Athletic Training and Therapy: Foundations of Behavior and Practice builds upon an undergraduate understanding of health and exercise sciences to instill an evidence-based, graduate-level knowledge of best practices in athletic training and health care. This text integrates essential competencies outlined by the AT Strategic Alliance, a collaboration of the National Athletic

Trainers' Association (NATA), Board of Certification (BOC), and Commission on Accreditation of Athletic Training Education (CAATE). Athletic Training and Therapy highlights contemporary concepts not often found in other introductory texts, such as cultural literacy, interprofessional practice, preventative health care, administrative management, special populations, and epidemiology. Students gain a complete picture of their role as an athletic trainer as they explore these topics and progress through the text. Part I covers foundational clinical competencies that will guide students in their future professional practice. Part II features holistic wellness concepts and proactive strategies to prevent illness and injury. Part III presents emergency interventions for acute injury and immediate care. Part IV offers information on evaluating illness and injury. Part V addresses therapeutic and medical interventions, including therapeutic exercises, pharmacology, and casting procedures. The full-color text engages students and fosters comprehension with learning aids: Evidence-Based Athletic Training sidebars that highlight a position statement, systematic literature review, or high-level randomized control trials Foundational Skills sidebars that provide step-by-step instructions for common skills required of entry-level athletic trainers Chapter summaries of key concepts Learning objectives to help students focus their studies during their graduate education and during preparation for the BOC examination Related digital content delivered through HKPropel: videos of select skills and techniques, gradable chapter quizzes, case studies with critical thinking questions for each chapter, and checklists that can be used to grade students on their ability to accurately perform foundational skills Athletic Training and Therapy offers advanced athletic training students an engaging presentation of the clinical skills they will need as a successful member of the interprofessional health care team. Note: A code for accessing HKPropel is not included with this ebook but may be purchased separately.

A History of Early Athletic Training Human Kinetics

The premier text for athletic taping and bracing is now revised in a stunning third edition. Athletic Taping and Bracing retains its emphasis on the techniques most commonly used by athletic trainers and therapists while integrating the science of anatomy and injury mechanisms with the practice of athletic taping and bracing. Plus, the third edition expands on traditional taping by including methods for rigid strap taping and elastic kinesiology taping. Athletic Taping and Bracing, Third Edition, includes more than 480 full-color illustrations and photos, providing invaluable visual aids for both students and professionals. These include superb three-dimensional anatomical images from Primal Pictures. The photos that depict taping sequences feature tape with darkened edges that enable readers to distinguish the layers and patterns of the tape applied in each step. With its concise anatomical descriptions and detailed anatomical illustrations similar to those normally found in advanced texts on anatomy, the book clearly highlights the mechanisms of injury that are crucial for understanding effective taping and bracing. The text thoroughly discusses and illustrates the general principles of taping and bracing for each major joint and body region. The third edition adds step-by-step instructions for 10 additional techniques, including elastic kinesiology taping and rigid strap taping techniques for gastrocnemius strains, Achilles tendinitis, and arch problems; knee, quadriceps, and hip problems; shoulder and elbow hyperextension laxity; epicondylitis; and wrist and hand issues. The book also features newly added instructor resources consisting of an image bank and testing checklists to help students master the taping procedures. The text covers the 46 most frequently applied taping and bracing procedures in clinical practice, some of which are broken down into as many as 16 steps. It illustrates procedures for fabricating protective pads and orthotics, and it details the dos and don'ts of taping and bracing. To emphasize rehabilitation as well as prevention, Athletic Taping and Bracing, Third Edition, also presents basic stretching and strengthening exercises for injury rehabilitation. These exercises, presented and illustrated for each body part, focus on flexibility, strength, and proprioception. Combined with the taping and bracing procedures, the exercises will help rehabilitated athletes maintain strength and flexibility and safely return to play. With Athletic Taping and Bracing, Third Edition, readers will learn the evidence-based foundations and techniques of taping and bracing, as well as how taping and bracing can aid an athlete's total rehabilitation. The coverage of rehabilitation exercises as well as prevention will help readers become more effective health care providers for athletes and other active people with musculoskeletal injuries and problems.

Dropping the Bucket and Sponge CreateSpace Principles of Pharmacology for Athletic Trainers, Second Edition

has expanded the comprehensive and unique aspect of pharmacology presented in the best-selling first edition by introducing new information on: • Drug and treatment strategies. • Aspects of Type 1 and Type 2 diabetes, including treatment strategies, the disease process, diagnosis & monitoring of diabetes, and issues that are important for the athletic trainer. • The foundational concepts and pharmacological treatment of schizophrenia, depression, bipolar disorder, various anxiety disorders, and attention deficit-hyperactivity disorder. • Discussion of herbal supplements, federal regulations, and safety & quality issues related to herbal supplements. Dr. Joel Hougum and Dr. Gary Harrelson have updated Principles of Pharmacology for Athletic Trainers, Second Edition to be more user-friendly by incorporating revised information on pharmacokinetic and pharmacodynamic principles, making it even easier for students to understand, while still providing the depth of information desired by faculty. Features of the Second Edition: • Educational prompts are provided in each chapter in the form of an advanced chapter organizer. • Shadow boxes throughout to remind students of previously discussed topics. • Summaries at the end of each section to reinforce learning. • A section in each chapter on the role of the athletic trainer regarding the disease process and drug therapy. • New ancillary materials specifically for faculty that include PowerPoint slides and test bank questions. Principles of Pharmacology for Athletic Trainers, Second Edition will be the go-to resource to determine the best pharmacological treatment strategy and management by athletic trainers.

