This book identifies accumulated environmental, social and economic effects of oil and gas leasing, exploration, and production on Alaska's North Slope. Economic benefits to the region have been accompanied by effects of the roads, infrastructure and activities of oil and gas production on the terrain, plants, animals and peoples of the North Slope. While attempts by the oil industry and regulatory agencies have reduced many of the environmental effects, they have not been eliminated. The book makes recommendations for further environmental research related to environmental effects.

Excerpt from *Farthest North: Or, the Life and Explorations of Lieutenant James Booth Lockwood, of the Greely Arctic Expedition* It is believed that this book, with its true but none the less stirring adventures, will be of much interest to the general public, as well as gratifying to many warm friends of Lieutenant Lockwood. It will likewise correct any

erroneous impressions which may have arisen from the publication of garbled extracts from the official journals kept by the different members of the Greely party and, by order of the War Department, laid open to the public. By this order, Lockwood's journal and those of others became public property, and hence any reference to them in advance of their official publication is allowable. The few pages devoted to the early life can not be expected to especially interest the general public, but will gratify Lieutenant Loekwood's friends. They are here produced to give them permanency, and to show his sterling character. No attempt is here made to give a history of the Expedition, and only so much of Lockwood's journal is produced as shows his connection therewith. Painting and Publishing as Cultural Industries, 1580-1800 addresses how a small country like the Dutch Republic could become a major player in the creation of cultural goods during the Golden Age. On the basis of quantitative and qualitative sources from art history and book history, Claartje Rasterhoff traces the evolution of the painting and publishing industries from modest trades to booming industries. Informed by studies on cultural industries, she focuses on the role of industrial organization in shaping patterns of growth and innovation. Much like their present-day counterparts, early modern Dutch cultural industries were spatially concentrated, highly networked, and institutionally embedded. This distinct organizational structure helped to reduce uncertainty in the market and stimulated the commercial and creative potential of painters and publishers, for a century at least. Dutch painters and publishers had catered to their markets so rapidly and in such variety, that the exceptional levels of output, quality, and innovation accomplished during the first half of the seventeenth century could not be sustained. As producers came to face saturated domestic markets, they took to limiting risks and strengthening their distribution and marketing activities. By introducing the concepts of business cycles and spatial clusters, Rasterhoff offers a novel explanation

This book is an introduction-level text that reviews, discusses, and integrates both theoretical and practical corporate analysis and planning. The field can be divided into five parts: (1) Information and Methodology for Financial Analysis; (2) Alternative Finance Theories and Cost of Capital; (3) Capital Budgeting and Leasing Decisions; (4) Corporate Policies and their Interrelationships; (5) Financial Planning and Forecasting. The theories used and discussed in this book can be grouped into the following classical theoretical areas of corporate finance: (1) Pre-M&M Theory, (2) M&M Theory, (3) CAPM, and (4) Option Pricing Theory (OPT). The interrelationships among these theories are carefully analyzed. Real world examples are used to enrich the learning experience; and alternative planning and forecasting models are used to show how the interdisciplinary approach can be used to make meaningful financial-management decisions. In this third edition, we have extensively updated and expanded the

topics of financial analysis, planning and forecasting. New chapters were added, and some chapters combined to present a holistic view of the subject and much of the data revised and updated.
