USA TODAY BESTSELLER • In this charming Oxford Novel, hailed by Keri Ford as “a sizzling-loud friends-to-lovers story,” Lauren Layne poses a provocative question: What do you do when you fall in love with your sister’s ex? A year ago, Jackson Burke was married to the love of his life and playing quarterback for the Texas Redhawks. Now he’s retired, courtesy of the car accident that ruined his career—and single, after a nasty scandal torpedoed his marriage. Just as he’s starting to get used to his new life as a health and fitness columnist for Oxford magazine, his unpredictable ex shows up on his doorstep in Manhattan. Jackson should be thrilled. But he can’t stop thinking about the one person who’s always been there for him, the one girl he could never have: her younger sister. Mollie Carrington can’t say no to Madison. After all, her older sister practically raised her. So when Madison begs for help in winning her ex-husband back, Mollie’s just glad she got over her own crush on Jackson ages ago—or so she thought. Because as Mollie reconnects with Jackson, she quickly forgets all her reasons to stay loyal to her sister. Tempted by Jackson’s mellow drawl and cowboy good looks, Mollie is sick and tired of coming in second place. But she can’t win if she doesn’t play the game. That was all Julianne wanted. One last trip to escape the pressures of an arranged marriage to a man she doesn't love and doesn't even like. One last time to experience freedom... to go wherever she wanted to go, to be anyone she wanted to be. On her last two weeks in Paris, she met someone unexpected-aspiring painter, Jas Mathieu. She wanted to give Jas every part of herself, but she was already promised to a powerful man who could easily ruin the simple life of the guy she fell in love with. Terrified of what her father and fiancé could do to Jas if she stayed with him, she fled Paris and left him behind-with no real information about herself, not even her real name. Little did she know, that the passionate night they spent together would be the cause of her broken engagement and would change her life forever. Seven years later, after her father stripped her of her heiress title and privileges, she crossed paths with Jas Mathieu once again. And this time, she found out that he wasn't exactly the struggling artist she thought he was. And he was no stranger to the family and social circle she belonged to. It turned out that years ago, when they met... she wasn't the only one keeping secrets.

""Since when are you into guys in ties? You only like guys who look like they rob guys in ties. At gunpoint." It was true. By 2003, my type had been well-established. There might as well have been a giant sign on my heart that said, "Good Guys Need Not Apply." Which is exactly why I had to friend-zone Ken Easton. The man was a former football star, smelled like fresh laundry instead of stale cigarettes, and had more ties in his closet than tattoos on his knuckles. Pssh. BOR-ING. But the more I got to know my hunky study buddy, the more questions I came away with. Questions like: Why doesn't he date? Why does he avoid human touch? Why does he hate all things fun and wonderful? The psychology student in me became obsessed with getting inside Ken's head, while the spoiled brat in me became obsessed with getting inside his heart. In 2003, I found the one thing I love more than bad boys... A good challenge"--

"Since its earliest days, flight has been about pushing the limits of technology and, in many cases, pushing the limits of human endurance. The human body can be the limiting factor in the design of aircraft and spacecraft. Humans cannot survive unaided

at high altitudes. There have been a number of books written on the subject of spacesuits, but the literature on the high-altitude pressure suits is lacking. This volume provides a high-level summary of the technological development and operational use of partial- and full-pressure suits, from the earliest models to the current high altitude, full-pressure suits used for modern aviation, as well as those that were used for launch and entry on the Space Shuttle. The goal of this work is to provide a resource on the technology for suits designed to keep humans alive at the edge of space."--NTRS Web site.
