives to the “stand and deliver” teaching techniques that cause so many students to tune out or drop out. Teachers report that these techniques motivate students to participate in learning, as they build confidence and are supported by

compelling and safe ways to demonstrate their knowledge and understanding of lessons. Refined through years of classroom experiences and supported by updated research, this 2nd edition delivers a dozen new techniques to engage K-12 students in active learning. The authors provide detailed descriptions of the Total Participation Techniques (TPTs) with step-by-step instructions--plus reproducible blackline masters for student response cards as well as posters to remind you to use the techniques. They also

suggest how you can adapt and personalize the techniques to fit your context and content. Packed with examples from authentic classrooms, Total Participation Techniques is an essential toolkit for teachers who want to present lessons that are relevant, engaging, and cognitively challenging. Pérsida Himmele and William Himmele are professors who regularly work with preservice teachers and consult with educators in U.S. and international schools. They are also the authors of Total Literacy Techniques.
