Herbert Asbury presents here a vivid and startling account of New York gangdom from its beginning in Revolutionary times to comparatively recent days. Here are the stories of the great gangs which terrorized the city and at times menaced its very existence—from the Bowery Boys and the Dead Rabbits to the Gophers and the Eastmans. Kid Dropper, Dopey Benny, Gyp the Blood and Owey Madden are a few of the gangster luminaries described, not to

mention such female evildoers as Gallus Mag and Sadie the Goat. Nor have the underworld's lesser lights been overlooked; for these pages are crowded with a host of gang warriors, pickpockets, tong leaders, murderers, politicians, gamblers, prostitutes, dive-keepers and a few would-be reformers. Mr. Asbury has created such a rich, factual background for this chronicle of crime and gangsterism that the book gains considerable stature as a revealing picture of New York City's history through a century of frenzied growth and expansion. Whether you read it as such or merely for amusement, it is a swift, exciting experience.

Hungarian by birth, Nicolas Darvas trained as an economist at the University of Budapest. Reluctant to remain in Hungary until either the Nazis or the Soviets took over, he fled at the age of 23 with a forged exit visa and fifty pounds sterling to stave off hunger in Istanbul, Turkey. During his off hours as a dancer, he read some 200 books on the market and the great speculators, spending as much as eight hours a day studying. Darvas invested his money into a couple of stocks that had been hitting their 52-week high. He was utterly surprised that the stocks continued to rise and subsequently sold them to make a large profit. His main source of stock selection was *Barron's Magazine*. At the age of 39, after accumulating his fortune, Darvas documented his techniques in the book, *How I Made 2,000,000 in the Stock Market*. The book describes his unique "Box System," which he used to buy and sell stocks. Darvas' book remains a classic stock market text to this day.

A step-by-step system for mastering trading psychology. Think about your most costly and recurring trading mistakes. Chances are that they're related to common errors, such as chasing price, cutting winners short, forcing mediocre trades, and overtrading. You've likely tried to fix these errors by improving your technical skills, and yet they persist. That's because the real source of these mistakes is not technical—they actually

stem from greed, fear, anger, or problems with confidence and discipline. If you are like most traders, you probably overlook or misunderstand mental and emotional obstacles. Or worse, you might think you know how to manage them, but you don't, and end up losing control at the worst possible time. You're leaving too much money on the table, which will either prevent you from being profitable or realizing your potential. While many trading psychology books offer sound advice, they don't show you how to do the necessary work. That's why you haven't solved the problems hurting your performance. With straight talk and practical solutions, Jared Tendler brings a new voice to trading psychology. In *The Mental Game of Trading*, he busts myths about emotions, greed, and discipline, and shows you how to look past the obvious to identify the real reasons you're struggling. This book is different from anything else on the market. You'll get a step-by-step system for discovering the cause of your problems and eliminating them once and for all. And through real stories of traders from around the world who have successfully used Tendler's system, you'll learn how to tackle your problems, improve your day-to-day performance, and increase your profits. Whether you're an independent or institutional trader, and regardless of whether you trade equities, forex, or cryptocurrencies, you can use this system to improve your decision-making and execution. Finally, you have a way to reach your potential as a trader. Now's the time to make it happen.

Reminiscences of a Stock Operator First published in 1923, *Reminiscences of a Stock Operator* is the most widely read, highly recommended investment book ever. Generations of readers have found that it has more to teach them about markets and people than years of experience. This is a timeless tale that will enrich your life—and your portfolio.

Reminiscences of a Stock Operator is a fictionalized story based on the trading career of Jesse Livermore. It follows his journey from the age of 15 when he made his first \$1,000 to becoming a Wall Street legend. *How I Made \$2,000,000 in the Stock Market* Hungarian by birth, Nicolas Darvas trained as an economist at the University of Budapest. Reluctant to remain in Hungary until either the Nazis or the Soviets took over, he fled at the age of 23 with a forged exit visa and fifty pounds sterling to stave off hunger in Istanbul, Turkey. The New How I Made 2,000,000 in the Stock Market John Wiley & Sons

How I Made 2,000,000 In The Stock Market Nicholas Darvas, author of *How I Made 2,000,000 in the Stock Market*, concluded that Wall Street was nothing more than a huge gambling casino. It bristled with dealers, croupiers and touts—and he explained all of this in a later highly successful book, *Wall Street: The Other Las Vegas*. *How I Made 2,000,000 in the Stock Market* is an extraordinary book. It tells one of the most unusual success stories in the history of the stock market. Darvas was not a stock market professional trading on inside information. He was one half of the highest paid dance team in show business. Yet he was able to make himself a millionaire several times over by his unique investment approach. Unlike other so-called systems, it worked regardless of whether the market rose or fell. When news of Darvas' fantastic profits and methods leaked out, he was featured in *Time Magazine*. He then was persuaded to write a book which became an instant hit, selling nearly 200,000 copies in eight weeks. Many of the companies talked about in this book no longer exist. Many of the stocks are no longer traded. Nevertheless, the basic principles are as sound as ever.