"This new edition of Professional Ethics in Athletic Training provides a framework for understanding and applying ethical principles across the career span of an athletic training professional. As a professional textbook, this book is intended for use in accredited, professional athletic training programs to do the following: Provide a strong theoretical and practical foundation for defining and understanding professional ethics. The professional obligation of the athletic trainer is defined with comprehensive insight regarding the definition of a profession, upholding the social contract with society as a professional, and the unique values and obligations that guide our professional behaviors while infusing ethical constructs for consideration. Through an awakening process, a rich description of integrity is provided as the underlying element of professional practice. Practicing with integrity is introduced and applied through discussion of theory and development of the constructs of character and moral courage. Define the multiple components of

practicing with integrity throughout the career path of an athletic trainer through individual consideration at each level of professional development as an athletic training professional. Preprofessional students are in a unique situation as they transition into the academic and clinical athletic training programs. These students require a strong foundation in the ethical considerations of the profession as well as a comprehensive insight into the potential ethical (and legal) dilemmas associated with the practice of athletic training. By clarifying values and understanding academic and clinical practice regulations, the preprofessional student is guided to embark upon the practice of athletic training. Professional students are in the evolutionary process of practicing with integrity and lend a comprehensive approach to ethical decision making and professional responsibility. Professional ethics provide the foundation for professional students to emerge from academic programs with sound, responsible reasoning to facilitate ethical courses of action and decisions. Young professionals are faced with incredible practice challenges as they transition to independent clinical practice. Workplace influences can provide great challenges for young professionals, so a solid framework for understanding the importance of practicing with integrity and potential implications of straying from one's moral compass are addressed. Introduce and encourage ethical leadership as a fundamental element of professionalism and encourage athletic trainers to commit to a lifetime of leading with integrity throughout their professional careers. Addressing the leadership crisis in health care contextualizes the role of athletic training in the larger construct of health care while providing a comprehensive overview of athletic training leadership opportunities and impact. Character development to promote leadership with integrity is addressed through a rich discussion of leadership styles, traits, and behaviors. As athletic trainers, understanding the essence of ethical leadership in the context of the greater health care system is instrumental to making strong ethical decisions throughout one's career. Leaders are faced with challenges on a regular basis, and leading with integrity through crisis is critically important. Tests of leadership are addressed to promote self-discovery and facilitate leadership development among constituents within the organization to promote participative leadership and strong leadership involvement within the profession of athletic training. Ethical leadership needs strong foundational models upon which to anchor professional behaviors and decisions. Multiple ethical decision-making models are presented to guide athletic trainers through a lifetime of ethical leadership, to develop a strong professional leadership plan, and to establish the confidence needed in ethical decision making to ultimately practice and lead with integrity. Educational settings and scholars within the profession of athletic training face unique challenges. As athletic trainers fulfill the multiple roles in the academy, understanding the potential ethical dilemmas that could emerge, as well as the obligation to pay it forward as an ethical leader, is emphasized"--

Basic Athletic Training Kc13 Corporation

An invaluable resource for any athletic training curriculum, this text introduces athletic training as a profession by presenting an ethical framework of values, principles, and theory. Chapters explore important issues related to cultural competence, foundational behaviors of professional practice, professional and moral behavior, and ethical decision-making - skills that both inform and transcend the athletic training profession. Learning activities at the end of each section help you see connections between the material and clinical practice, revealing new insights about yourself, your profession, and the organizations with which you will interact. Content draws connections between ethical values, principles, and theory, as relating to the Foundational Behaviors of Professional Practice. Over 100 case studies promote critical thinking with clinical examples of ethical situations and conflicts that correspond to the domains identified by the Board of Certification (BOC) Role Delineation Study. Learning Activities chapters at the end of each section provide over 60 activities designed to link content and theory to clinical practice. Organized into three levels, Level One consists of an introduction to professional ethics in athletic training, Level Two focuses on professional enculturation, and Level Three explores the application of ethical concepts in professional life. Good to Know boxes highlight information throughout the chapters to enrich content and identify applications in the field. Professional Pearl boxes contain quotes from NATA Hall of Fame Inductees, offering advice about the challenges often faced in the profession. Chapter outlines, learning objectives, and ethical concepts at the beginning of each chapter lay out the information in an easy-to-follow framework. Appendices include self-assessment and evaluation tools that encourage you to assess where your own responses fall within ethical boundaries. Sections on cultural competence and ethical dilemmas increase awareness of diversity by exploring scenarios in which the practitioner's and patient's morals may conflict.

Finally, there is a text that instructs both prospective and existing athletic trainers about offering services in the fast-growing, professionally rewarding corporate and industrial environment. Athletic Training in Occupational Settings comprehensively presents the ways to successfully tailor and deliver services to meet this market's needs. Susan Finkam, MS, ATC/L, CEA, begins by addressing "why" athletic trainers have expanded the markets they serve. An overview of this evolution into occupational settings is provided to enhance your understanding of this marketplace and the opportunities it presents. After identifying the differences, the text then shifts its attention to answering "how" an athletic trainer can practice effectively in this setting. Topics covered in this section include marketing ideas, proposal and contract writing, service delivery, and other pertinent skills. Athletic Training in Occupational Settings also contains clinical examples and numerous professional forms to supplement the information presented. These valuable features further assist students in understanding the function of athletic trainers in occupational settings. This easy-to-read resource is also valuable for professionals either desiring a career change to a different athletic training setting or looking to develop additional services for their place of employment Topics covered inside: Occupational athletic training service offerings Marketing methods Proposal and contract writing Facility/program management
