From 1861 to 1865, the American Civil
War saw numerous technological
innovations in warfare—chief among
them was the ironclad warship. Based on
the Official Records, biographical works,
ship and operations histories,
newspapers and other sources, this book
chronicles the lives of 158 ironclad
captains, North and South, who were
charged with outfitting and commanding
these then-revolutionary vessels in
combat. Each biography includes (where
known) birth and death information, pre-
and post-war career, and details about

ships served upon or commanded.

The new ways of writing pioneered by the literary avant-garde invite new ways of reading commensurate with their modes of composition. *Dictionary Poetics* examines one of those modes: book-length poems, from Louis Zukofsky to Harryette Mullen, all structured by particular editions of specific dictionaries. By reading these poems in tandem with their source texts, Dworkin puts paid to the notion that even the most abstract and fragmentary avant-garde literature is nonsensical, meaningless, or impenetrable. When read from the right perspective,

passages that at first appear to be discontinuous, irrational, or hopelessly cryptic suddenly appear logically consistent, rationally structured, and thematically coherent. Following a methodology of “critical description,” Dictionary Poetics maps the material surfaces of poems, tracing the networks of signifiers that undergird the more familiar representational schemes with which conventional readings have been traditionally concerned. In the process, this book demonstrates that new ways of reading can yield significant interpretive payoffs, open otherwise unavailable critical insights into the formal and semantic structures of a composition, and transform our understanding of literary texts at their most fundamental levels.

Like most technical disciplines, environmental science and engineering is becoming increasingly specialized. As industry professionals focus on specific environmental subjects they become less familiar with environmental problems and solutions outside their area of expertise. This situation is compounded by the fact that many

environmental science related terms are confusing. Prefixes such as bio-, enviro-, hydra-, and hydro- are used so frequently that it is often hard to tell the words apart. The Environmental Engineering Dictionary and Directory gives you a complete list of brand terms, brand names, and trademarks - right at your fingertips.

An expert in world conflicts, Jones brings the sounds and sights of battle to life, detailing each charge, the evolution of battle tactics, and the importance of diplomacy for both sides. In these two volumes Terry Jones provides impressively clear coverage of the underlying economic causes, the progressively divisive political developments, the outbreak of the war itself, and, finally, the military campaigns year-by-year and battle-by-battle. He clarifies complex issues as he explains the various factions, their interests, and their hidden agendas. From the hopelessly impotent Congressional votes to the spilling of

blood on the battlefield, Jones makes this period of American history compelling reading. Extensively cross-referenced; includes a substantial bibliography; illustrated with maps and photos.--Amazon.com.

Ever since the end of World War II, and

even more so since 1960, when seventeen African colonies became independent of colonial rule, the African continent has been ravaged by a series of wars. These wars have ranged from liberation struggles against former colonial powers to power struggles between different factions in the aftermath of independence. They have ranged from border wars between newly independent states to civil wars between ethnic groups. As with many conflicts, outside forces were drawn into these wars, and major powers outside the continent intervened on one side or the other for a variety of reasons: political ideology, Cold War considerations, ethnic alignments, and stemming the flow of violence. Whether referring to Algeria's struggle for independence from

French colonial rule, Nigeria's internal struggles to achieve a balanced state after the British departure, the Rwandan genocide of 1994, or the current ethnic cleansing in Darfur, the second edition of the Historical Dictionary of Civil Wars in Africa covers all of the wars that have occurred in Africa since independence. This is done through a chronology broken down by country, a list of acronyms and abbreviations, an introductory essay, a bibliography, and cross-referenced dictionary entries covering the wars, conflicts, major political and military figures, child soldiers, mercenaries, and blood diamonds.
