The medical establishment could only help manage his condition, but not diagnose or cure him. Doing her own research and documenting everything Knute ate and his reactions to certain foods, she came across two ubiquitous food additives. Diving deeper, she learned how Calcium ATPase, a fundamental regulator of intercellular calcium, is negatively impacted, not only by these additives, but by a torrent of other inhibitors. Knute's health is a testament to Brunde's discoveries, and The Calcium Connection gives readers a front-row seat to understanding how to maintain optimized cellular health.
