How To Restore Your Volkswagen Beetle Motorbooks

With 35 years experience, Laurie Pettitt knows more than most about the 'mucky green art' of rebuilding VW air-cooled engines. Written with genuine enthusiasm and a little humor, this step-by-step guide is like having a knowledgeable friend or older brother sat right next to you at the workbench. Learn how to remove and strip down your engine before taking a really good look at what's inside. Work out what's good and what's not. You will learn to examine components and find that often they are not only serviceable but better than modern reproduction parts. Reusing the original parts wherever possible, you will then learn how to prepare and reassemble your engine with plenty of tips and tricks to make the job easier. The importance of cooling tinware is emphasised and its refitting covered model by model. With the short engine

built, we turn our attention to ancillaries such as fuel, air and exhaust systems as well as sensible modifications to make your new engine perform better and last longer.

A Step-by-Step Guide to Upgrading Engine, Transmission, Suspension and Brakes Haynes Publishing

The specially commissioned photographs in this book display each Beetle variant model in their full glory. From the military vehicles of the 1930s through the post-WWII cars, up to and including the final German-built model of 1979, this book offers a loving tribute to the car in sumptuous detail. The beautifully

restored and kept cars of each decade are displayed across several double page spreads. Parts of each model are shown in close-up, compared and explained using studio photographs of each model's steering wheels, indicators, engine bays and other aspects of design and function. The history of the Beetle is illustrated using contemporary archive photography, and attention is given to the cultural impact of the Beetle as shown through movies (such as the Herbie franchise), advertising and graphic design. This large format, fully illustrated book presents the Beetle as an object of art, albeit one that starts every time and will run forever on reused cooking oil, with a little modification. Perhaps the most charismatic automobile ever, the Volkswagen Beetle was the longest-running, most-manufactured automobile on a single platform of all time. From 1938 to 2003, more than 21.5 million "Bugs" were assembled, distributed, and sold on nearly every continent in the world. Throughout the Beetle's successful run, many of these cars have been relegated to project car status due to their age or condition. Airkooled Kustoms, a VW restoration shop in Hazel Green, Alabama, brings its expertise in restoring these cars to book form with this all-encompassing compilation. Restoring your Beetle is covered through step-by-step sequences from unbolting that first nut through polishing the paint on your freshly restored Bug. The specialists at Airkooled Kustoms walk you through the

proper disassembly methods, restoring versus replacing components, and reassembling your restored Bug, covering everything related to the body, undercarriage, and interior along the way. It's about time a thorough, hands-on restoration book has been authored by authorities who know the Beetle like the back of their hands. With this book, you will have everything you need to bring your old or new VW Beetle project back to life. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial; color: #000000}

The air-cooled four-cylinder VW engine has inhabited iconic cars, such as the Beetle and the Bus, and many other popular Volkswagen vehicles over the years. In stock form, these rather simple engines only produce 29 to 80 hp. Barely adequate for a street car, this level of

horsepower falls woefully short for high-performance applications. Fortunately, these engines can be easily modified to produce 300 to 400 hp for the street and much more for extreme high-performance and racing applications. In *VW Air-Cooled Engines: How to Increase Power and Performance*, author Dan Burrill explains how to upgrade and modify these spritely 1,100- to 2,300-cc engines into powerful high-performance engines. Modifying these engines to produce 500 to 600 or more horsepower was once thought inconceivable. Now it is within your reach with the information to build such engines contained in this book. The author explains the installation of a wet or dry sump engine so high horsepower can be attained. Selecting the best high performance parts with the best design is covered in detail. To handle high-RPM and high-performance service, the pushrods, rocker arms, and valvesprings must be upgraded and all the relevant options are discussed. Assembling and installing a long-stroke engine package for superior performance is also examined. In addition, a special section on supercharging, turbo charging, and nitrous is also included. VW Beetles and Buses have never been more popular. Whether you're an enthusiast looking to build a mildly modified engine for improved performance or a competitive racer building an engine to win races, this book is a welcome addition to your shop and performance library.

How to Restore 1949-1967 VW Beetles to Original Factory Condition

Avalon Travel Pub

The Volkswagen Beetle is the most successful car in the history of the automobile and over twenty million examples have been built. Conceived by Adolf Hitler in the spirit of the Model T

Ford and designed by Ferdinand Porsche in the 1930s, the Beetle did not enter series production until 1945, after the ending of the Second World War. Its familiar but unconventional lines have since become recognisable throughout the world and, incredibly, it is still being built at VW's Mexican factory. This edition brings the story up to date and charts the arrival and evolution of the New Beetle, visually inspired by the original, which appeared in 1998. About the author Jonathan Wood is a founder member of the staff of Classic Cars, the magazine which gave its name to the movement. He is the author of some 35 books, which include an acclaimed

history of the Volkswagen Beetle. Other titles for Shire by this author are: The Bean Austin Seven The Citroen The Bullnose Morris Classic Cars The Model T Ford The Rolls-Royce
