The text develops the readers' understanding of the law of evidence in both a practical and an academic way by examining and analysing the law in the context of the adversarial and managed systems of criminal and civil justice. This book takes a different approach by formally recognising the operation of the different evidential principles between criminal and civil cases; including a detailed section on the law of civil evidence; recognising that the study of evidence should reflect the practical context in which the rules operate; anticipating important proposed legislative changes in the law of evidence and by recognising the impact of the implementation of the Human Rights Act 1998 on the law of evidence.

This book explores challenges posed by the use of DNA evidence to the traditional features, procedures and principles of the criminal trial. It examines the limitations of existing theories of criminal trial processes in the face of increasing use of scientific evidence in the court room. The research elucidates the interconnections at trial of three epistemologies, namely legal reasoning, as represented by counsel and trial judge, common sense manifested by the jury and scientific reasoning expounded by the expert witness. Sallavaci argues that while scientific reasoning is part of this hybrid of trial languages and practices, its extended use is producing specifically novel tensions which impact on the traditional criminal trial landscape. Through the lens of DNA evidence, the book investigates how far the use of scientific evidence in the fact finding process poses challenges for the adversarial character of the proceedings and rules of evidence; how it affects the role of the judge, jury and expert witness, as well as the principle of orality and continuity of the trial. In comparing the challenges faced in English common law trials to those of the USA, this book has international scope, and will be of great use and interest to students and researchers of Criminal Law and Practice, Policing, and the role of Forensics in Law.

This book presents a short history and timeline of criminal procedure legislation in China. First, it addresses the status of Human Rights Conventions and the challenges resulting from human rights standards for Chinese criminal procedural law and practice. The discussion then moves on to explore the fundamentals of Chinese criminal procedure such as the applicable law found in the Chinese CPL (Criminal Procedure Law) and legal institutions. The book covers relevant actors in the Chinese Criminal Justice System (ie judges, prosecutors, police, defence councils) as well as the relationships between them. It also includes topics relating to the victims of crime and their role in criminal proceedings. Starting with pre-trial investigations (extending in particular to coercive measures and discretionary powers in the implementation of non-prosecution policies) the book continues as a guide through the basic principles of criminal trial, standards of evidence and rules related to conviction. Appeals and the issue of reopening criminal proceedings are also considered, with the book making particular reference to a number of special procedures (including juvenile delinquency) in the closing chapter.

Scientific Evidence in Civil and Criminal Cases Cambridge University Press

Principles of Evidence in International Criminal Justice provides an overview of the procedure and practice concerning the admission and evaluation of evidence before the international criminal tribunals. The book is both descriptive and critical and its emphasis is on day-to-day practice, drawing on the experience of the Yugoslavia, Rwanda and Sierra Leone Tribunals. This book is an attempt to define and explain the core principles and rules that have developed at those ad hoc

Tribunals; the rationale and origin of those rules; and to assess the suitability of those rules in the particular context of the International Criminal Court which is still at its early stages. The ICC differs in structure from the ad hoc Tribunals and approaches the legal issues it has to resolve differently from its predecessors. The ICC is however confronted with many of the same questions. The book examines the differences between the ad hoc Tribunals and the ICC and seeks to offer insights as to how and in which circumstances the principles established over years of practice at the ICTY, ICTR and SCSL may serve as guidance to the ICC practitioners of today and the future. The contributors represent a cross-section of the practicing international criminal bar, drawn from the ranks of the Bench, the Prosecution and the Defence and bringing with them different legal domestic cultures. Their mixed background underlines the recurring theme in this book which is the manner in which a legal culture has gradually taken shape in the international Tribunals, drawing on the various traditions and experiences of its participants.
