Materials Handling Handbook John Wiley & Sons

SURPLUS RECORD, is the leading independent business directory of new and used capital equipment, machine tools, machinery, and industrial equipment, listing over 100,000 industrial assets; including metalworking and fabricating machine tools, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more. Over 1,100 businesses list with the SURPLUS RECORD. October 2022 issue. Vol. 99, No. 10
Construction Equipment Guide Surplus Record

SURPLUS RECORD, is the leading independent business directory of new and used capital equipment, machine tools, machinery, and industrial equipment, listing over 95,000 industrial assets; including metalworking and fabricating machine tools, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more. Over 1,100 businesses list with the SURPLUS RECORD. August 2022 issue. Vol. 99, No. 8
Transportation Series International Publications Service

With the construction boom reaching over \$300 billion by the early 1990s in the United States alone, this comprehensive and accessible guide is more important than ever for the budget-minded contractor. Presenting quick engineering know-how for the performance and satisfactory completion of construction using commonly recognized equipment, it deals with the physical concepts of the work, the surrounding conditions and equipment requirements, with an emphasis on controls governing the equipment's performance.

Army RD & A Bulletin John Wiley & Sons

Sponsored jointly by the American Society of Mechanical Engineers and International Material Management Society, this single source reference is designed to meet today's need for updated technical information on planning, installing and operating materials handling systems. It not only classifies and describes the standard types of materials handling equipment, but also analyzes the engineering specifications and compares the operating capabilities of each type. Over one hundred professionals in various areas of materials handling present efficient methods, procedures and systems that have significantly reduced both manufacturing and distribution costs.

Daily Consular and Trade Reports Pen and Sword Transport

During the 1970s and 1980s the Port of London, and shipping on the River Thames was in a state of transition. New methods of cargo handling, in particular the introduction of containers and Roll-on, Roll-off vehicle ferries called for new investment and a rethink on the way dock traffic was traditionally managed. As a result, The Port of London Authority decided to run down and close the various London docks and concentrate all new investment downriver at their Tilbury docks. These photographs, along with some from earlier decades, and mostly previously unpublished, are a fascinating insight into this period, when traditional ships and cargo handling methods worked alongside the new technology. Ships designed for carrying cargo in their holds were sometimes adapted to carry containers as deck cargo. There were also shipping types now lost to history, including colliers and sludge boats. Not forgotten are the passenger ships - cruise liners to ferries. The various vessels that serviced the port from tugs to salvage craft and floating cranes. Finally, the heritage craft from traditional Thames Sailing barges to former paddle steamers now adapted as floating pub/restaurants.
